The scientists and doctors (American Frontline Doctors, Dr. Tenpenny and numerous others) who AREN'T being paid by Big Pharma, the CCP and the Globalists say:

Masks don't protect against COVID-19, the particles are too small, they are not caught.

Sneezing, coughing, phlegm, yes ..but not COVID.

Masks DO impair breathing and reduce O2 levels, thereby causing headaches, brain cell death.

The Mask Free states, like Florida, their COVID numbers were no higher than the masked states.

The COVID vaccines aren't vaccines, not FDA approved. They are Experimental Biological Agents.

NO successful animal studies have been done, all lab animals tried, DIED or developed neurological, cardiovascular damage, pulmonary damage, etc.

The human trial was a bust--- the Big Pharma sponsored trial had a No Jab control group and The Jab group.

Not even waiting a week to see what differences there were, they informed the No Jab group and gave them shots, thus negating any benefits of a real experiment.

The CDC, Big Pharma, the NIH and Fauci ALL own patents on The Jabs. It's about Politics, gaining power over people and money, NOT about saving lives. Several thousand people have died, thousands more have had adverse reactions already.

Every citizen has the God-given right to protect themselves and their families. You have NO right to force any potentially lethal injections on anyone. You have no right to force ineffective masks on anyone. Those are the actions of Communistic, totalitarian governments, not those of America, the Land of the Free because of the Brave.

Follow the REAL Science, not the lies! And stop perpetuating fear. Instead, deal with the growing crime: stop illegal aliens from invading and bringing more drugs and human trafficking crimes. Represent your citizens, not a Commie agenda!

We are sick of your oppressive tactics. You are not God, not the Overlords, so stop bullying the Citizens!

In God We Trust,

Dr. Laura Vest

This **power grab 2.0** is in VIOLATION OF STATE LAW. There are those who feel this is the appropriate way to protect themselves and their families, and the Pima County Republican Party agrees with their right to do so!! **HOWEVER!!** There are those of us who feel that NOT wearing a mask and NOT receiving the vaccine is the most appropriate way to protect ourselves and our families. We have the right to protect our families, too!

Hi Jessica,

I hope I can add some more onto my original post. Our daughter's elementary school started last Monday. On Thursday, we received a notification that there is a positive case in her class. Although she is not a close contact, we kept her home on Friday and struggled all weekend wondering if we should send her back to school. This morning I took her to school hoping for the best. Twenty minutes after I got home, I received another notification that there was another positive case in her class. I then drove to school and took her home. 99% of teachers and staff do not wear masks. Yes, they are vaccinated, but evidence shows now that vaccinated individuals can also carry viruses. I, as a parent, am very frustrated and ask Pima county for help to keep our children safe and mandate mask wearing.

Thank you very much,
Amy Lee

Pima County Board of Supervisors,

Please do not pass the resolution to mandate masks be worn in k-12 schools within our county. This makes no sense to a rational person. Although there are many false statements made on both sides of this issue there are plenty of reputable experts that oppose mask wearing and mask mandates in schools and is detrimental to our children.

Also, authority higher than you has passed a law making school mask mandates unlawful. Aren't we a nation of law?

It has come to my attention that, "There are those who feel that NOT wearing a mask and NOT receiving the vaccine is the most appropriate way to protect themselves and their families. These families have the right to protect their families, too! " While some people may "feel" this way, it is not consistent with science. We need our governments to create systems and environments that promote the best health and welfare for the citizens. Wearing masks and getting vaccinated are two things that we can do to protect ourselves and our neighbors. Please do not back down from your stance on masks and vaccines. I, like most people, want to get back to my life, and we can't do that if we aren't all working together to get us there.

Thank you,
Jessica Janecek

CAUTION: This message and sender come from outside Pima County. If you did not expect this message, proceed with caution. Verify the sender's identity before performing any action, such as clicking on a link or opening an attachment.

Dear Supervisors,

I am strongly opposed to tomorrow's Agenda item regarding the re-establishment of Mask & Vaccine mandates.

This is a Freedom of Choice issue. Those who feel safer wearing masks & getting vaccinated should certainly do so. They should NOT be required for those who do not want to wear germ laden masks or to have experimental drugs with inadequate testing injected into their bodies – especially those who already had Covid. Dr. Fauci's own emails even indicated that masks do nothing.

