Dear Supervisor Christy:

I am writing you and copying the other supervisors about my concerns with Recorder Cazares-Kelly's proposed changes to in-person voting in Pima County.

According to the January 30, 2022 edition of the Green Valley News, Ms. Cazares-Kelly is proposing the following changes:

1. Reducing the number of polling places from 240 to 100. This is a reduction of over 58%. Ms. Cazares-Kelly states that this will make Election Day faster. I would suggest to you that this is numerically impossible. Assume a Pima County population of 10,000 people. If evenly distributed, that equates to 42 people in 240 locations and 100 people in 100 locations. That is an increase of 58%. I fail to see how increasing the load in fewer locations makes voting faster. Additionally, fewer locations means voters will have to travel farther to a polling location. District #4 is comprised of a significantly large older population, many with transportation issues. Fewer locations at a greater distance will decrease voter participation causing voter suppression.

2. I am concerned with the use of electronic tablets containing the voter rolls. The proposed contractor, Tenex, hosts its data on Amazon Web Services. Given the concerns rising from the

DATE 1-31-2022

KUM

2020 general election over electronic data, using Amazon Web Services appears to eliminate any checks and balances and leaves the data open open to hacking.

Voting is the bedrock of our Democratic Republic. Tampering with the system by reducing polling locations and potentially opening the voter rolls to third party companies without checks and balances weakens that process.

I respectfully request that this communication be made a part of the official record of your meeting on February 15, 2022.

Yours,

Stephen F. Ware

Subject: Electronic poll books and voting centers

Dear Pima Supervisor,
You consider electronic poll books and voting centers? More change to confound the already bewildered voter. Let's cool off things electronic having to do with voting.

Over at least the last two voting cycles, is there one voter who has not had mounting mistrust in voting, including the electronic aspects? Voting used to be straightforward. Most voters had no worries. Today, most have a lot of worries. I think you feel that in your constituents as well.

Changing any of the multitude of things to do with voting opens them up to the always present installation and startup problems. It throws the voter off. And brings on the always there sharpsters—today, the young and old sharks, the cyber-wreckers.

Vote NO. Wait a cycle or two, at least until confidence is restored. Then ease in secure changes slowly and openly.

Sincerely,
Don Clarke, Green Valley

VOTE NO on electronic poll books and voting centers

In Pima County we don't have the sophisticated cybersecurity to stop hackers from infiltrating any electronic voting mechanisms. Please vote "NO" on electronic poll books and voting centers so that we can assure election integrity in Pima County. Thank you!

VOTE NO on electronic poll books and voting centers.

If you are not aware of the political climate among voters who have become aware of fraud committed in the last election, nothing I say will influence a NO vote. However, if you would consider:

It seems to me an electronic poll book and electronic voting centers are SUBJECT TO ELECTRONIC FRAUD. What do you think? If you favor the manipulation of votes or defrauding voters, then this is a highly desirable system for you.

HOW DO YOU VERIFY ELECTRONIC RECORDS?

The State Legislature has been considering and adopting many measures to tighten up the voting procedures. One vote for one REAL adult. REALITY is the key. Current voter rolls, signature and identification verification, are the answer.

And what are you contemplating ?????????????? Further avenues to provide easy voter fraud. Really?

For the files I have emailed all the supervisors urging them to vote no on the proposal to set up 100 voting centers and e-poll books. It is a waste of money, does not support free and fair elections and is vulnerable to hacking and reduced voter participation.

Sincerely,
Gary Olson, Committeeman

I am writing all of you since this affects all districts in Pima county. Pleas VOTE NO on electronic poll books and voting centers.

I know I dont have to worry about Mr. Christy's vote, but it's going to take the majority to relaize that electronic poll books and voting centers are ripe for fraud, hacking and are the opposite of transparent as well as the opposite of tennents of the democratic republic we live in.

I hope the citizens of Pima County can count on the Supervisors to act responsibly and vote no on electronic poll books and voting centers.

Clerk of the Board

Vote No.

At the Pima County Board of Supervisors (BOS) vote to change the election structure in Pima County. VOTE NO on electronic poll booths and voting centers.

We need more voting centers to handle smaller number of voters so we can count all the paper ballots on Election Day like we used to. Verify signatures and require voter ID.

Thank you

Kathleen Splittstoesser

Subject: No, No to Electronic Poll Books-hosted by Amazon?

CAUTION: This message and sender come from outside Pima County. If you did not expect this message, proceed with caution. Verify the sender's identity before performing any action, such as clicking on a link or opening an attachment.

This is not the time to sneak in such a drastic election process change in Pima County. Pima County representatives consistently complain about voter DISENFRANCHISEMENT a change like this will likely and truly demonstrate Disenfranchisement. I did some research, the states that have opted to use portions of electronic poll books, most states are not using the full system, they were not exactly giving the system glowing reviews.

> To date Arizona politicians have yet to do ANYTHING to clean up the voter polls

The NCSL posted negatives to electronic Poll Books:

- 1) For me Same day Registration is a No Go!
- 2) there are DACA and none Citizens that have been given Arizona driver license by politicians that will be able to vote illegally
- 3) The cost to purchase and maintain,.
After 2 years of Covid that money should be spent elsewhere.
- 4) safeguards on cyber-attacks that can alter information
- 5) Disrupting the transmission of information
- 6) physical security of e-poll book equipment and the data it contains.
- 7) potential for mass malfunction of e-poll books
- 8) it is recommended that jurisdictions continue to keep paper poll book on hand
- 9) challenges of training poll workers on New Technology
- 10) AMAZON to HOST really. AMAZON has a history of being biased

DO NOT APPROVE E-POLL BOOKS in Pima County!

Dear Clerck of the Board Manriquez,

I am writing to you to express my concern about changing our voting systems by using E-Poll books and Voting Centers. Electronic voting is a dangerous proposition. Anyone who is tech savvy could potentially could potentially HACK our voting systems and change votes or even crash our systems. I would hope that you will vote NO on using E-Poll Books and Voting Centers for the purpose of voting in our elections. Thank you for your time and consideration in this most important matter.

Best Regards

Dion Heimink Sr.
