MEMORANDUM

DATE: August 3, 2023

TO: Melissa Manriquez
Clerk of the Board

FROM: Steve Christy 
District 4 Supervisor

SUBJECT: Addendum Item

Please place the following item on the Addendum to the Agenda for the Board of Supervisors meeting of August 8, 2023.

Request for Reconsideration – District 4

A. On July 25, 2023, the Board of Supervisors took the following action:

Countywide Classification and Compensation Study

Staff recommends approval of the following recommendations:

1. The new job classifications and place employees in the appropriate new classifications;
2. Approve the new salary structures and place employees into the corresponding salary grades; and,
3. Provide \$9.5 million to bring current employees who fall below their respective new salary grade to the minimum of that salary range. Changes to go into effect no sooner than September 10, 2023.

Amended by Administrator memo dated July 19, 2023 and attached to the July 25, 2023 Agenda item:

"I recommend the Board of Supervisors:

1. Approve the new job classifications and place employees in their respective job classifications;
2. Approve the new salary structure and place employees in their respective salary grades;
3. Approve \$9.5 million of the \$14 million authorized in the FY2023 budget for salary and benefits to move all employees currently under the minimum of their respective salary grades to the minimum of those salary grades;
4. Approve any remaining monies designated in the FY2023/24 budget for salary and benefits and contingency for personnel policy changes (\$5 million) to be immediately applied towards implementation of Phase 2; and,
5. Make approvals for items 1 through 3, effective the pay period beginning September 10, 2023."

Motion by Supervisor Scott, seconded by Supervisor Heinz. Upon roll call, approved recommendations 4-0, Supervisor Bronson absent.

- B. If the motion to reconsider is approved, proceed with reconsideration of the following:

Countywide Classification and Compensation Study

Staff recommends approval of the following recommendations:

1. The new job classifications and place employees in the appropriate new classifications;
2. Approve the new salary structures and place employees into the corresponding salary grades; and,
3. Provide \$9.5 million to bring current employees who fall below their respective new salary grade to the minimum of that salary range. Changes to go into effect no sooner than September 10, 2023.

Amended by Administrator memo dated July 19, 2023 and attached to the July 25, 2023 Agenda item:

"I recommend the Board of Supervisors:

1. Approve the new job classifications and place employees in their respective job classifications;
2. Approve the new salary structure and place employees in their respective salary grades;
3. Approve \$9.5 million of the \$14 million authorized in the FY2023 budget for salary and benefits to move all employees currently under the minimum of their respective salary grades to the minimum of those salary grades;
4. Approve any remaining monies designated in the FY2023/24 budget for salary and benefits and contingency for personnel policy changes (\$5 million) to be immediately applied towards implementation of Phase 2; and,
5. Make approvals for items 1 through 3, effective the pay period beginning September 10, 2023."

Thank you.

MEMORANDUM

Date: July 19, 2023

To: The Honorable Chair and Members
Pima County Board of Supervisors

From: Jan Leshner 
County Administrator

Re: **Countywide Classification and Compensation Study – CBIZ Final Report and Human Resources Recommendations**

To both advance and modernize the County's ability to recruit, hire, and retain employees, a Classification and Compensation Study was initiated under the prior County Administrator in 2021, with a final contract signed with CBIZ Talent and Compensation Solutions (CBIZ) in June 2022. Thereafter, CBIZ began a Countywide classification and compensation study ("Study") in August 2022. The only known external compensation Study conducted previously for the County was in 2007, and at that time the analysis was limited to 147 (20%) of job classifications. Salary grades for some job classifications were adjusted; however, compression was not addressed nor were our salary structures or job classifications reviewed. Given this history, the need for a comprehensive review of County jobs and compensation practices has developed over many years, during which the County's current job architecture, salary structures, and wage benchmarking has become outdated and overly complex. The County is only one of many organizations in Arizona that are currently or have recently conducted such studies, with some of the others including the City of Tucson, Towns of Oro Valley, Marana, and Sahuarita, Santa Cruz County, and the City of Phoenix.

Unlike our competitor agencies, the County has for decades hired new employees at the minimum of the salary range, regardless of their skills, qualifications, and experience. In past efforts to try to remain competitive, various special hiring rates, and piecemeal processes have been put in place to try to offer higher wages for particular positions, resulting in inconsistent and confusing practices for determining salaries. On a frequent basis, departments that are attempting to obtain a salary higher than the minimum must go through a time-consuming process where Human Resources conducts an analysis of the Department's entry salary request to review the qualifications of a new hire in contrast to all current employees in the same classification to ensure internal pay equity, before finally obtaining approval by the County Administrator.

Of additional importance are the demographics of our current employee population, evidencing the ongoing need to actively recruit, hire, and retain employees. We currently have 6,879 employees, of which the median age is 50, and 17%, or 1,170, employees are over the age of 60. 732, or 20%, of employees currently have 20 or more years of service with the County, and 906, or 13%, have one year of service or less. Turn-over, which is reflective of an organization's recruiting, culture, compensation structure, and career progression paths, and impacts our ability to achieve business objectives is:

JUL 19 2023 09:04 PM CC BY KCF 10

Fiscal Year	Percentage Turn-Over
FY 2020/2021	19.23%
FY 2021/2022	22.45%
FY 2022/2023	21.75%

While the Great Resignation began affecting the County's turnover in May 2021, the County has continued to see an increase in separations to date. Given that the County has no current pay philosophy or best practices in place (i.e., placement in the market, hiring up to the mid-point of the salary range, pay progression after initial hire), this Study was vital to create a solid foundation of pay practices from which to build upon going forward and thereby enhance our ability to successfully recruit, hire, and retain employees. Communication concerning the Study began in May of 2021, Human Resources budget hearing and has continued to date. (Attachment 1)

The scope of the Study focused on:

- Creating a new job architecture;
- Creating a new salary structure; and,
- Determining market-based pay rates.