I suggest you learn how to use the VAERS database to actually see the large number of adverse effects caused by these experimental drugs. In the 31 years that VAERS has been in existence, there were 3,885 deaths (125 per yr); in one year of Covid, there were 5,063 deaths. Pulmonary embolisms: 14 compared to 73 since covid. Other drugs have been pulled from the market with far fewer incidents – i.e. Thalidomide.

Establishing these “emergency” mandates are in violation of State law. You are also violating Parental Rights for their children if they don’t want them to wear masks in school. Kids are the least impacted by Covid.

Of further interest, when Senator Burr asked Dr Fauci, Peter Marks from the FDA & the CDC Director what percentage of their own employees were vaccinated. Fauci responded about 60%. Marks said about the same & Walensky dodged the question.

Please vote against another Emergency mandate. It is unnecessary & unwarranted.

Sincerely,

Shirley Lamonna

Dear Board of Supervisors:

I am opposed to any new mask mandates. We have known from the beginning of the COVID-19 pandemic that ordinary surgical masks and cloth masks are ineffective at stopping viruses from entering or exiting our systems. This has been documented by Dr. Fauci as far back as January 2020: "In the United States, there is absolutely no reason whatsoever to wear a mask. If you look at the masks that you buy in a drugstore, the leakage around that doesn't really do much to protect you,"

A Danish study reported last November stated, "Researchers in Denmark reported on Wednesday that surgical masks did not protect the wearers against infection with the coronavirus in a large randomized clinical trial." Read about it [here](#).

The reason these masks are ineffective is simple. The virus is too small to be trapped by the masks.

I believe that whether or not to wear a mask should be a personal decision, and not a government mandated one size fits all edict.

For the record, I have been fully vaccinated since last March, by my choice.

Sincerely,

--

Hello,

Please do not mandate any kind of mask or vaccination policy on our beloved Tucson population. You would be doing the loyal citizens a disservice by enforcing such a thing.

Wearing a mask or receiving a vaccine is a private and personal decision. It is a violation of state law to mandate masks or vaccines. Obey the law just like you expect the rest of us to do so.

Thank you

Comments	I am extremely concerned about the continuation of masking our children, K-12. A careful review of the Evidence reveals that masking does not stop the spread of COVID. The original virus is less than 0.125 microns in size and the delta variant is even smaller. Masks and respirators can only filter out particles. 0.30 and 0.80 microns in size. They certainly cannot filter out a particle 0.125 or smaller in size. The WHO back in March 2020 said, "There is no specific evidence to suggest that the wearing of masks by the mass population has any particular benefit." According to the CDC, April 2020, "Wearing a surgical mask won't stop the wearer from inhaling small airborne particles, which can cause infection. Nor do these masks form a snug seal around the face." Quality research in the leading journal, Nature, estimated the Covid-19 survival rate to be approximately 99.995% in children and

20210809152701

teens, The Atlantic in January 2021 wrote, "We've known for months that young children are less susceptible to serious infection and less likely to transmit the coronavirus. This piece by Thompson (Derek) was driven by the CDC 'coming out' in the last week for school reopenings when the data was clear for a long time that the risk was very low, if at all. Secondary transmission is low. Based on a high quality McMaster University review, researches found that "transmission was traced back to community and home settings or adults rather than among children within daycares or schools, even in jurisdictions where schools remained open or have since reopened. Below are additional references/articles you may be interested in reading: 1. Masking: A Careful Review of the Evidence, February 2021, Dr. Paul Alexander, AEIR.com 2. Conclusion Regarding Masks They Do Not Work, Dr. Sherri Tenpenny, DO, AOBNMM, ABIHM 3. Masks Don't Work: A review of Science Relevant to COVID-19 Social Policy, Denis G Rancourt, Ph.D., <https://rereader.com> 4. These 12 Graphs Show Mask Mandates Do Nothing to Stop COVID, <http://thefederalist.com/2020/10/29> Articles 2 and 4 have additional articles and references you can check out as well. It is my educated opinion as a Clinical Laboratory Scientist with academic and clinical emphasis in Medical Microbiology and Immunology that masking of children and teens in particular is of not value. It just continues to perpetuate fear and obsession. There are also negative side effects associated with mask wearing such as : difficulty in breathing, inhalation of toxic chemicals such as chlorine and microplastics in the masks, a decrease in blood oxygen and an increase in blood CO2 (carbon dioxide), dizziness, lightheadedness, headaches, bacterial and mold buildup in masks that can be inhaled, anxiety and sleep problems, behavioral disorders, and fear of contamination, facial infections, nose/throat and sinus infections, and more. If you are going to support masking especially of children, you should be aware of the consequences and that the decision you support is not based on real science. I strongly suggest you not support mandatory masking of children and teens. Now onto vaccinations. Remember the proabortion women saying, "My Body, My Choice." That is the same for vaccinations. It is a choice but more than that, I questioned the logic and reasoning behind requiring mandatory vaccinations be it a hospital or government facility, or other business. Demanding individuals get vaccinated with an experimental injection which has already been associated with significant deaths and serious side effects. Why when there are medications individuals can take to recover or prevent infection with SARS-CoV-2 such as hydroxychloroquine, ivermectin, azithromycin, and add zinc plus monoclonal antibodies and more which studies undertaken by Dr. Richard Fleming have substantiated. The reduction is deaths and the recovery rate for these medications is high. Natural immunity is long-lasting and robust which cannot be said of the experimental vaccines (injections). You must be aware that almost half of the cases of the Delta variant are in vaccinated individuals. It is not the unvaccinated that are driving this up swing in cases. Why would anyone get this vaccine as many as these vaccinated people are sick and several have died? How effective is the vaccine? It is the vaccine that is driving the formation of these variant strains. Every heard of Muller's Ratchet (is a process through which, absence of recombination (especially in an asexual population), an accumulation of irreversible deleterious mutations results). A virus does not

