Hello all,

**Agenda item #9:** I have grave concerns as to why the majority of the Pima BoS has an anti 2<sup>nd</sup> Amendment bias. Any "red flag laws" (under Fortify Public Safety) is not constitutional. The USA, would likely now be flying the British flag, if this BoS were running things during 1776. Instead, please protect people from crimes, by pouring large funds into the Sherriff's department.

**Agenda item #21:** Another headache. Vote **NO** to renew contract and just mitigate this horrid mess ... which is occurring under your watch.

**Agenda item #28:** More software corruption we don't need or want for honest elections. **NO** to Tenex Software Solutions, Inc! Pima County needs verifiable paper ballots and precinct voting locations instead of additional software and hardware for our elections (which will *always* be vulnerable to online manipulation and fraud, no matter how safe the vendor promises their system to be).

**Agenda item #32:** Please stop falling for the money making bogus Climate Change narrative. Yes, climate change has been occurring for the last 4.5 billion years. Until the solar system can be controlled, there's nothing we can do about. I just read Saturn is warming up, without humans to blame ... go figure. Vote **NO** to the purchase of an optical gas imaging camera which can be used to fine or even shut down Pima County businesses.

Sincerely,

Philip Kortesis

Good morning Supervisors,

While I am not opposed to an optical gas imaging camera, I am troubled about how it will be used. If this new equipment will be used only to make sure there are safe levels of the particular gas, that is reasonable and shows your concern for our community.

However, if this equipment will be used as a compliance tool for air quality permits (i.e., climate change initiatives) there will be far reaching consequences for its use. Have you taken these into consideration? Will this be used as a tool to fine local businesses or shut them down if they do not comply with an arbitrary gas/climate change level? How is this protecting our community? Have you taken into consideration that CO2 is not being vilified and that our atmosphere now has dangerously low CO2 levels? Sadly, from reading some of your resolutions and the Pima Prospers plan, I see that you have fallen victim to the "climate change" narrative.

It's not too late to current your current course. I urge each one of you to vote NO on agenda item 32.

Thank you for your time and consideration, Terra Radliff
