Broad-based infrastructure improvements, facilitated by the needs of Project Blue, also make good business sense and extend far beyond just their campus footprint. Modern data centers require creative design, operational innovation and visionary partnership with the communities where they are located. Project Blue has proven to be a collaborative

Southern Arizona Leadership Council

partner with Pima County and demonstrated their commitment to sustainability and stewardship of local resources like water and energy. Project Blue's \$3.6 Billion capital investment will pay ongoing infrastructure dividends for our entire community, especially for businesses and residences in the Southeast corridor.

For these reasons, we fully support the County's efforts to rezone, sell and activate this property to the benefit of our entire Pima County community and respectfully request your vote of approval.

Thank you for your thoughtful consideration and support of this important request.

Highest regards,
