***Title:**

Precinct Line Adjustments

***Introduction/Background:**

Per A.R.S. §16-411(A), the Board of Supervisors shall establish a convenient number of election precincts in the county and define the boundaries of the precincts on or before October 1 of each year preceding the year of a general election. Although the Board has already decided not to change the number of election precincts prior to the 2022 Election Cycle, the Elections Department is requesting that the Board approve several precinct line adjustments.

***Discussion:**

The Elections Department has identified multiple areas where precinct lines cut through individual parcels, which creates confusion as to which precinct/district the parcel belongs in. Often this occurs when a subdivision is built after precinct lines have been established. To the extent possible, the Elections Department is trying to ensure that no individual properties are split by a precinct line. The attached document shows the areas where adjustments are being proposed.

***Conclusion:**

If the proposed precinct line adjustments are approved, the individual parcels will no longer be split by precinct lines. The number of precincts in Pima County will remain the same.

***Recommendation:**

The Elections Department recommends approval of the precinct line adjustments.

***Fiscal Impact:**

None.

2021 Precinct Line Adjustments

The Elections Department has identified multiple areas where precinct lines cut through individual parcels. Often this occurs when a subdivision is built after precinct lines have been established. To the extent possible, the Elections Department is trying to ensure that no individual properties are split by a precinct line. These changes are in addition to the list of proposed combined precincts. We propose adjusting the lines between the following precincts:
