Read the articles on how children were damaged with remote learning, masks and jobs.

Follow the Science not the politics.

Tucson and Pima County residents are DONE with the panic and fear of Covid.

I'm 74 yrs. old double vaccinated and have had the COVID lite omicron not stopped with the Vaccines the end of January. Two days of a runny nose, NO BIG DEAL.

#2 Election rules... I have heard the County board is trying to change voting locations and allowing low security rules on ballots. We must have a fair and honest election in 2022. NO ballot harvesting, no ballots copied on local printers, stop using scanning equipment that is not secure, must have ID, address, signature protections. No mail in ballots without meeting strict requirements like WI.

City, County, State and Federal politicians and unelected positions will pay a high price for another fraudulent election and health mandates used during Covid over the last two years.

Pima County Board of Supervisors,

Please read my comments into records. Electronic voting machines pose a severe risk to the security and integrity of free and fair elections! We've seen the results of chaos that they have created in prior elections. Voters should reject the use of machines like computers or electronic poll books. Electronic poll books severely undermine election integrity as observed in the Georgia Election. Machines such as e-poll books are prone to malfunction, making it necessary to "adjudicate" voter intent. There were no safeguards, universal passwords were shared, unsecured back doors left the system vulnerable to hackers, and unsupervised adjudications far exceeded the norm of all prior elections in history. No machines!

In an interview with KVOA, *"Pima County Recorder Gabriella Cazares-Kelly wants Pima County voters to be able to vote at voting centers on Election Day rather than their specific polling place in their precinct."* Why? *"She and Pima County interim Elections Director Mary Martinson introduced a proposal to the Pima County Election Integrity Commission to bring 100 vote centers to the county for Election Day voting... This will eliminate more than 200 individual polling places within precincts."* Why eliminate 100 neighborhood polling places? That makes NO SENSE! In fact, we need more and smaller places closer to the voters. Her plan would alienate voters that have been going to the same familiar polling places for centuries.

*"Cazares-Kelly believes this will make voting faster, more convenient and ultimately increase turnout."* Don't believe that! Centralized "voting centers" are being pushed by progressives to take over our elections. It would make it easier to cheat and easier to overwrite the will of the People. It's another ploy to take over the process so they can easier control the outcome and harness power to "fundamentally change" this country.

Please reject this Evil plan!

Gisela Aaron  
Voter in Rita Ranch

excessive delays, preventing people from voting. Voting Centers and E-Pollbooks separately or together equal the definition of Voter Suppression.

If you all still go through and pass your nonsense proposed measures, I can guarantee that myself and many other voters will band together and work tirelessly to vote you all out of office!!

Thank you.

Dear Supervisor Scott,

Please read my comments into the official record. I ask you to NOT disenfranchise Pima County voters with centralized Voting Centers and E-Pollbooks. Research shows consolidating polling places suppresses voter turnout. This is particularly true for minority and low-income voters. E-Pollbooks are a disaster: they're connected to the internet, easily hackable, and frequently malfunction.

Elections in the United States were purposely structured to be decentralized, accessible, and accountable. Pima County needs to earn back the trust of voters by ensuring our local precinct voting locations aren't consolidated, and there's no change to our paper Pollbooks.

Sincerely,

Robert Moser