The Study is concluded and report finalized. (Attachment 2) For the job architecture piece, CBIZ completed this in-depth study of our positions, organizational hierarchy and potential career paths, defined a series of job architecture categories, and assigned each position and employee to those categories. For the salary structure and compensation piece, CBIZ conducted an expert external review of County salaries and matched our positions to positions in the market and developed a recommended, updated salary structure. The County chose a conservative pay philosophy of placing classifications at the 50th percentile (or middle) of the market, indicative of an organization that is competitive, but not a wage leader in the region.

Summary of Findings:

- 830 (81%) of job classifications were found to be below the market-based pay rate. (Attachment 3)
- 2,323 (33.7%) of employees' current salaries are below the minimum of their new salary grade.
- 199 (2.8%) of employees' current salaries are above the maximum of their new salary grade.
- The County went from 956 job classifications to 1,021 job classifications. (Attachment 3) While the overall number of job classifications increased, this allowed the County to better define an employee's position and duties. Many of the new job classifications stemmed from the currently existing Trades Maintenance series,

Special Staff Assistant series, or Program series job classifications, which did not identify the specific job functions an employee was performing.

- The County went from over 100 salary grades to 43 total salary grades. CBIZ created two (2) unique salary structures for:
 - County and Court employees, 26 grades; (Attachment 4 – Structure A)
 - Law Enforcement, 11 grades. (Attachment 4 - Structure B)
 - Six salary grades remain in place from the prior structure for Attorneys. (Attachment 4 – Structure C)
- Both classified and unclassified employees in identical classifications will utilize the same salary grade and the same job description, with the sole exception of 3115/Attorney, which remains for 18 current attorneys who retain their merit protection. This classification will cease through attrition as no new applicants are hired into this classification.
- The current pay grades are based on the 50th percentile of the market. Future discussions will include whether there is a need to pay specific critical classifications at a higher percentile based on the County's need to fulfill required business operations and statutory obligations.
- The market study was not a gender equity study; rather, the pay for each classification was based on the value of that specific classification in the market. For current adjustments needed to get to the minimum of the new salary grades, these adjustments will be administered uniformly. Any future adjustments will be based on criteria recommended by the County Administrator and approved by the Board.

Costing

A Total of \$9.5 million is estimated to bring current employees to the minimum of their respective new salary grades. This cost reflects:

- \$8 million for salaries;
- \$1.5 million for employee related expenses;
- \$4 million of the total cost reflects law enforcement (commission and corrections positions) adjustments.
- \$560,225 of the total cost reflects Attorney adjustments.

Next Steps:

➤ ***Placement of Employees who Currently Fall within the New Salary Structure***

If implementation of the Study is approved, Human Resources will immediately provide options for placement of current employees within their respective salary grades and the various costing options. These options will be presented to the County Administrator, who will then present a recommendation to the Board. A multi-year plan will need to be created and employee pay prioritized in the budget in order to place current employees correctly in their respective salary grades.

➤ ***Movement of Employees through the New Salary Structure***

If implementation of the Study is approved, Human Resources will begin drafting policies for determining salaries for new hires, as well as provide recommendations of how employees can progress through their respective salary grade. Both are necessary to ensure the health and accuracy of the salary structure and will have effects on the County's overall budget process going forward.

➤ ***Annually Update Salary Structures***

If the implementation of the Study is approved, Human Resources will annually review the salary structures and at least 50% of the job classifications to ensure County salaries match relevant market comparators and market data for similarly aligned positions. Employee pay adjustments should be reviewed annually and determinations for adjustments made dependent upon market conditions and available funding.

Recommendations

While the CBIZ report delineated many recommended modifications to the County's Human Resources policies and practices, two are recommended for adoption at this time:

1. Bulleted item 1 of the CBIZ report (Attachment 2, page 11) can begin immediately – ***Increase the compensation of all employees to the minimum of their respective proposed salary ranges***; and,
2. Bulleted item 4 of the CBIZ report (Attachment 2, page 11) can begin now by applying any remaining FY2023/24 funding designated for salary and benefits and contingency for personnel policy changes. – ***Adopting compression-based pay adjustments***.

The remainder of the CBIZ recommendations are policy decisions that Human Resources will bring before the Board in the form of proposed policies at a future date.

The Honorable Chair and Members, Pima County Board of Supervisors

Re: **Countywide Classification and Compensation Study – CBIZ Final Report and Human Resources Recommendations**

July 19, 2023

Page 5

I recommend the Board of Supervisors:

1. Approve the new job classifications and place employees in their respective job classifications;
2. Approve the new salary structure and place employees in their respective salary grades;
3. Approve \$9.5 million of the \$14 million authorized in the FY2023 budget for salary and benefits to move all employees currently under the minimum of their respective salary grades to the minimum of those salary grades;
4. Approve any remaining monies designated in the FY2023/24 budget for salary and benefits and contingency for personnel policy changes (\$5 million) to be immediately applied towards implementation of Phase 2; and,
5. Make approvals for items 1 through 3, effective the pay period beginning September 10, 2023.

If approved, staff will begin drafting job descriptions and provide options and costing for the correct placement of current employees within their respective salary ranges to County Administration for consideration by the Board, no later than 60 days after this initial approval. If these recommended options are approved, it is anticipated that the vast majority of employees will receive a salary adjustment by the end of Phase 2. It is primarily those employees who have already reached their correct placement in their respective salary grades, as determined by the placement options chosen by the Board that would not receive a pay adjustment during Phase 2.