want to kill its host. It needs that host for its existence/reproduction. So when a virus mutates it usually becomes weaker but more infectious. It is the vaccine that is perpetuating the formation of deviant strains. The Delta strain does appear to be more infectious but less "deadly." Many cases are described as cold like symptoms or like allergies. Maybe the serious cases in vaccinated individuals is due to a consequence of the vaccine/injection that is antibody mediated (over response of the immune system upon exposure to the real virus with the resulting cytokine storm)? Bottom line, it is not scientifically sensible to require those who do not wish to get vaccinated, to be forced to upon threat of losing their jobs. This is still American the last time I look. I strongly recommend that this policy/edict be shut down. Although this is a long letter, I hope you will all read it through and take time to check on references. I look forward to your responses. Mary Grace Werner

positive numbers rising in nearby school districts already in session, how can we possibly proceed as if there aren't continued, exceptional health concerns in our greater community? It is an unconscionable decision, I believe, to withhold protection for unvaccinated children. I understand that the freedom to make choices is important to every parent. This is not about choices. This is about our civic responsibility to do everything we can to protect our children and the community at large. When children under age 12 are eligible for the vaccine, then I will be much more comfortable with a mask optional policy. Until then, it takes away MY choice to send my 6-year-old unvaccinated child to the most responsible learning environment possible. Masks do not kill. COVID-19 does. If a mask mandate saves one life, isn't it more than worth the "hassle"? Please, I'm actually begging you...keep my daughter safe. Sincerely, Stephanie Erlacher

I am very concerned with the ideas of mask mandates and vaccine mandates. These are wrong and un-American.

Masks don't work (there are many, many studies showing this that have been "covered" up). They cause much damage to people, and especially children. They cause oxygen deprivation and CO2 poisoning. They have even been found to be the cause of dental problems, among others. My favorite test of mask uselessness that I read (I'm a retired reference/research librarian and read and research a lot) was when the testers put a man in a properly fitted surgical mask in a room with blowing plaster dust. Thirty minutes later they brought him out, took off his mask and found plaster dust all over the part of his face that was covered by the mask. The plaster dust particles were 40 microns, whereas the virus particles are about .1 microns—showing masks aren't effective in protecting the masked person from breathing in or out virus particles.

Mandating vaccines that are experimental is very wrong. The COVID-19 "vaccines" are not really vaccines, they are gene-therapy and they don't really know how people will be affected down the line. Also, because they are experimental, it is a violation of the Nuremberg Code to force them on unwilling people. It is also un-American, because we are supposed to be a free country and able to make our individual decisions on such things. And, don't forget our Amendment right to the free exercise of religion—some don't use medical procedures for that reason.

Attention Ms. Jessica Kopfmann:

I am urging you to please make masks mandatory in K-12 schools immediately.

These schools have the highest concentration of unvaccinated and unprotected innocent kids. Let some misguided adults who, for some political reasons, do not want to wear masks, exercise their rights. But at least use common sense and do not put at risk the lives and future of kids who do not have a say in this issue.

