**Subject:** Approve resolution opposing Predator Masters hunts in Pima County  
**Date:** Thursday, February 12, 2015 4:59:25 PM

---

Board of Supervisors and County Atty,

I am a third generation Tucsonan and my late father and his buddies, who camped and ate what they hunted with respect for the desert and it's wildlife, would be utterly disgusted with Predator Masters depraved massacres, killing for killing sake and posing with piles of dead wildlife.

This is not hunting, but a form of sociopathic behavior and it is disturbing that Predator Masters also involves children in this derelict thrill killing.

Our Sonoran Desert species of Bobcat, Coyote, Coatiundi and Raccoon are important cultural and ecological residents. Predator Masters website identifies them as 'varmints', to be exterminated and left rotting as they did in New Mexico who told them to leave.

I attended the Sunday protest and the vast majority of drivers on the high volume road honked or gave thumbs up in support. It is clear the community is overwhelmingly opposed to indiscriminate wildlife killing and supportive of the resolution.

Sincerely,  
Candace Charvoz Frank