MEMORANDUM

Date: September 17, 2021

To: The Honorable Chair and Members
Pima County Board of Supervisors

From: C.H. Huckelberry
County Administrator

Re: **Additional Recommendation Regarding the First Phase County Comprehensive Salary Study through a Proposed General Increase in Employee Compensation by Five Percent**

In my [memorandum](#) distributed on this subject, I made three recommendations. I would now like to propose an additional recommendation, which reads as follows:

- d) All salary adjustments for Court employees (Superior and Juvenile) are to be deferred until there is specific clarification regarding Item C above as well as how the recent salary adjustments (for the Pay Period Ending September 11, 2021) implemented by the Courts interact with this proposal.

We have been informed that as of the Pay Period Ending September 11, 2021, 319 employees out of a total of 928 Superior and Juvenile Court employees received a salary adjustment. These increases ranged from 2.5 percent to over 17 percent. To be consistent with Recommendation B, it only applies to those employees receiving less than a five percent increase, which appears to be approximately 143 employees or less than half of those who received an increase.

We will need some time to sort out this issue with Court leadership; hence, this recommendation to exclude, at this time, all Court employees from the general salary adjustment.

Board of Supervisors Memorandum

September 21, 2021

First Phase County Comprehensive Salary Study through a Proposed General Increase in Employee Compensation by Five Percent

Budget is Stable

While receiving funding from the federal and state governments to support the physical and economic response to the COVID-19 pandemic, Pima County has prudently remained fiscally conservative in the approach to spending these funds. Since the end of 2019 when we began to see COVID-19 impact our community and we became uncertain about its possible future economic impact we have ensured that "one-time money" or the money that was received for specific short term purposes, be used for such. The COVID-19 relief funds have been targeted for one-time investments or expenditures and Pima County has not used these funds for longer term efforts for which there is not an identified, sustainable funding source. The funds have, however, allowed Pima County to pay for critical public health and supporting infrastructure needs without raising taxes or significantly decreasing the available fund balance. Because of the uncertainty in our fiscal position going into this fiscal year, I did not recommend Countywide employee compensation increases at that time.

Comprehensive Salary Study Underway

As the Board is aware, Pima County has initiated a Compensation Study to fully evaluate the fairness and competitiveness of the County's compensation structure. This review is extensive and will not be finished until next year. As we assume that increases will be recommended following a review of competitive markets, a salary adjustment at this point is recommended as a timely first step towards implementation of the full study. The last comprehensive salary study was undertaken by the County in 2007; however, adjustments were only made to bring those individuals who fell below the minimum of the salary grade to the minimum; no other adjustments were made. A Request for Proposals (RFP) will be published September 17, 2021.

Recent History of Compensation Increases

The last County-wide employee compensation adjustments were ratified by the Board of Supervisors at the adoption of the Fiscal Year 2018/2019 budget at which time a 2.5 percent across the board salary adjustment was approved. In Fiscal Year 2019/2020, a 2.0 percent adjustment was adopted for all eligible employees earning more than \$45,000 per year effective with the pay period beginning September 1, 2019. A 4.0 percent adjustment was adopted for all eligible employees earning \$45,000 or less per year effective with the pay period beginning September 1, 2019. There was no compensation increase in fiscal year 2020/21 and none specifically recommended in the present fiscal year.

The Honorable Chair and Members, Pima County Board of Supervisors

Re: **First Phase County Comprehensive Salary Study through a Proposed General Increase in Employee Compensation by Five Percent**

September 21, 2021

Page 2

Certain Classifications Have Received Special Market Adjustments

- Deputies – I authorized the increase of starting deputy pay effective July 7, 2019 from \$23.50 to \$25.50 per hour, which resulted in our deputies having a starting pay that is the most competitive in the State of Arizona among counties. This action resulted in pay increases for existing deputies and decompression adjustments for those that were warranted based on adjustment of the bottom component of the pay raise.
- Corrections Officers – Similar to that of deputies, I also authorized the increase in the starting pay of corrections officers effective February 3, 2019 from \$19.50 to \$21.50 per hour resulting in our starting corrections officers being the highest paid in the State of Arizona among counties. In addition, appropriate decompression adjustments were also made to those employees requiring such.
- Public Health Nurse – Effective April 25, 2021, the public health nurse classifications all received market adjustments ranging from 2.75% to 26% or \$0.53 to \$8.73 per hour, affecting 36 employees in levels between Licensed Practical Nurses to Nurse Practitioner, Unclassified positions.
- Sheriff Non-commissioned Classifications – Recently, I approved market adjustments for 12 classifications for mostly non-commissioned personnel in the Sheriff's Department. These market adjustments ranged from 2 to 18 percent and affected 98 employees with adjustments ranging from \$0.54 to \$4.76 per hour.
- County Attorney/Public Defense Support Staff – I also authorized market adjustments for 11 county attorney and Public Defense Service support staff, with market adjustments ranging from 3 percent to over 30 percent, with one classification receiving a three percent increase. This adjustment affected 261 incumbents in either the County Attorney's Office or Public Defense Services Department and ranged from \$0.55 to \$5.46 per hour.
- Attorney's - Both the County Attorney and the Director of Public Defense Services have been working with our Human Resources Department to define a workable compensation structure for attorneys. I am hopeful that these efforts will result in positive market adjustments for attorneys and those incumbents in both the County Attorney's Office and Public Defense Services that hold classification of Attorney. Hopefully, this will be completed in the near future.

