Subject: Covid and MASKS!

[REDACTED]

To whom it may concern,

I may be a little late for this to be read; however, it is important to share my concerns. I am a parent of a freshman college student, freshman high school and a 5th grader. I'm an educator myself. It simply does NOT make sense to not err on the side of caution to protect our children in schools. It boggles my mind to know that specific adult events, even the olympics, are applying more caution than our schools. It is simply selfish when each and every one of us are not doing our part to protect the most vulnerable.

Please allow the schools and states to allow the opportunity to mandate masks not only for the opportunity to keep our children medically safe but to ALSO keep them in schools as a way of preventing a variety of mental health concerns. Online schooling is NOT for everyone.

Thank you,
A Very Concerned Mother & Citizen

Absolutely DO NOT mask out kids!

SERIOUSLY

if you care about the health of our children DO NOT MANDATE MASKS!

not to mention all the ACTUAL SCIENCE about the virus being SMALLER than the mask fiber openings!!!

thank you

Voter in Maricopa County

Subject: Covid Delta and our school age children

CAUTION: This message and sender come from outside Pima County. If you did not expect this message, proceed with caution. Verify the sender's identity before performing any action, such as clicking on a link or opening an attachment.

To whom it concerns,

I am a parent, citizen and voter in Pima county with daughters at the middle school and high school levels. I coach children from ages 7-16 throughout any given school year. I have a 19 year old son who attend university at the UofA and coaches middle school basketball. All of my children have a rare blood clotting disorder that puts them at high risk for more severe Covid outcomes, and while our entire family is vaccinated I am concerned about the way the Delta Covid-19 Variant will affect them beyond what has been recorded in the normal vaccinated population. Returning to schools, sports, and coaching is a risk for everyone, not only in my household, but across all of Pima county. While our vaccination number continue to drag, and as our primary age children can still not be vaccinated, it is imperative that Pima County return to mask and distances mandates, with plans to limit capacity in public gather places as well as schools.

The last year of our lives has been torrential and filled with grief no one was prepared to face. I believe most Tucsonans and other Pima county residents want to do the right thing on behalf of others. I don't believe we all have the mindset or courage to do the right thing alone. The council is purposed with a duty to protect, guide, and support our community and its population, even against the noise and rhetoric of an opposing message that would rather see individuals put above the community at large. I explore you to vote, unanimously, to reinstate mask mandates for schools and public places. I will consider it your personal burden and responsibility should our community start losing the lives of children (who are now the most susceptible demographic to Covid and its variants) because you were unable to lead when it was the right time and thing to do.

I lend you my support and deepest encouragement for what is a difficult position to be in. And I push for you to do what is necessary on behalf of all, even if some wish to disregard their own duty to their fellow Arizonans.

Warm regards,
Patrick Heacock

Subject: Board vote on masks in schools

[REDACTED]

To whom it may concern on the board of directors.

I want to plead with you to vote against a masked mandate in schools and mandating health workers be vaccinated against covid-19.

First of all I'm against anything that is mandated to the whole population. I believe in pro-choice having the choice about what chemicals are injected into our bodies. There is precedent because of roe versus Wade that it is not legal to force a person to do something regarding their body which is against their will please uphold that and give us the choice.

Second there is plenty of evidence against mandates for masks on children in schools. Every scientist and every health care worker knows that cloth masks do not prevent covered or any other viral or bacterial transmission they are not effective The only mass that is even somewhat effective is the n95 mask studies in Denmark and Vietnam have shown that there is no difference or that actually more people got covered who wear masks than those who didn't. Cloth masks allow viruses through to infect the wearer and harbor bacteria and viruses more than not having a mask. Do your homework The science is there.

Thirdly children are not affected like adults are with covid-19. Again look at the statistics. Those under 50 years old infected with the new strain of covid is a 01% . That includes those who are vaccinated or not vaccinated. That is less than the deaths that occur from the common flu.

So again I implore you to please let the kids go to school on encumbered I am a emotional health care worker I see more damage to the children because of the fear than because of the disease itself. These children are having severe problems including suicidal ideation and committing suicide because of the mandates.

Please vote down these draconian measures and let us get back to our lives. Thank you

Dear County Supervisors:

DO NOT MASK OUR CHILDREN. Enough already with the fear and child abuse. It is the right of parents to decide what is best for their family. NOT YOU.

Sincerely,

A parent who does not need you to co-parent

Thank you for your vote for American principals! This is amazing!

Alicia Conway

On Monday, August 9, 2021, 05:18:51 PM MST, Alicia Conway <shaylasmommie@yahoo.com> wrote:

I strongly oppose any mask mandates or vaccine mandates. This is America. Students should NOT be forced to wear a mask. Parents should make their own mask choice about their child based on their individual situation. No one should be forced to get a vaccine. Again, this is an individual's choice based on their own situation.

Please stand for basic American principals. No mask mandates. No vaccine mandates.

