Subject: freedom to make our own decisions about health and safety

CAUTION: This message and sender come from outside Pima County. If you did not expect this message, proceed with caution. Verify the sender's identity before performing any action, such as clicking on a link or opening an attachment.

It is time to allow the **citizens of Pima County to make their own decisions about their personal health and safety.** We want freedom not babysitters who think they can make better decisions than individual Americans. In the beginning if this pandemic much was unknown. Currently there is a considerable amount of research and information any consumer can read and study. Even though there is much to be said on both sides of the covid mitigation issues, all that means is that **there is a choice to be made and each person, each family can make that choice without the external force of government.** Too often government proves to be highly inefficient and much too often completely wrong on an issue. **We want the freedom to make our own choices! Stay out of our lives!**

MIT researchers say you're no safer from Covid indoors at 6 feet or 60 feet in new study challenging social distancing policies [REDACTED]
APR 23 2021 [REDACTED]

The risk of being exposed to Covid-19 indoors is as great at 60 feet as it is at 6 feet — even when wearing a mask [REDACTED]

An MIT study showed that people who maintain 60 feet of distance from others indoors are no more protected than if they socially distanced by just 6 feet. [REDACTED]

According to the researchers, other calculations of the risk of indoor transmission have omitted too many factors to accurately quantify that risk. [REDACTED]

"We need scientific information conveyed to the public in a way that is not just fear mongering but is actually based in analysis," the author of the study said. [REDACTED]

The CDC's Mask Mandate Study: Debunked

<https://www.aier.org/article/the-cdcs-mask-mandate-study-debunked/>

... Based on our assessment of this CDC mask mandate report, we find ourselves troubled by the study methods themselves and by extension, the conclusions drawn. The real-world evidence exists and indicates that in various countries and US states, when mask mandates were followed consistently, there was an inexorable increase in case counts. We have seen that in states and countries that already have a high frequency of mask wearing that adding mandates had little effect. ...

... Trusting the science means relying on the scientific process and method and not merely 'following the leader.' It is not the same as trusting, without verification, the conclusory statements of human beings simply because they have scientific training or credentials. This is especially so if their views and inquiry have become politicized. Dr. Martin Kulldorff of Harvard's Medical School has recently commented on the present Covid-19 scientific and research environment by stating, "After 300 years, the Age of Enlightenment has ended."

Sadly, we must agree, that it's not just that the age of enlightenment has come to an end, but indeed, that the science itself has been politicized and severely corrupted.

Here are a BUNCH of articles with PROOF mask don't work!

Face Masks Might Actually Increase Infection Risk for COVID-19

Here's why the vast majority of people should NOT be wearing face masks to combat the coronavirus.

<https://interestingengineering.com/face-masks-might-actually-increase-infection-risk-for-covid-19>

Mandatory Masks Aren't About Safety, They're About Social Control

To those looking to benefit politically from emergencies, COVID presents an opportunity to advance plans targeted to transform American freedom and the American way of life.

<https://thefederalist.com/2020/05/27/mandatory-masks-arent-about-safety-theyre-about-social-control/>

"There is no reason to be walking around wearing a mask. When you are in the middle of an outbreak, wearing a mask might make people feel better, and might even block a droplet," he said with almost an eyeroll, "but it's not providing the perfect protection people think it is, and often there are unintended consequences..."

Mask INEFFECTIVENESS!!!

"In conclusion, both surgical and cotton masks seem to be ineffective in preventing the dissemination of SARS-CoV-2 from the coughs of patients with COVID-19 to the environment and external mask surface. This article was published at [Annals.org](https://www.acpjournals.org/doi/10.7326/M20-1342) on 6 April 2020.

<https://www.acpjournals.org/doi/10.7326/M20-1342>

Blaylock: Face Masks Pose Serious Risks To The Healthy MAY 11, 2020

<https://www.technocracy.news/blaylock-face-masks-pose.../> Dr. Russell Blaylock warns that not only do face masks fail to protect the healthy from getting sick, but they also create serious health risks to the wearer.