Probation Officer Funding and Salary Adjustment Excluded

Unfortunately, the County is now required to exempt probation officers (probation officers, surveillance officers and juvenile detention officers) from this general salary increase due to laws adopted by the Legislature through the General Appropriations Bill and Laws 2021,

The Honorable Chair and Members, Pima County Board of Supervisors

Re: **First Phase County Comprehensive Salary Study through a Proposed General Increase in Employee Compensation by Five Percent**

September 21, 2021

Page 3

Chapter 408, Section 51 (SB 1823). This legislation did allocate some additional funding for the State's share of probation officer salary increases for Fiscal Years 2018/2019 through 2021/2022, but the Bill also states that counties who approve probation officer salary increases in Fiscal Year 2021/22 or subsequent years, that the county will absorb any additional cost to the State (Section 51).

Previously, this had been a shared cost responsibility paid equally by the State and the County. This would simply require the County to pay the full burden of the salary increase; hence, the plan that I will provide to the Board of Supervisors will exclude probation officer increases until this provision is either repealed or clarified to ensure that the County will not bear the full cost of this salary increase and that it will continue to be a shared responsibility between the State and the County.

First Phase County Comprehensive Salary Study Implementation

Today, we know that the economic impact of the pandemic was not as devastating to the State and local governments as first anticipated and it is appropriate, given our financial position, to invest in our Pima County workforce. I have been considering options related employee compensation and am now recommending that the Board of Supervisors approve a 5 percent salary adjustment for all eligible County employees effective October 9, 2021.

The cost of this proposed salary adjustment including associated benefits for the current Fiscal Year is approximately \$15.8 million, of which \$11.1 million relates to the General Fund. Annualized, this represents approximately \$21 million, of which \$14.8 million relates to the General Fund.

The current General Fund budget includes a \$10 million allocation for Early Childhood Education, which can be absorbed by the American Rescue Plan Act funding. I recommend the remaining \$1.1 million be funded from General Fund Budget reserve. Non-General Fund departments will absorb these costs within their existing budgets. This adjustment should be considered a significant "down payment" on the ultimate cost of implementing the comprehensive salary study.

I believe this recommendation is appropriate and fiscally sustainable.

Recommendation

I recommend the Board of Supervisors authorize a general salary increase for all eligible County employees, effective October 9, 2021. The increase shall be five percent of the employee's existing salary with the following exceptions:

- a) Those employees in classifications that have received a general market adjustment since July 1, 2021;

The Honorable Chair and Members, Pima County Board of Supervisors

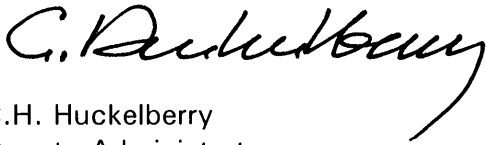

Re: **First Phase County Comprehensive Salary Study through a Proposed General Increase in Employee Compensation by Five Percent**

September 21, 2021

Page 4

- b) For those classifications who received a market adjustment of less than five percent, incumbents in those classifications will receive an increase to bring them to five percent; and
- c) All Court probation officers (probation officers, surveillance officers and juvenile detention officers) are excluded from this salary adjustment due to State Legislation transferring the entire burden of the salary adjustment to the County taxpayers.

Sincerely,

C.H. Huckelberry
County Administrator

MEMORANDUM

Date: June 21, 2022

To: The Honorable Chair and Members
Pima County Board of Supervisors
Presiding Judge, Superior Court
Elected Officials
Appointing Authorities

From: Jan Leshner 
County Administrator

Re: **Classification and Compensation Study to Begin in July 2022**

In order to meet new opportunities and challenges, ensure continuous improvement, and provide top quality service, we must ensure that our compensation accurately reflects the market. To that end, we have engaged CBIZ Talent and Compensation Solutions to assist us in a study of job classifications and associated compensation. The focus of this study will be to develop a classification and compensation system that will support our goal of retaining and recruiting the best individuals to ensure the continued growth and success of Pima County.

The results of this study will strengthen our ability to categorize our jobs and analyze what and how our competitors pay for similar skills, duties and responsibilities. It will establish processes that value jobs and employees within Pima County based on each job and employee's contribution to our organizational objectives. Our goals for the new compensation system are that it:

- Is internally fair within Pima County;
- Reflects current market conditions and competitiveness with comparable organizations;
- Allows the County to maintain and promote career paths and a performance-oriented culture; and
- Provides us with flexibility to continue to respond to economic and organizational changes.

Employees may wonder if this project will affect them personally. The mostly likely outcome is that the pay range associated with a job will change. This does not necessarily mean that individuals will receive pay changes. We will be reviewing each department and position to make those determinations, and we will be in touch with you and your department head if

The Honorable Chair and Members, Pima County Board of Supervisors
Presiding Judge, Superior Court
Elected Officials
Appointing Authorities
Re: Classification and Compensation Study to Begin in July 2022
June 21, 2022
Page 2

changes are recommended for your position. We can assure you that there will be no pay decreases through this exercise.

In the next few weeks, employees will be receiving an email asking them to complete an online Job Analysis Questionnaire (JAQ). The JAQ is a survey designed to gather job-specific details. Please begin planning with your staff how to complete these surveys if the employee does not have access to a computer as all JAQs must be submitted electronically. The employee will have two weeks to complete the JAQ, and supervisors will have one to two weeks to review them prior to submission. More information will follow.

With kick-off of the project starting next week with Human Resources, CBIZ expects the compensation and classification study to last approximately 8 months. Please contact the Human Resources Department if you have any questions.