I request that my email below be read into the record by the clerk during the meeting.

Supervisor Rex Scott:

I have more than 25 years of experience writing about protecting and promoting health in both mainstream books and magazines. **I am writing to urge you to vote no on requiring all healthcare workers to get an unproven, experimental shot that was approved for EMERGENCY USE ONLY!!!!** Your actions are ludicrous! Your health care employees who worked long hours and in 2020 were called heroes are now being threatened with their jobs if they exercise their legal and God-given right of free choice to make their own medical decisions.

First off, the premise for the emergency use authorization of the so-called COVID VACCINE is flawed because you can only have experimental use authorization if there are no therapeutics that work. That is false. COVID-19 is a coronavirus, as is the seasonal flu and the common cold. The only difference is that it didn't occur in nature, but was engineered in the Wuhan lab and released into the general public either intentionally or unintentionally. (Sadly, this research into creating a bioweapon was financed with U.S. taxpayer money led by Anthony Fauci.) That is why these therapeutics have been hidden from the American public, so this unproven mRNA injection can be forced into the veins of hard-working, trusting Americans.

As with those other viruses, there are therapeutics that work – Ivermectin, Hydroxychloroquine, Vitamin C, D & E as well as Zinc Supplements, are just a few of the proven treatments that work, along with the correct steroids administered early in the infection. The problem with those treatments is that they are inexpensive and would eliminate the need for the promoted shot (COVID vaccine) and would eliminate the media/government/health care industry narrative that this is a pandemic. The lowest death rates from COVID-19 are the poorest countries with no masking, no social distancing, limited medical care (including vaccines), but with easy access to hydroxychloroquine.

It is hard to call this a pandemic if you look at the death toll totals in the U.S. Comparing 2019 to 2020, there is NO DIFFERENCE!!! While the deaths listed as a result of COVID is listed high, COVID-19 apparently cured all deaths from other causes, making deaths from seasonal flu, other respiratory viruses, and even non-related causes such as heart attacks practically non-existent in 2020. (This is the old-fashioned shell game) Not surprisingly, the U.S. population rose from 328.24 million on July 1, 2019 to 329.88 million a year later and up to 330.66 million on December 1, 2020.

Secondly, your premise for forcing your employees to take the toxic shot or lose their job is false, as well. You stated that you are forcing the COVID shot to protect the health of your employees and patients. The premise is that if the employees take the COVID shot that this will prevent them from getting the virus and spread it to others. This is a complete lie. The creation of the shot was not to prevent transmission of the virus but to limit the adverse reactions to it, just like there is a seasonal flu shot, which this is. Whether you take the shot or not, the susceptibility to becoming ill with this engineered virus and/or spreading it to others is the same.

Therefore, it is, by definition, not a vaccine, as it doesn't stop prevent getting the virus, such as MMR or smallpox vaccine does. Also, it can't be called a vaccine because it has not been tested for three years, as is required to be called a vaccine. There have been no animal studies – you want your healthcare workers to be the guinea pigs.

Thirdly, you are not taking into account that we all have unique medical histories. Some people already have had a mild case of Covid-19 and have natural immunity and should definitely not get a vaccine, even if it were a traditional vaccine. Others are allergic to drugs or ingredients in the vaccine, and others have various medical conditions, such as autoimmune diseases and are at risk for serious medical events if they get this shot. You cannot account for all the different medical variables and should not be playing God trying to force an experimental gene therapy (not an actual vaccine) that people feel pressured to get just to keep their job. Shame on you!

Finally, there are many evidences that this "vaccine" is harmful:

1. There have been more deaths from the COVID toxic shot the first six months of 2021 than deaths from **ALL OTHER VACCINES OVER THE PAST 30 YEARS!!!**
2. On top of that, there have been countless adverse reactions, including strokes, blood clots, BELL's Palsy, brain fog, paralysis.
3. Any other experimental vaccine trial would have been ended long ago – the reason this is being pushed is sinister and political, with certainly no basis in science.

You may have been told by other sources above you to push this, but it is time for you to do the right thing and stand up against this tyranny for your constituents.

I also am writing to urge you to vote no against K-12 mask mandates. Mandates for mask wearing would violate AZ law A.R.S. § 15-342.05.

You should stay out of both of these issues. The issues of getting a vaccine and wearing a mask should be matters of personal choice. Do not have the hubris to play God with people's health, lives, and livelihoods.

Please think of your legacy! If you persist in passing these outrageous mandates, the mandates will be destroyed in court with lawsuits, and history will show — and the citizens of Pima County will always know — that you went along with a Nazi-like agenda of unwanted medical intervention and you didn't defend our American rights of free choice.

Sincerely,

Melissa Diane Smith
Pima County resident

I wrote yesterday to urge all of you to support and protect our community and most importantly our elementary school students and staff. Yet today I see you took the cowards way out and refused to issue a mask mandate in our schools. What will you say to the first child who gets sick or worse? Shame on all you!