Sincerely,

Joe and Melissa Lazarevic, parents of two unvaccinated children ages 10 and 6

Hello,

As a citizen and lover of Pima County, I request that you DO NOT mandate masks or vaccinations on our community!

This is a private decision and should not be forced upon the people. ESPECIALLY the vaccine mandate. Masks are harmless, whereas there are thousands upon thousands of adverse and negative reactions happening that are both reported and not (publicly in the media).

If the Covid-19 vaccine becomes mandatory, our right to choose healthcare/voluntary procedures are stripped away and we will start to mirror that of a socialist society - and that is NOT AMERICA, and definitely NOT ARIZONA. If you mandate ANY of the Covid-19 vaccines, you are stripping away people's rights to CHOOSE. Let the lawful and good citizens of Tucson/Pima County CHOOSE if they want to subject themselves in this highly unreliable and undetermined experiment. The vaccine is not FDA approved, and yet being forced in other counties - how SCARY. It is a violation of state law to mandate masks or any Covid-19 vaccines. It also will violate people's religious freedoms because many people don't agree with these vaccines from a protected, religious standpoint.

Let the people choose. That is true freedom. And we the people of Pima County, will greatly, GREATLY appreciate it.

Best,
Lexis Rorrer

Dear Pima County Supervisors:

I am writing to you as a concerned parent/former teacher/college student about the spread of COVID-19 in Pima County schools. My son is apart of MUSD and almost nobody in his class or at school wears masks. I kept my son home from school the entire school year last year in order to keep him safe. My son has special needs that cannot be met at home and I was hoping he could start kindergarten safely. The COVID-19 numbers are rising once again within Pima County and I am concerned for my son. Masks only work if everyone is wearing them. With this sad, please consider a mask mandate for Pima County. Kindergarten is scary for every parent, let alone starting Kindergarten in the middle of a pandemic at school where nobody is wearing masks. If you do not want to wear a mask to protect yourself at lease wear one for the children who do not have a choice in vaccinations. Thank you.

To The Pima County Board of Supervisors:

This letter serves to inform you that you are in direct violation of the Arizona State Constitution, Constitution of the United States, The Bill of Rights, USC code 360-666 and Governor Ducey's order 2021-09.

Also, my teenage daughter, who I adopted out of foster care 7 years ago, suffers from PTSD and anxiety due to years of physical, emotional and sexual abuse. Having a mask on her face 7 hours per day is very traumatic for her. Being isolated at home because she can't wear a mask triggers her due to the severe neglect she suffered at the hands of her biological father for 7+ years. What you are doing to some of these kiddos is beyond illegal. It's pure evil in some cases! Please do the right thing. Parents have the right to choose what is best for our children!

Also, taking an unproven, untested vaccination with only an emergency use order by the FDA is not only dangerous to the populace, but unlawful!

Your violations of the above codes, orders and Bill of Rights, as well as violation of medical rights, is unacceptable and against the law!

No one should ever have to be subjected to forced vaccination against something that "Dr." Heinz claims is deadly, when there are ZERO DEATHS and is more than 99% survivable and treatable with proper medical treatment, including Hydroxychloroquine, Ivermectin, Zpac, Zinc, Vitamins D and C, and Budesonide, given in the right dosages and combinations.

These will lift the virus from an individual! Your lies to the public are heinous! "Dr." Heinz, in our opinion, should have his license removed for not affording the proper treatment recommendations to those who fall ill. Doctors here who have successfully treated patients who got ill were cured within 2 days and were able to go back to work. This is gross malpractice and "Dr." Heinz should be sanctioned and/or have his license removed!

"Dr." Heinz should be ashamed of himself with what was written as his reasons for wanting such a dreadful mandate passed. It sounded like sour grapes and a 2 year old having the worst kind of temper tantrum! One's whining, sniveling and complaining should be no excuse for a mandate such as this! Further, this minor illness is no reason to claim it as an "outbreak" when clearly, it is not!

Those who are in hospital at this time are 80-90% FULLY VACCINATED! And the hospitals are NOT full as claimed in false media reports and those willing to lie for a government facility to unnecessarily lie to a public who doesn't want anything to do with this claimed virus issue any longer.

Furthermore, everyone knows now that the PCR tests used since the start of the claimed "pandemic" have now had their emergency use orders removed from the FDA for showing too many false positives and can no longer be trusted! In addition, it has been proven that there are NO TESTS that can show, or claim to show, any variants! You cannot show proof of any claim made in your request for the forced vaccination of anyone!