CLASSIFICATION AND COMPENSATION STUDY

EMPLOYEE ANNOUNCEMENT

Pima County has engaged CBIZ Compensation Consulting to assist us in a study of our current compensation and classifications of jobs. The results of the project will help us analyze what competitors pay for similar skills and responsibilities and will create an updated compensation system. Our goals for the new compensation system are that it:

- Is competitive with comparable organizations;
- Is fair within Pima County;
- Allows Pima County to maintain and promote a performance-oriented culture; and
- Provides Pima County with flexibility to continue to respond to economic and organizational changes.

We need your help to get an accurate description of your current job.

Towards the end of July, you will receive an email sent to your work address as identified in ADP, from noreply@gemailserver.com, which will contain instructions on how to participate in an online Job Analysis Questionnaire (JAQ). The JAQ is a structured process to gather job-specific details from job incumbents. This is a critical step and your opportunity to ensure that Human Resources and CBIZ have a clear understanding of the work you perform.

Please ensure that your work email is accurate in the ADP System by July 15.

It is understandable that many employees might wonder how this project will affect them. The mostly likely outcome is that the pay range associated with a job will change. This does not necessarily mean that individuals will receive pay changes. We will be reviewing each position to make those determinations, and we will be in touch with you and your Appointing Authority if changes are recommended for your position. We can assure you that **there will be no pay decreases in pay** due to the Classification and Compensation Study.

Human Resources will provide additional FAQs and instructions to assist in completion of the JAQ in the next few weeks, prior to receiving the link to complete the JAQ.

We thank you in advance for your support of this process. If you have questions, please contact your Appointing Authority or Human Resources at HRCompClass@pima.gov.

CLASSIFICATION AND COMPENSATION STUDY

SUPERVISORS

We have engaged CBIZ Compensation Consulting to assist us in a study of our current compensation and classifications of jobs. The results of the project will help us analyze what competitors pay for similar skills and responsibilities and will create an updated compensation system. Our goals for the new compensation system are that it:

- Is competitive with comparable organizations;
- Is fair within Pima County;
- Allows Pima County to maintain and promote a performance-oriented culture; and,
- Provides Pima County with flexibility to continue to respond to economic and organizational changes.

To support the process, all employees will need to complete an online Job Analysis Questionnaire (JAQ), which will be **sent to their work email address identified in ADP**, for purposes of gathering job-specific details from job incumbents. Please also see the Classification and Compensation Study Announcement for Employees posted on the Classification and Compensation intranet site for additional information.

Once a JAQ is submitted by an employee, the employee's supervisor will be notified via email, and is **required** to conduct a supervisor review. At this stage, the supervisor has the opportunity to comment on the JAQ submitted by the employee. Supervisors will receive a separate notice for each of their employees.

To complete the supervisor review, please advance through the employee responses. There will be opportunities within each section to provide a supervisor response if any employee responses are lacking, incorrect, or misleading.

It is important to note that in this process **we are looking to gain information about the job, not employee performance**. Therefore, when providing comments, please keep them related to job characteristics and avoid references to the value or experience of specific employees.

The JAQ will launch later in July and stay open for two weeks. Supervisors will then have 10 calendar days to complete their review. More on exact dates to follow.

We thank you in advance for your support of this process. If you have questions, please contact your Appointing Authority or Human Resources at HRClassComp@pima.gov.

MEMORANDUM

Date: September 29, 2022

To: The Honorable Chair and Members
Pima County Board of Supervisors

From: Jan Leshner 
County Administrator

Re: **Countywide Compensation Study – Update**

In June 2022, the County engaged CBIZ Talent and Compensation Solutions (CBIZ) to assist us in a study of job classifications and associated compensation. On August 11, 2022, CBIZ sent all employees a Job Analysis Questionnaire (JAQ) at their work email address as listed in ADP. The JAQ was an internet-based questionnaire that asked every employee to provide their input regarding the job purpose, duties, required qualifications and requirements of their particular County position. Due to Election activity, both the Recorder's and Elections Departments, were permitted a later date to submit and complete JAQs. In total, CBIZ sent 6,367 JAQs to employees and CBIZ reports a return rate of 84% of completed JAQs. Additionally, CBIZ sent all JAQs to the employee's immediate supervisor for review. The JAQ submission and the supervisor review process concluded on Monday, September 19, 2022.

Over the next several weeks, CBIZ will be reviewing the information gathered to analyze our jobs in comparison to our competitors for similar skills and responsibilities to design Pima County's job architecture and create an updated compensation system. As they progress through identifying the appropriate job architecture, they will begin benchmarking the positions to market comparators. Projected timelines indicate that reviewing, organizing, and classifying our jobs will take until roughly mid-December, with a projected timeline of collecting relevant market data by mid-January, 2023. Human Resources will provide more information to employees regarding next steps on its website at [Classification and Compensation \(pima.gov\)](https://www.pima.gov/classification-and-compensation).

Upon completion of these processes, CBIZ will provide Human Resources the initial compensation study results for a quality review. After the quality review, CBIZ will provide a final report, which is currently projected for February 2023; however, that timeline is dependent upon completion of the Human Resources quality review. Upon receipt of the final report, County Administration will provide an update to the Board of Supervisors concerning next steps.

MEMORANDUM

Date: March 2, 2023

To: The Honorable Chair and Members
Pima County Board of Supervisors

From: Jan Leshor 
County Administrator

Re: **Countywide Compensation Study – Update**

In 2021, the Board of Supervisors approved an outside consultant contract to conduct a County-wide compensation study. This need had arisen over many years, during which the County's old job architecture (i.e. hierarchy of jobs within the organization) and salary structure had become outdated and overly complex, leading to redundant classifications, outdated job requirements, a lack of transparency in career pathing, and in many cases lower than average pay rates. The information provided to County leaders and the Board through this study will support decisions on these matters going forward.

