The County government should not be in the business of promoting medical treatments. The HPV vaccine is increasingly being associated with severe adverse effects. There is no evidence that it prevents cervical cancers; in fact it may increase such cancers and at an unusually young age. HPV is a sexually transmitted disease and thus results from unhealthy lifestyle choices; it is not transmissible in public settings except where unhygienic behavior such as sharing towels is promoted.

Florida Surgeon General Ladapo, with the support of 17,000 physicians, recommends against COVID-19 vaccine, and some countries have taken it off the market at least for young people.

If the liability shield that protects vaccine manufacturers and providers is breached, say because of fraud, the county could face huge liability.

BOS MEETING Feb. 20, 2024

Addendum 2. Agenda Item #1. Update Discussion - Status of Legal Asylum Seeker Program in Pima County. **SUPPORT JAN LESHER'S RECOMMENDATION.** NO county dollars should be spent on immigration activities, as the county admits this is a federal issue. YOU enabled this crisis for five years and are now also responsible for what is about to happen in Tucson, and elsewhere. What will you do with the 1150 W. Drexel building recently purchased?

Agenda Item #6: Why does Pima County need an HPV DAY? Really? Should we also have a Flu Shot Day, a Get Your Family to the Clinic Day, or a National Flu Day? This is another way to push a vaccine on (and into) all of us. To proclaim it an awareness day is absolute silliness. Don't we have better things to spend our time on?

Agenda Item #21 Get out of the vaccine-promotion business and start working on critical items for our citizens like the border invasion and fentanyl crisis.

Agenda Item #31: We are *not* in the business of promoting a vaccine that is killing and injuring thousands of people across the globe, especially children and young adults, this is an infection with a 99% survival rate. There is NO COVID emergency. Return all federal money received that has anything to do with COVID-19 funding. How many people they know that have died suddenly or been injured by the jabs.

Agenda Item #11: It is time to get back to basic budget items.

Agenda Item #12: Petition for Relief of Taxes

In Arizona, churches are exempt from property taxes unless they fail to file on time each year. In her Petition to the Pima County BoS, Mrs. Curtis, the pastor's wife, describes the hardship the church endured starting in 2019 and how the church fell into delinquency in filing for yearly exemptions. Since the hardship began, the church has been intentional and on time in filing with the Arizona Corporation Commission, believing this was all that was required in filing for tax exemption. Pima County offers a Valuation Relief Program and the church has filed paperwork to qualify. This church shows no income from property rentals, etc., and as they are a small congregation. EXERCISE compassion and either look further into the circumstances of this petition, or forgive the delinquency today, as you would have done, if you were considering a tax exemption form, after all.

Agenda Item #15: Monthly Financial Update: WE EXPECT THAT THE BOS WILL DO DUE DILIGENCE TO GET THE BUDGET UNDER CONTROL. One of the ways we suggest is to

examine all the frivolous spending, such as last meeting's agenda items for Catholic Community Services of Arizona to house "asylum seekers", provide transportation, and continue the cycle of supporting the current border invasion.

Agenda Item #18: Living Streets Alliance, Amendment No. 1 This is double-speak for authoritarian state control driven by a false climate change narrative.

Agenda Item #30: While end-of-life equipment replacement is understandable, it should not be under the pretense of carbon reduction and "sustainability" – which is increasingly merely a euphemism for state control.

Dear Supervisors,

Regarding agenda item 31, the wording is alarming. Do you really want to support the promotion of a vaccine that is killing/injuring thousands worldwide, especially kids and young adults? I initially understood the reasons behind COVID-19 vaccination support because we faced an unknown and had not received full information from the pharmaceutical companies. But now, we know better. We're not in a crisis, and this infection has a 99% survival rate. Please return all federal money that had anything to do with COVID-19 and stop further involvement.

Sincerely,
 Kathy Madsen

2/19/2024

Dear Pima BOS;

I have grave concerns about some of the agenda items that are up for discussion on Feb. 20th, 2024, and I feel a need to make my concerns known to you and the public as an Arizona resident residing in Pima county. These items are listed below.