The bottom line is that if you are not sick, you should not wear a face mask.

Keep in mind, no studies have been done to demonstrate that either a cloth mask or the N95 mask has any effect on transmission of the COVID-19 virus. Any recommendations, therefore, have to be based on studies of influenza virus transmission. And, as you have seen, there is no conclusive evidence of their efficiency in controlling flu virus transmission. It is also instructive to know that until recently, the CDC did not recommend wearing a face mask or covering of any kind, unless a person was known to be infected, that is, until recently. Non-infected people need not wear a mask. When a person has TB we have them wear a mask, not the entire community of non-infected. The recommendations by the CDC and the WHO are not based on any studies of this virus and have never been used to contain any other virus pandemic or epidemic in history. Now that we have established that there is no scientific evidence necessitating the wearing of a face mask for prevention, are there dangers to wearing a face mask, especially for long periods? Several studies have indeed found significant problems with wearing such a mask. This can vary from headaches, to increased airway resistance, carbon dioxide accumulation, to hypoxia, all the way to serious life-threatening complications. ... read more

Hello,

When will the public be allowed to participate in these meetings other than just via email?

How can my voice be heard that I am opposed to the continued forced wearing of masks when the governor and the president have said we are no longer required to wear masks.

Remember on December 4th President Biden said we would only have to wear masks for 100 days after his inauguration. We are past 100 days.

I have been forced to wear a mask at my employer for over a year!!!!!! That's approximately 2500 hours!!!!

This is not good for my health! When will my rights be reinstated? Remember "my body, my choice" ? Funny how that only worked one way.

My employer says you are the ones they have to comply with because you control their ability to do business.

I need to know when, if ever, you will lift the mandate? What are you waiting for?

Can I expect an answer to this email?

Thank you,

Randy Redwine .

Hello,

We are urging you to terminate mask mandates for businesses, schools and the entire county. Citizens have done their part and the effort shows. Our businesses have been shut down or required to operate under partial capacity. Our children have endured masks and distance learning. Let's recognize the efforts of all and eliminate the fear mongering. It's time.

Sincerely,

Subject: Drop the Pima County mask mandate please

CAUTION: This message and sender come from outside Pima County. If you did not expect this message, proceed with caution. Verify the sender's identity before performing any action, such as clicking on a link or opening an attachment.

My name is Mark Casciari. I reside at 6232 E. Tanuri Valley Pl. in unincorporated Pima County.

Here is why I ask you to drop all county mask mandates:

1. I am vaccinated, and everyone who wants the vaccine now can get it. The government health department encourages everyone to get the vaccine. The government would not promote the vaccine if it was not effective. If the vaccine is effective, masks are unnecessary.
2. If there remains a substantial risk of infection post-vaccine, the government would say so. It has not said so. Insubstantial risk is no reason to treat vaccinated people as if they are not vaccinated.
3. There is no reason why post-vaccinated people need to wear a mask to protect unvaccinated people. Unvaccinated people can protect themselves in a number of ways, including: wearing a mask, self-locking down, social distancing. Or they can choose to accept the risk of infection because they conclude that the cost of taking the vaccine (because it remains experimental) exceeds the the benefit (because they are low risk, e.g. young and healthy).
4. Wearing masks is not cost-neutral. They often collect germs. They inhibit breathing oxygen. They stifle speech among citizens. Then create a threatening optic. They create negative emotions: They negate smiles and the resulting positive emotions from smiles. They have become politicized -- masks are associated now with being a Democrat, furthering unhealthy political divisions.
5. If people want to wear masks, that is their right. Dropping he mask mandate does not undercut that right.
6. There now is no reason to flatten the curve to protect hospitals. There is no reason to elevate insubstantial risk to the level of an emergency.

Subject: Mask Mandate

CAUTION: This message and sender come from outside Pima County. If you did not expect this message, proceed with caution. Verify the sender's identity before performing any action, such as clicking on a link or opening an attachment.

