A critical look at "Climate Change" should be taken by this board. We have enough information about solar plants and wind farms to see that they do not produce and are a waste of money. Electric vehicles need too much infrastructure and rare minerals to make them a good choice. The 5 of you are in control of all Pima County funding so I would like you to consider that some of us have a different priority for spending. To commit even more to the climate scam will not make living in Pima County a better choice. It is time to make some common sense spending habits and spend your time trying to make Pima County a great place to live. A solar farm will not do that. Please broaden the 5 year plan to include all residents. The surveys are all set up to align with the predetermined agenda that climate change advocates are for. I personally want a safe, clean environment that promotes personal property ownership and growth with beautiful well maintained roads, parks and public spaces. I do not think I am alone.

Please vote no and go back to a survey for all of us to set your priorities.

#10

Disapprove the "climate action plan" and cut all ties to the ICLEI. CO2 is the gas of life, and the level in the atmosphere is far lower than optimal for plants to flourish. It is not the control knob for the climate, and even if it were, our county could not make a measurable impact. CO2 comes from China and other places that are trying to lift their people out of poverty. The "climate goals" will do nothing except impoverish our people, subject us to tyrannical controls, and enrich global oligarchs.

#18/19

Stop tax funding projects aimed at turning us into digital resources controlled by Big Tech.

#4

Abolish the MEC. Improve education by expanding school choice, and the ability of low-income families to take advantage of it.