Scope of Study

The County engaged CBIZ Talent and Compensation Solutions (CBIZ) to assist us in the study which is focused on:

- Creating a new job architecture framework that will align employees into specific job classifications, within job families, and identify career pathways for employees;
- Creating a new salary structure, by taking our current 69 regular grades and combining them with our various "letter" grades (e.g. B, C, D, E, F, G, L, M, P, and R grades) to create an approximately 30 grade system; and,
- Conducting an expert external review of County salaries, with market-based benchmarked pay rates for all positions.

From the information gained from the Job Analysis Questionnaires (JAQs) submitted by a large majority of employees in August 2022, CBIZ has provided Human Resources with substantial data to include the potential job architecture, career pathways, proposed salary grades, and benchmark data for our new classifications. In determining the market rate for our classifications, CBIZ was directed by Human Resources with input from County Administration to place our classifications at the 50th percentile (or middle) of the market, which reflects that half of our comparator agencies pay less and half of our comparator agencies pay more for the benchmarked classifications. Benchmarking salaries at the 50th percentile is a conservative pay philosophy, indicative of an organization that is competitive, but not a wage leader in the region.

On January 27, 2023, CBIZ provided Human Resources the initial compensation study results for a quality review. This review is a complex process that is critical to ensure that a new job architecture and compensation structure is appropriate to the unique needs of our organization and will not cause unintended consequences for employees or the County when implemented. Upon completion of the quality review, CBIZ will provide a final report, in which County Administration will provide an update to the Board of Supervisors concerning next steps and recommendations. Timing of the final report is dependent upon completion of Human Resources quality review, which is currently being conducted and expected to take 30 days, with a follow-up review by a selected Committee and then Department Heads.

Preliminary Findings

From a high overview of the preliminary data received, it suggests that those classifications at the lower end of the salary range are in line with market rate; however, as salaries for classifications increase, those classifications begin to fall under the market rate and continue to fall as the salaries increase. This is reflective of the tiered adjustments given to employees over previous years where lower paid classifications were increased at a higher percentage than higher paying classifications. This practice enabled the Board to ensure that those individuals in lower paying salary ranges remained market competitive and was successful for that purpose.

There is an additional matter of compression of employees within the first quartile of salary ranges, which is reflective of our historical practices of primarily hiring applicants at the salary range minimum, regardless of past experience and qualifications, as well as the inability for movement through the salary range. To prevent these historical practices from negatively affecting the new salary structure, upon adoption of recommended changes, it will be necessary to implement both a new policy on determining entry salaries and a pay for performance management system for uniform use by all Departments.

The preliminary report also indicated that our current job architecture does not properly describe the range of jobs actually being performed in the County. Based on the JAQs received by CBIZ, it was evident that several current “catch-all” job classifications such as Program Coordinator or Project Manager have been used over the years to fill many distinct jobs. This has resulted in the organization not having easily obtained data on all jobs being performed and contributing added complexity to determining appropriate wages for employees in these classifications. CBIZ provided suggestions on many new job classifications that would more accurately describe these jobs and be a basis for future wage benchmarking.

Items for Determination

After Human Resources quality review and determination that the classifications, salary ranges, and market rates is accurate, the County will need to make decisions that involve the following:

1. When/How to move Employees to their new job titles;
2. When/How to move Employees to the new salary grades and the resulting costs;
3. Where to place current Employees within the salary range and the resulting costs; and
4. How Employees will move through the range in the future.

Job Titles

Currently, the County has roughly 700 job classifications. Initial data provides that CBIZ has identified roughly 1,200 job classifications. Human Resources will work with CBIZ to further refine the job classifications and reduce the overall number of classification titles for recommendation to County Administration.

Placing Employees who Fall Below the Minimum of the New Salary Structure

In order to effectively use the new salary structure, all employees must be placed into the new salary structure. A preliminary review of the data suggests that a minimum of \$6.7 million is needed to get employees onto the new salary structure, with resulting pay at the minimum of the salary grade. Roughly 30% of current classifications have been found to be below the market rate. While this is the projected minimum cost, this cost *only reflects* the classifications identified as below market; it is not reflective of how these classifications affect other classifications in the same job family of the affected classification (i.e. supervisory classifications), which may require adjustments to a higher salary grade for the other classifications, nor does it reflect the additional benefit costs associated with higher salaries. Additionally, Human Resources needs to continue its review of the 1,000+ classifications to determine that all classifications have been placed in the correct salary grade. Since titles of job classifications have changed, it must ensure that the new job classifications are in the correct hierarchical order and therefore the appropriate salary grade. Any incorrect slotting of classifications would result in a higher cost to move employees onto the new salary structure. Therefore, the \$6.7 million is a very conservative cost and a more realistic estimate may be \$9 million of salary increases only. When benefits costs are included, approximately \$2.5 million, the total needed for this activity is approximately \$11.5 million. We have currently earmarked \$11 million within our current budget estimate.

Placing Employees who Currently Fall within the New Salary Structure

Once all employees have been placed onto the new salary grades, current employees' placement within the salary range must be determined. Human Resources will provide options for placement of current employees upon the receipt of CBIZ's final analysis and report. Human Resources does not yet have a cost estimate for this step.

Moving Employees through the New Salary Structure

Upon the new job architecture and salary structure being implemented, Human Resources will present drafts/revisions to policies for approval by the Board of Supervisors. These policies will provide how new hire salary is determined and a pay for performance management proposal. Both are necessary to ensure the health and accuracy of the salary structure and will have effects on the County's overall budget process going forward.

