

AGENDA MATERIAL

DATE 8/10/21 ITEM NO. RA 18

2121 S. Pantano Rd. #32
Tucson, AZ 85710
August 2, 2021

Dr. Theresa Cullen, MD
Pima County Health Department
3950 S. Country Club Road Ste. 100
Tucson, AZ 85714

Dear Dr. Cullen,

I am writing to let you know where you can stick your new mask recommendation, and any future mandates you try to impose on us. No. We will not be going back to that.

How can the citizens of Pima County take you seriously when you speak of Covid-19 and never mention the thousands upon thousands of illegal aliens streaming across the border and into our communities unrestricted.

Instead of speaking to the real problem, you imply that the blame for the rise in cases is on the unvaccinated and school-based cases. It's ridiculous and has absolutely no science or facts to back it up.

It takes some nerve to make this about the good and law abiding citizens of Pima County when it does not take a doctor to figure out, allowing and welcoming thousands of illegal aliens to freely come in is causing the spread of COVID. Cases of the delta variant are suddenly rising and you try to restrict our freedoms instead of restricting illegal aliens from entering our communities.

It's common sense, which you nor the Pima County Supervisors nor the Tucson City Council seem to possess.

For this reason, you and your recommendations will not be taken seriously.

Laura Nekolek

Mrs. Laura Nekolek

CC Pima County Supervisors
CC Tucson Mayor and City Council

Pima County Supervisors, This goes for you too. We will not comply with further mask guidelines, lockdowns or public health emergencies, so please do not even discuss it. What we need you to work on is to stop the freeflow of COVID from the border. Stop letting illegal aliens induce a pandemic. That's just obvious.
