The \$518,100 in the Price Sheet is the same amount that PCHD received in fiscal year 2021. The previous contract with ADHS for this program expired Jan. 28, 2022. PCHD has been assured the months between then and this contract taking effect will be paid "off-contract".

***Procurement Method:**

This Revenue Contract is a non-Procurement contract and not subject to Procurement rules.

***Program Goals/Predicted Outcomes:**

Re: Proposed Agenda Item for the Consent Calendar, Board of Supervisors Meeting June 7, 2022, New Contract CTR059661 for Well Woman Health Check Program (GTAW22*124)

Introduction

The Pima County Health Department (PCHD) has been providing Well Woman Health Check Program (WWHP) services since 1995. The program provides access for uninsured and underinsured women to receive breast and cervical cancer screening and diagnostic services and provides Navigation Only services for insured women to assist them in receiving breast and cervical cancer screening.

The Arizona Department of Health Services awarded "Competition Impracticable" contracts state-wide for this program year. They are in the process of submitting a proposal to the CDC for the State and will be issuing a Request for Proposals at a later time. The \$518,100 in the Price Sheet is the same amount that PCHD received in fiscal year 2021. The previous contract with ADHS for this program expired Jan. 28, 2022. PCHD has been assured the months between then and this contract taking effect will be paid "off-contract".

Discussion

The National Breast and Cervical Cancer Early Detection Program, known in Arizona as Well Woman HealthCheck Program (WWHP), provides access for uninsured and underinsured women to receive critical breast and cervical cancer screening and follow up services. In support of those efforts, the Arizona Department of Health Services allocates federal funds from the Centers for Disease Control and State funds to the Pima County Health Department to provide:

- Clinical breast exams, mammograms and pap/HPV tests to eligible women;
- Diagnostic services to detect breast and cervical cancers for women with abnormal screening results;
- Case management to ensure that women access and receive services;
- Navigation Only to provide individualized service planning and assistance in securing access to services for insured women needing screening or assistance with abnormal breast or cervical issues;
- Development of Survivorship Care Plans for Cancer survivors; and
- Training and education about the program to community members and health professionals.

In FY 2020-21, over 2,100 women were screened, approximately 766 were referred for further diagnostics, and 15 were referred for cancer treatment. In addition to screening and diagnostic services, the program educated at-risk and vulnerable women in the community about breast and cervical health, the importance of regular screening and early detection, and community resources available.

Financial Impact

There is no unbudgeted impact to the General Fund with this grant.

CONTRACT NO: CTR059661

- 6.3. Indemnification - Patent and Copyright. - 6.4.3. If either party is delayed at any time in the progress of the work by force majeure, the delayed party shall notify the other party in writing of such delay, as soon as is practicable and no later than the following working day, of the commencement thereof and shall specify the causes of such delay in such notice. Such notice shall be delivered or mailed certified-return receipt and shall make a specific reference to this article, thereby invoking its provisions. The delayed party shall cause such delay to cease as soon as practicable and shall notify the other party in writing when it has done so. - 8.1. Right to Assurance. If the State in good faith has reason to believe that the Contractor does not intend to, or is unable to perform or continue performing under this Contract, the Procurement Officer may demand in writing that the Contractor give a written assurance of intent to perform. Failure by the Contractor to provide written assurance within the number of Days specified in the demand may, at the State's option, be the basis for terminating the Contract under the Uniform Terms and Conditions or other rights and remedies available by law or provided by the contract.
- 8.2. Stop Work Order.
 - 8.2.1. The State may, at any time, by written order to the Contractor, require the Contractor to stop all or any part, of the work called for by this Contract for period(s) of days indicated by the State after the order is delivered to the Contractor. The order shall be specifically identified as a stop work order issued under this clause. Upon receipt of the order, the Contractor shall immediately comply with its terms and take all reasonable steps to minimize the incurrence of costs allocable to the work covered by the order during the period of work stoppage.
 - 8.2.2. If a stop work order issued under this clause is canceled or the period of the order or any extension expires, the Contractor shall resume work. 9. Contract Termination

