

Board of Supervisors Memorandum

**Memorandum of Agreement Between Davis-Monthan Air Force Base
and Pima County Wireless Integrated Network**

Introduction

The Pima County Wireless Integrated Network (PCWIN) has sought the participation of Davis-Monthan Air Force Base (DMAFB) on the radio network. In December 2015, PCWIN signed an Interoperability Memorandum with DMAFB for their participation on the radio network as an Interoperability Participant. Because the Memorandum conveys no funding authority, an agreement was prepared to provide a funding mechanism for DMAFB to pay for programming and maintenance services. Traditionally, PCWIN has sought to execute an intergovernmental agreement (IGA) with each participant on the network. However, federal guidance regarding Department of Defense (DoD) agreements with local governments precludes DMAFB from entering into the standard PCWIN IGA. The County's legal staff worked closely with the Base's legal staff to develop the most advantageous agreement for both parties. This Memorandum of Agreement is the final step to include DMAFB onto the PCWIN network.

Background

The importance of such action cannot be overstated. DMAFB is inextricably linked to nearly all public safety operations in Pima County. DMAFB is one of two United States Air Force installations nationwide where the local government exercises jurisdiction for non-military public safety incidents on base. Tucson Fire and Police Departments respond several times daily to events on base and require close coordination with DMAFB Security Forces and Fire and Emergency Services. During the DM Airshow the Sheriff's Department, the Tucson Police Department, Tucson Fire Department and many other agencies bolster the public safety presence on and around the installation. The DMAFB Explosive Ordnance Disposal Team often assists off-base with suspicious packages and munitions removal. Many public safety agencies participate in joint training on the military installation and in the local community with DMAFB. These closely connected operations necessitate real-time communications between all agencies.

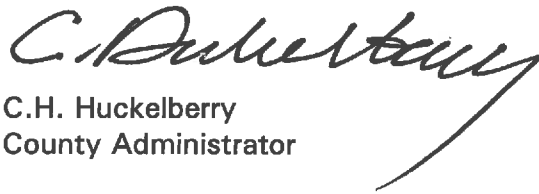

DMAFB's inclusion on the PCWIN network is a substantial benefit to the local community. In the past, the Base and local agencies communicated by sharing each agency's radio hardware. Now, like all PCWIN participating agencies, DMAFB is able to communicate with the majority of Pima County public safety agencies in real time, with one shared radio system. This increases interoperability across the board and promotes operational efficiency between agencies as procedures and coordination are streamlined. The end result is better public safety responses for our local community.
