Tom and David,

SBA and Wavelength Management are dedicated to providing a quality solution in placing a camouflaged wireless facility for the residents of San Ignacio. As per our conversation, and due to some feedback we have received with the proposed design, we feel we need to step back and request a continuance until the September meeting. This will give us more of an opportunity to research design aspects with the residents in order to provide this critical service to an underserved area. We will continue to work closely with staff as we have since January to meet the wireless needs of the community, visitors, commuters and first responders.

Respectfully,

Rob Jones
