#40. TUSD needs to keep students' health information private. There is no guarantee that it cannot be reidentified. And what does the Health Dept plan to do with the data? Children's medical treatment is the responsibility of the parents. Giving it at school or worse on a bus removes parental supervision and makes it easy to override, intentionally or by accident, informed consent requirements. Moreover, giving shots occasionally results in life-threatening reactions, which cannot be properly managed in these settings and should subject the district to serious and deserved liability.

#2. We absolutely should not join the West Coast Health Alliance. Its main objective is to push the agenda of WHO, various organizations, and Big Pharma, despite growing evidence that their coercive agenda for more and more vaccination can be highly detrimental to children's health.

#21/22: The public has the right to timely notice of agenda items that affect them (are there any that don't?).