In addition, to threaten someone's lives and livelihood all over your illegal demands and unfounded accusations and claims of any "variants" of coronavirus warrants investigation into several violations of the Civil Rights laws, blatant discrimination based on someone's medical status, and forced coercion to get something that should be a CHOICE!!

Your usurpation of all rights of those in the county is tantamount to tyranny in the worst form and, again, illegal!

You are hereby on notice that you are now in direct violation of the above laws and codes! If any board member signs off on this ILLEGAL ACTION, you will be subject, but not limited to, arrest and punishment for your illegal actions!

CEASE AND DESIST IMMEDIATELY!

Sincerely,

Rachel Jones

I am writing to you as a very concerned parent for the upcoming 2021-22 school year.

I've seen the dashboards tracking Covid-19 cases in local schools here in Tucson that have already begun instruction, and it's scary! Today, CFSD started instruction, and my innocent little 5 year old started kindergarten.

I do not agree with the law that was passed in July, that prevents K-12 school districts from being able to protect their students by requiring masks in the classroom. This put parents in an extremely vulnerable situation.

My son isn't old enough to get vaccinated, yet. I also have a 3 year old at home. The last thing that I would ever want is for my children to get sick from Covid-19.

I am scared, because it's optional for my son's teachers to wear masks. If the teacher, isn't vaccinated and decides not to wear a mask, this is a huge risk to students.

My son will absolutely be wearing a mask, but as I'm sure you're aware, it is more effective in preventing spread, if everyone is wearing a mask. We will continue to follow CDC's and the American Academy of Pediatrics recommendations of indoor masking for all, despite vaccination status.

We need to stand up to the 'law' and put our children first. Indoor masks for all staff and students!

Sincerely,
Tina Ienna-Balistreri

Hi there,
This is Rabbiya I have 2 kids goes to BasisOV!
Younger one goes to the KG Basis OVP..
And one goes to Cross middle school..!
I am very concerned about another virus coming in these days..!
Can we do something about it?
Can masks be mandatory again?
Even if parents wants to keep their kids home.. there should be virtual option available for them..!
I have signed the petition too.
I hope there is something we can do about it!
Best regards..
Rabbiya!

To whom it may concern,

I am a parent of two children who attend Catalina Foothills School District. This school, just as many others is an open enrollment district which has children coming from all parts of Tucson. Our zip codes may have lower cases than most but when you factor kids coming from all over Tucson, that changes everything. Our schools did amazing last year with mask mandates and now to send our children into these schools with no mandate has us parents feeling anxious, worried, scared and fearful that our children are that much more susceptible to contracting the virus. The high schools and middle schools are among the most scary and highly contagious schools because some are vaccinated and feel as though they cannot spread the virus. I feel a little more at ease at the elementary level but it still isn't 100% masked as it should. We came this far just to throw it all away because of a "law" that is unconstitutional when it comes to the health and safety of our children. This isn't right and I ask if you have any children or grandchildren who attend public schools and how do you or their parents feel? There's many parents keeping their children at home because of this and are missing out on learning because either they have someone at home who is immune compromised or a new born child/baby at home. Please take into consideration that there are many scenarios and not just one that should be taken into consideration. Please make each school have a mask mandate until these numbers get lower. This issue is only going to make parents pull their children out of school and that will be detrimental to their emotional and mental health.

Thank you,
Andrea Ramirez

Good afternoon,

My name is Sarah Gomez. I am aware tomorrow there will be a meeting discussing the vote on mandating covid vaccines for healthcare workers and mandating masks for k-12 students. I have concerns about this vaccine and as a family friend who knows nurses. I strongly feel that we are entitled to make decisions about our OWN healthcare. Mandating vaccines is not the answer to this pandemic, and may in fact leave us with a severe shortage of workers to care for those who become ill. Whether their case is related to Covid or not. I ask you to PLEASE vote NO on mandating covid vaccines for healthcare workers.

Doug Ducey wrote an order that required no masks or vaccines are required for our students. It is a retroactive active bill that took in effect July 30th. It is state law our students DO NOT need to wear a mask or take the vaccine. I ask every one of you to please stand up for our children ! Our children have suffered enough by having to attend virtual schooling. Depression and suicide rates have increased amongst our youth.

thank you for reading this email.