Conclusion

To provide for the initial implementation of the plan delineated above, I am including the following in the draft budget for Fiscal Year 2023/24 for future consideration by the Board of Supervisors:

- \$11.5 million towards moving employees who fall below the new salary grade minimums into the new salary grade at the minimum salary of that grade; and
- an additional \$2.5 million in contingency to be used towards the adjustments needed to move current employees to the correct place within the salary range once the method of placement is approved by the Board of Supervisors.

EXECUTIVE SUMMARY

CBIZ Compensation Consulting (“CBIZ”) was engaged by Pima County (“The County” or “Pima”) to conduct a compensation study for its employees, including a review of current compensation practices and an update of the compensation plan.

To assist Pima in implementing a compensation system that considers both market and internal factors, CBIZ matched Pima’s positions to positions in the market, developed updated salary structures, and calculated the cost of implementing the recommendations.

The remainder of this report will explain the methodology and expand on this summary to clearly document the comprehensive approach taken to analyze Pima’s current compensation practices and develop its compensation plan.

OBJECTIVE AND SCOPE OF THE STUDY

The objective of the compensation study is to provide the County with a plan that:

- Enhances the ability to attract, retain, and motivate qualified individuals;
- Establishes structures that are flexible to meet changing needs; and
- Is well-aligned with broader goals and strategies.

The scope of the study included:

A competitive market analysis of base salary and total cash compensation;

Development of a salary structure;

Reconciliation of actual compensation with market-competitive compensation;

Calculation of plan implementation costs; and

Overall recommendations.

METHODOLOGY

Compensation Definitions

Base Salary: the annual fixed rate that an individual is paid for performing a job.

Total Cash Compensation: the sum of base salary and annual incentive compensation payments from variable pay programs.

Data Points:

- 25th percentile: the value in an array that falls at the first quarter of the sampled data (75% of the values in the sample are greater than the 25th percentile value).
- 50th percentile: the value in an array that falls in the middle or median of the sampled data (half of the values in the sample fall above this value and half fall below it). This is the data point of reference for the proposed pay grade assignments.
- 75th percentile: the value in an array that falls at the third quarter of the sampled data (25% of the values in the sample are greater than the 75th percentile value).

Compa-ratio: the employee's current salary divided by a market comparison point, which is usually the market 50th percentile. An employee whose salary equals the 50th percentile of the market has a compa-ratio of 100%. A compa-ratio of less than 100% indicates that the employee's salary is less than the 50th percentile of the market, and a compa-ratio greater than 100% indicates that the employee's salary is greater than the 50th percentile of the market.

Range Penetration: the employee's current salary minus the salary grade minimum salary divided by the difference of the salary grade maximum and minimum. An employee whose range penetration equals 50% is paid at the midpoint of the salary grade range, 0% is equal to the salary grade minimum and 100% is equal to the salary grade maximum.

Market Pricing

Competitive Market Analysis

According to a recent WorldatWork survey of market pricing practices, most organizations (approximately 85%) utilize a compensation philosophy that strives to compensate employees at the median of the competitive labor market. Median pay is the point at which half of the employers pay more and half pay less.

Based on CBIZ's discussions with Pima, it intends to be competitive with its level of pay, which generally corresponds to setting the pay structure at the market median. The labor market influences described below were considered for the jobs included in the scope of the study.

Labor Market Influences

The three most important labor market characteristics are the size of an organization, geographic scope, and industries from which Pima recruits talent. Because surveys focus on different market characteristics (e.g., some focus on size, others focus on geography or industry), CBIZ determined each characteristic as it relates to each position before conducting the market analysis, as follows:

Size of Organization

A key factor to be considered in determining the market-competitive compensation, particularly for senior management positions, is the size of an organization. While compensation for many positions is based primarily upon location, industry, job tasks, and responsibilities, compensation for upper-level positions is also significantly affected by the size of the organization. CBIZ considered size factors such as a revenue of \$1.65 billion and 6489 full-time equivalent employees.

Geographic Influence

Many jobs in an organization are recruited locally. Professional jobs may be recruited statewide or regionally. Because individuals who work in senior management positions often relocate solely to accept a new job, national searches are commonly conducted for these positions. In contrast, lower-paid salaried employees seldom relocate primarily based on a job. To accurately reflect this marketplace characteristic, the survey data must be comprised of participants who reflect the geographic scope of the position in question. Too narrow or broad a market area scope either does not consider all necessary factors or introduces irrelevant factors.

However, when considering senior management positions, it is most reasonable to geographically adjust the data to the higher of the local or national market. This is because organizations in locations that have greater comparative salaries will provide higher salaries to employees. In addition, the higher (local) rates would be required to compensate an employee moving from an area with a lower cost of living. Conversely, although executives are often recruited on a national basis, in practical application executives rarely are open to reductions in pay, even if they are moving to a lower-cost area.

CBIZ primarily utilized data specific to Arizona, which is expected to be the primary market for recruiting employees under the scope of the analysis.

Industry Influence

Industry is the final key consideration for matching jobs to the market. Some jobs only exist within a certain industry and are most accurately priced to that industry exclusively. Conversely, some jobs are found in all industries, and the true market for these jobs usually considers this broader market. For example, most clerical jobs can be found in any organization. For this reason, CBIZ focused on Public sector and Government Support Services organizations or the broader labor market, as appropriate.

