Good Morning,

Agenda Item #12: Extreme Heat

I would like to remind the BoS that we live in a desert with three months out of the year that are hot and uncomfortable, and would advise the BoS to have a look at the heat trends here over the past 50 years. There is no cause for alarm, and I am not falling for the Green New Deal's climate fear propaganda.

This agenda item also states that there will be "160 days of temperatures at or above 90 degrees Fahrenheit by 2035". Can the BoS provide actual data and studies which show that? Our local tax dollars must not be used to advance centralized global governance where the "solution" to the climate "problem" is both unconstitutional and way worse for your health than the weather. The U.S. Consitution protects our ability to protect our own health. The U.N.Global Climate agenda does not.

Thank you.  
 Christine Francis
