It is time to divest Pima County from Axon and any other company which traffics in surveillance infrastructure that can be snapped into a police state when the timing is right. You have lost the community trust and I have concerns about your protection of my personal rights. I know there have been public comments already on this subject so I hope you are considering all of us taxpayers. \$71 million for surveillance seems like you may be spending money without looking at the entire needs of the county. \$71 million would hire a lot of officers and that would reduce crime. When the internet doesn't work how well do these systems perform? A person that is trained will always do better.

" Our public agency is rapidly becoming ensnared by a private corporation. Soon we will be so entangled with Axon that the consequences of breaking free will be too high."