Dear sir or madam:

My name is Mariel Ramos and I reside at 5440 W Opuntia Ln Marana, AZ 85658. I am writing this email with the intent of expressing my concern for the ongoing mask mandate.

To begin, research has shown that masks do not stop the spread of SARS-CoV-2 and below are few studies with links provided supporting this claim, beginning with the NIH.

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC7323223/>

According to the Association of American Physicians and Surgeons, the particle size of COVID-19 is 0.125 micrometers/microns. For any respiratory protection respirator or mask to be highly effective in preventing the transmission, it must provide a high level of filtration and fit. As we know, most people who wear N96 masks are not wearing them properly, hence they are not effective in protecting against COVID.

Surgical masks are loose-fitting devices that were designed to be worn by medical personnel to protect accidental contamination of patient wounds, and to protect the wearer against splashes or sprays of bodily fluids. **They aren't effective at blocking particles smaller than 100 microns.** A properly fitted N95 will block 95% of tiny air particles down to 0.3 microns from reaching the wearer's face. As stated above, COVID-19 particle size is .125 microns. Surgical masks are also ineffective.

All the cloth masks and materials had near zero efficiency at 0.3 microns, a particle size that easily penetrates into the lung. It's obvious that mask wearing by the general population is proven ineffective at stopping or reducing the spread of

MAY 04 2021 09:24:00 CLK 10

COVID-19. All of the facts referenced above can be found at this link: <https://aapsonline.org/mask-facts/>

For our youth, studies have shown that mask-wearing for the remainder of the school year could reduce the transmission by 1.1% at best (and this was a study that included adults, not children who do not know how to use masks properly to begin with). <https://www.cdc.gov/mmwr/volumes/70/wr/mm7010e3.htm>

Let's take a look at the side effects from prolonged mask wearing. The CDC has performed numerous studies that confirm that masks can cause serious health problems, and it states in black and white the side-effects of wearing a mask, specifically related to the masks trapping carbon dioxide or CO₂. This particulate study shows that masks cause breathing resistance that could result in a reduction in the frequency and depth of breathing, known as hypoventilation, in as little as an hour of wearing a mask. This particular study is in reference to healthcare workers however, it can also be applied to those who work long shifts at a restaurant or grocery store. Here is a short list of side effects provided on the cdc website: <https://blogs.cdc.gov/niosh-science-blog/2020/06/10/ppe-burden/>

1. Headache;
2. Increased pressure inside the skull;
3. Nervous system changes (e.g., increased pain threshold, reduction in cognition – altered judgement, decreased situational awareness, difficulty coordinating sensory or cognitive, abilities and motor activity, decreased visual acuity, widespread activation of the sympathetic nervous system that can oppose the direct effects of CO₂ on the heart and blood vessels);
4. Increased breathing frequency;
5. Increased “work of breathing”, which is result of breathing through a filter medium;
6. Cardiovascular effects (e.g., diminished cardiac contractility, vasodilation of peripheral blood vessels);
7. Reduced tolerance to lighter workloads.

The studies shared in this email don't even include the horrible delays we're seeing in our little one's speech, or the teenager who's using the mask to hide their face because they're embarrassed or ashamed of how they look.

I am grateful that my son who has [REDACTED] is not uncomfortable wearing a mask all day at school however, I have noticed [REDACTED] [REDACTED] due to school closures and mask mandates). I have also witnessed him using the face mask to hide behind because “he hates his smile”. It is heartbreaking to watch your own child struggle with their

identity, at any age. So I am respectfully urging you to please, PLEASE lift the mask mandate for Pima County. Please allow it as an option. The data along with links has been provided for you. As you can see, there is no evidence that supports the idea that masks protect against COVID-19. Thank you for your time and consideration!

Sincerely,
Mariel

The science speaks loud and clear about this issue, but the NIH and WHO does not. Masks are not necessary for children. The CDC director has unequivocally stated children do not need to wear masks. Our governor as well. Do right by our children. This will be the second summer if COVID. Stop putting obstacles in the way of getting our children back to the freedoms of childhood.
