Subject: agenda items for Dec 3

CAUTION: This message and sender come from outside Pima County. If you did not expect this message, proceed with caution. Verify the sender's identity before performing any action, such as clicking on a link or opening an attachment.

#10 Just a comment: There is no fiscal recovery for the businesses harmed or destroyed by unnecessary, counterproductive, tyrannical Covid measures. Businesses will not recover their losses; public health will not recover our trust.

#12 Please include the original contract info with the agenda item, so your constituents can see what the wait list is for "The Craycroft," the turnover time, and the cost per person for this service.

#18. The disastrous fire potential from lithium batteries is increasingly recognized. How are areas surrounding the factory to be protected? Note that the production of the raw materials is extremely costly, causes severe environmental damage, and often involves abuses of human labor. These batteries cannot make wind and solar viable sources for reliable, affordable energy. Nor are they renewable—but rather a source of vast toxic waste after their short life span. The huge foundations for wind turbines cause permanent damage to the soil and water table. The false narrative of “clean” energy will simply result in energy starvation for the vast majority of humans. Besides killing whales and wildlife and destroying farmland and landscapes.

#21,22. The CDC cannot be trusted because of its history of covering up information and censoring scientific discussion.

Thank you for your consideration.
