#34 Procurement Award. This is an unconscionable amount for promotional items. \$250,000 could be used to clean up public health hazards in encampments on public lands.

#37. COVID. This was COVID-19, and it is 2026. The emergency is long over. The disease is uncontained and endemic. The uselessness and harm of the masking, inaccurate tests, and school and business closings is painfully obvious. Sharing bad and useless data is oppressive and wasteful. How does the County propose to treat identified individuals? It has shown no signs of considering repurposed drugs or engineering advances such as UV-C light and ozone decontamination of vehicles. WHO has proven its incompetence. Tracking communicable diseases is part of public health's traditional responsibilities. How about hepatitis, syphilis and other SDIs, lice, tb, and other consequences of migration, poor sanitation, drug use, and promiscuity?