Agenda Item #21: The Arizona Partnership for Immunization, Amendment No. 2, to provide for third party billing, extend contract term to 12/1/24 and amend contractual language, contract amount \$1,100,000.00 revenue (CTN-HD-22-71)

Agenda Item #31: Acceptance - Arizona Department of Health Services, Amendment No. 1, to provide for immunization services, extend grant term to 6/30/25, amend grant language and scope of work, \$578,734.00 (GTAM 24-51)

I would like to remind the BoS that we are *not* in the business of promoting a vaccine that is killing and injuring thousands of people across the globe, especially children and young adults, and to remind you that this is an infection with a 99% survival rate. Remember there is NO COVID emergency now. I request that you return all federal money received that has anything to do with COVID-19 funding.

Just curious, how many people do you know that have died suddenly or been injured by the jabs? How about we get out of the vaccine-promotion business and start working on critical items for our citizens like the border invasion and fentanyl crisis?

Thank you for your time and consideration,

Patti Polk

Please note for the record:

Re: Agenda Item

#6: HPV AWARENESS DAY: Are you serious? We need a day to celebrate a vaccine? What is the mission of the Board of Supervisors? Vaccines have health risks - will that be a disclaimer on the National Day? I think the BOS would be better served to look at the bigger problems that plague Tucson, how about a Fentanyl Crisis Day?

#21: This is another way to promote getting shots by promoting immunizations and "other services". Maybe the BOS should spend some time researching the health issues created by multiple shots that are not healthy. Perhaps looking at the childhood statistics such as this:

1 IN 166 HAS A TIC DISORDER
 1 IN 100 HAS EPILEPSY
 1 IN 54 HAS AUTISM
 1 IN 13 HAS A DEADLY FOOD ALLERGY
 1 IN 11 HAS ASTHMA
 1 IN 10 HAS A SPEECH DISORDER
 1 IN 10 HAS SENSORY PROCESSING DISORDER
 1 IN 9 HAS ADHD
 1 IN 5 HAS ECZEMA

FEB 20 24 10:05 PC CLK OF BD

Be an advocate for change and get out of the business of harming the children.

#31 The wording on this agenda item is particularly alarming: "to develop and support ongoing strategies to promote the immunization rates of PC children, teens and adults **with emphasis on the C-19 shot**". Has the BOS spent one single minute doing research to find out about the adverse events caused by the c-19 bio-weapon? Have they read about myocarditis and other events?

This study:

Cardiovascular complications have been identified as consequences of COVID-19 infection and COVID-19 vaccines.^{1,2} Sun et al³ showed an increase of >25% in cardiac arrest/acute coronary syndrome emergency calls in the 16- to 39-year-old population during January to May 2021, and they found a significant association with the rates of first and second vaccine doses.

Or this study:

...identified 1691 studies and, after screening for our inclusion criteria, included 14 papers that contained 28 autopsy cases. The cardiovascular system was the only organ system affected in 26 cases. In two cases, myocarditis was characterized as a consequence from multisystem inflammatory syndrome. The mean age of death was 44.4 years old. The mean and median number of days from last COVID-19 vaccination until death were 6.2 and 3 days, respectively. We established that all 28 deaths were most likely **causally linked to COVID-19 vaccination** by independent review of the clinical information presented in each paper.

THE ABOVE INFORMATION SHOULD TERRIFY YOU AS IT DOES ME. You all sit there smugly promoting this "vaccine agenda" and taking in money to promote it. YOU HAVE BLOOD ON YOUR HANDS. Instead of promoting this insanity why not go down as the BOS who act responsibly and say, until further is known you will abstain from being part of the vaccine agenda? Be the BOS who advocates for change.

#15: There are 7 items where the BoS budget is well over \$11 million dollars. We expect that the BoS will do due diligence to get the budget under control. One of the ways we suggest is to examine all the frivolous spending, such as last meeting's agenda items for Catholic Community Services of Arizona to house "asylum seekers", provide transportation, and continue the cycle of supporting the current border invasion.

Remember you are working for the people, not the other way around. Get focused on what is good for the people of Tucson. Get out of the vaccination agenda. Stop the border invasion. Do some good for a change.