Sarah Gomez

To the Pima County Board of Supervisors,

We send this message as parents of three young, school-aged children in the K-12 system in Pima County. We also write as concerned medical professionals who have worked in clinics and hospitals through the pandemic in Tucson. The devastating past year had many results, including remote learning. While it served as a protection for some, distance learning was very difficult for young children, as we learned from our family and circle of friends. We were relieved to return to school in person, however, the surge of COVID cases began again, coinciding with the opening of schools. We continue to believe in-person learning is best if performed with as much mitigation as possible. My wife and I are both a testament to the importance of mask use and its ability to prevent the spread of disease. We have worked in environments where social distancing is not possible, pre-vaccination, and were able to prevent COVID outbreaks within our working environments. It should not be any different in the schools in the current state, especially amongst the young, unvaccinated population. It is our job as parents, educators, and health professionals to speak for those who do not have a voice. With the recent exponential increase in cases amongst young children, we should mandate masks in schools in order to prevent the devastation we all experienced last year due to COVID. We simply cannot wait to see what will happen. The science and data are clear. Masks work. We need to step up and keep the politics out of this ordeal. Please fight for our kids and do the right thing. We should mandate masks in schools K12.

Respectfully,

Shamudheen Mohammed Rafiyath, MD
Sana Ali, Doctor of Physical Therapy (DPT), Pediatrics

Hello,

I am writing as a resident of the greater Tucson area to voice my opposition to mask and/or vaccine mandates in any form.

I am very supportive of vaccinations, I believe they are one of the greatest modern miracles, including the COVID-19 vaccine. Also, I believe that if individuals are willing to wear the right kind of mask, have it properly fitted and use it properly, it will likely protect them from getting and transmitting COVID-19 regardless of the variant. I believe that we would agree, at least generally, about the above paragraph.

That being the case, I am very opposed to the government directly requiring or indirectly coercing anyone to get the vaccine or wear a mask. Every one of us is responsible for our own health and wellbeing. The governments role is to provide us with the necessary information that we need to make our own decision and know how to access solutions. At this point in the COVID-19 pandemic everyone knows very well what masks to buy to protect themselves, and where to access a free vaccination. Everyone of us is completely capable of pressuring our own and our children's safety from COVID-19 regardless of the choices of others.

If we are to preserve the democratic republic form of government that we enjoy now, then there is no longer a place for the government to dictate or intervene in our individual lives when it comes to COVID-19.

Thank you. Very respectfully,
Ian

August 9th, 2021

Dear Pima County Supervisors:

I am writing to you as a concerned parent, community member and constituent, to thank you for adding Resolution of the Pima County Board of Supervisors Mandating the Use of Face Coverings in All K-12 Schools Within the County, as an Effective Mitigation Strategy to Keep our Children Safe from COVID-19; Effective Immediately to the Pima County Addendum Agenda for 8/10/21. **I urge Pima County Supervisors to vote in favor of the County Resolution requiring a universal mask requirement in K-12 schools.**

Arizona is currently experiencing another COVID-19 surge, with cases having tripled over the past month, coinciding with the arrival of the highly contagious SARS-CoV-2 delta variant in the state. States all over the country are seeing an increase in cases among the unvaccinated, and this includes a drastic increase in child hospitalizations, many of whom are not yet eligible for vaccination. The Academy of Pediatrics recently reported that cases among US children and teens jumped 84% in a week.

According to Banner Health Chief Clinical Officer, Dr. Marjorie Bessel hospitals have seen a 95% increase in Covid-19 patients since July 1 and 300% increase in ventilators and there is substantial spread in the vast majority of Arizona counties. Arizona is also second in the nation for pediatric deaths related to COVID-19, according to data published recently by the American Academy of Pediatrics.

Schools began welcoming back students to campus late last month and are already experiencing outbreaks across the state. Many are being forced back to online learning because they are not able to use simple mitigation tools like universal masking. The science around masking is settled. Masks work to prevent disease transmission. All recent public health agencies, both national and local, have issued statements recommending universal masks for K-12 students in schools.^[1] Arizonans have a right to safe schools for Arizona kids. Governor Ducey is attempting to prevent school officials from implementing any public health mitigation strategies in line with leading public health agencies, including the CDC and Arizona Department of Health Services (ADHS) to help protect students, all while COVID19 cases are again rising in our communities and more contagious variants are becoming more widespread.

The law passed by the state, banning schools from implementing such policies is likely unconstitutional,^[2] doesn't take effect until Sept. 29 and poses a serious risk to life and health.

Please choose to stand with our children and Arizona communities in supporting a safe return to the classroom by adopting the Resolution requiring masks in K-12 schools.

Thank you,

Ryan Montijo