Salary Surveys

The first step in ascertaining the competitiveness of compensation was to determine what competitors pay for jobs comparable to those at Pima. CBIZ used its proprietary survey database that aggregates data from hundreds of valid and reliable published salary surveys and includes specific data based on geographic area, size of organization, years of experience, and industry. CBIZ used a database that compiles multiple salary sources because:

- They provide a richer and more complete view of the market.
- Survey sources may focus on different market characteristics to define market peers.
- They allow Pima to define peers and peer relationships more closely than is possible using any single survey source.
- Multiple sources allow for statistical validation of the collected data.

Aging Data

Survey data must be adjusted to account for market pay movement between the time of publication and when the data are to be used. For example, a survey may have been conducted to report salaries effective as of September 1, 2022. To market-price the jobs at Pima as of July 1, 2023, CBIZ had to age the survey data ten months. In addition, different surveys have different publication dates, and they must be aged to a common point in time. Put simply, aging the data provides up-to-date salary data and allows for an "apples to apples" comparison of survey data.

All salary data were aged to reflect estimated market pay as of July 1, 2023. Data were aged using a factor of 5.1%, which reflects the 12-month increase in compensation as reported by the Bureau of Labor Statistic's *Employment Cost Index*.

Job Matching

CBIZ reviewed the content of job analysis questionnaires and each job description provided and searched the salary survey job descriptions to find the best possible match. When a valid match was found, the corresponding salary survey market data were recorded. CBIZ recorded the 25th, 50th, and 75th percentiles for both base salary and total cash compensation.

COMPENSATION STUDY RESULTS

Market Analysis

Exhibit 1A in the Final Compensation Study Results file depicts the trendline for actual base salaries compared to market 50th percentile base salary for Pima County and Courts (excluding Law Enforcement). Exhibit 1B in the Final Compensation Study Results file depicts the trendline for actual base salaries compared to market 50th percentile base salary for Law Enforcement.

Salary Structure Development

A critical element of the compensation plan is the salary structure. The salary structure is a compensation framework comprised of multiple grades, each of which has an associated salary range. The salary structure groups jobs with similar market values and/or internal equity into the same grade. The salary structure ensures that each employee receives a salary that is reasonable given their assigned grade and corresponding salary range.

CBIZ developed two unique salary structures, one for the County and Courts and the other for Law Enforcement, which will provide a system for slotting all jobs and allow for future growth. Exhibit 2A in the Final Compensation Study Results file shows the salary structure for Pima County and Courts (Excluding Law Enforcement). Exhibit 2B in the Final Compensation Study Results file shows the salary structure for Law Enforcement. Exhibit 2C in the Final Compensation Study Results file shows the salary structure for the Attorneys. Exhibit 3A in the Final Compensation Study Results file provides a list of Pima County and Courts (excluding Law Enforcement) positions sorted by grade. Exhibit 3B in the Final Compensation Study Results file provides a list of Law Enforcement positions sorted by grade. Exhibit 3C in the Final Compensation Study Results file provides a list of Attorney positions sorted by grade.

In the proposed salary structure, the salary grade midpoint is designed to approximate the market median for each job. CBIZ slotted each position into a grade in the structure based on the grade midpoint that most closely corresponds to the market 50th percentile. The final grade classification considered other factors based on the internal equity feedback received from Pima.

SAMPLE			
Job Title:	Job XYZ		
Market Median:	\$35,455		
Salary Grade	Minimum	Midpoint	Maximum
1	\$24,778	\$30,972	\$37,166
2	\$27,398	\$35,618	\$43,837
3	\$31,508	\$40,960	\$50,413

Salary Analysis

Exhibits 4A – 4F in the Final Compensation Study Results file provide a graphical depiction of employee range penetration at the 50th percentile. Exhibits 4A and 4B provides the graphical depiction for Structure A, Pima County and Courts (excluding Law Enforcement). Exhibits 4C and 4D are for those assigned to Structure B, Law Enforcement. Exhibits 4E and 4F are for those assigned to Structure C, Attorneys.

COMPENSATION STUDY SUMMARY OF FINDINGS

- Pima's average base salary compa-ratio is 90.8%. This indicates that on average base pay is approximately 9.2% below the salary range midpoint.
 - The average base salary compa-ratio for Pima County and Courts (Excluding Law Enforcement) is 90.7%. This indicates that on average base pay is approximately 9.3% below the salary range midpoint.
 - The average base salary compa-ratio for Law Enforcement is 91.8%. This indicates that on average base pay is approximately 8.2% below the salary range midpoints.
 - The average base salary compa-ratio for Attorneys is 88.0%. This indicates that on average base pay is approximately 12.0% below the salary range midpoints.

COMPENSATION STUDY RECOMMENDATIONS

- Increase the compensation of all employees to the minimum of their respective proposed salary ranges. The range minimum represents the level at which entry-level pay can be considered market competitive.
- Temporarily freeze pay for employees above the maximum of their respective proposed grade. The pay freeze should remain in place until the point at which the range maximum surpasses actual pay.
- Implementation of the compensation plan should occur uniformly across all positions. While different implementation scenarios may recognize budget constraints, partial or sporadic implementation can result in pay equity issues.
- Consider adopting compression-based pay adjustments. This will help to ensure that employee compensation is commensurate with experience and performance. It will also allow for enhanced flexibility to onboard new employees without creating pay inequities.
- Consider implementing a merit matrix tool (or concept) to reward performance. The merit matrix is a tool that rewards employees based on performance while accelerating pay to market-competitive levels.
- Annually update structures and evaluate annual employee pay increases based on market pay trends. In order to reduce the administrative burden associated with both, CBIZ will provide annual recommendations for structure updates and salary increase budgets for five years after the study.
- Conduct a comprehensive market review every three to five years to ensure that the ranges remain market competitive.