- 9.1. Cancellation for Conflict of Interest. Pursuant to A.R.S. § 38-511, the State may cancel this Contract within three (3) years after Contract execution without penalty or further obligation if any person significantly involved in initiating, negotiating, securing, drafting or creating the Contract on behalf of the State is or becomes at any time while the Contract or an extension of the Contract is in effect an employee of or a consultant to any other party to this Contract with respect to the subject matter of the Contract. SCOPE OF WORK

CONTRACT NO: CTR059661

1. Background:

1.1 ADHS, Division of Public Health Services (PHS), BCDHP receives funding through a cooperative agreement with the CDC and from the State of Arizona to provide a statewide breast and cervical cancer screening and quality improvement program, known locally as the WWHP. The WWHP is part of the National Breast and Cervical Cancer Early Detection Program (NBCCEDP), which was authorized when the U.S. Congress passed the Breast and Cervical Cancer Mortality Prevention Act of 1990, Public Law 101-354 and reauthorized April 20, 2007. The Act placed the responsibility for NBCCEDP with the United States Government's CDC. It also provided the foundation of NBCCEDP policies and requirements with regard to program eligibility and operations in each state; and

1.2 The Breast and Cervical Cancer Mortality and Prevention Act of 1990 strictly prohibits use of NBCCEDP funds for cancer treatment. In October 2000, the U.S. Congress passed the Breast and Cervical Cancer Prevention and Treatment Act of 2000, Public Law 106-354. This law gives states the authority to provide optional Medicaid coverage to certain breast or cervical cancer patients. In the spring of 2001, the Arizona Legislature passed H.B. 2194 that authorizes AHCCCS, effective January 1, 2002, to provide cancer treatment for certain women diagnosed through the WWHP with breast cancer, pre-cancerous cervical lesions and cervical cancer. This was called the BCCTP. This law was changed in 2012; beginning on August 2, 2012, uninsured Arizona women, diagnosed with breast or cervical cancer, with an income at or below 250% of the Federal Poverty Level are eligible for treatment through the BCCTP provided by AHCCCS. End Note	Description
1	All consultations should be billed through the standard "new patient" office visit CPT codes 99201–99205. Consultations billed as 99204 or 99205 must meet the criteria for these codes. These codes (99204–99205) are typically <u>not</u> appropriate for NBCCEDP screening visits. However, they may be used when provider spends extra time to do a detailed risk assessment.
2	The type and duration of office visits should be appropriate to the level of care needed to accomplish screening and diagnostic follow-up within the NBCCEDP. While some programs may need to use 993XX- series codes, Preventive Medicine Evaluation visits are not covered by Medicare and not appropriate for the NBCCEDP. The 9938X codes shall be reimbursed at or below the 99203 rate, and 9939X codes shall be reimbursed at or below the 99213 rate.
3	List separately in addition to code for primary procedure 77067.
4	List separately in addition to 77065 or 77066.
5	Breast MRI can be reimbursed by the NBCCEDP in conjunction with a mammogram when a client has a BRCA gene mutation, a first-degree relative who is a BRCA carrier, or a lifetime risk of 20% or greater as defined by risk assessment models such as BRCAPro that depend largely on family history. Breast MRI also can be used to assess areas of concern on a mammogram, or to evaluate a client with a history of breast cancer after completing treatment. Breast MRI should never be done alone as a breast cancer screening tool. Breast MRI cannot be reimbursed for by the NBCCEDP to assess the extent of disease in a woman who has just been newly diagnosed with breast cancer in order to determine treatment.
6	Codes 19081–19086 are to be used for breast biopsies that include image guidance, placement of a localization device, and imaging of specimen. They should not be used in conjunction with 19281–19288.
7	Codes 19281–19288 are for image guidance placement of a localization device without image-guided biopsy. These codes should not be used in conjunction with 19081–19086.
8	For CPT 10011 use the reimbursement rate for CPT code 10009. For CPT 10012 use the reimbursement rate for CPT code 10010.
9	HPV DNA testing is not a reimbursable procedure if used as an adjunctive screening test to the Pap for women under 30 years of age.
10	Example: If procedure is 50 minutes, code 99156 + (99157 x 2). No separate charge allowed if procedure <10 minutes.
11	These procedures have not been approved for coverage by Medicare.

Note: all procedures over \$2,500.00 must have prior authorization.
