**Subject:** Green Valley Roads

We are long time Green Valley property owners and tax payers. We are extremely unhappy at the terrible condition of the county owned roads. Improveing only the good roads makes no sense as we watch our Green Valley roads continue to deteriorate to their current failed position. We have asked many times for a fair share of road funds which up until June have only been HURF funds. The state swept money from HURF funds and redirected it towards plugging holes in the state budget. Now, we had the promise of an increase in our property tax that would be used exclusively for repair of local county roads. We were encouraged that we would begin the journey to fix our failed roads. The Pima County Transportation Department's plan was once again directed only at preservation which does nothing for our failed roads. There has to be a way for the County to step up and find a way to fix our failed roads.

Greetings and Marry Christmas!

Please listen to the well though out request from residents and the Green Valley Council regarding fixing our horrible roads that have long been ignored and neglected. Under the District 4 Plan, Green Valley wants \$600,000 in special road tax money, not the pittance amount of \$51,437 being recommended by Pima County Board of Supervisors. We are watching. Enough said.
