Item #22

The Climate Action Plan is not science-based, but purely political to achieve globalist aims of weakening and impoverishing the US. It is known that atmospheric CO2 was MUCH higher in geologic time. It did NOT cause runaway global warming. Where did it all go? To limestone and to ocean sediments as marine organisms with calcified shells died. Earth is at a near-starvation level of this essential life-giving gas. There is NO consensus of scientists believing in catastrophic human-caused climate change. There is no chance that Pima County can affect global climate. It can just impoverish and immiserate its citizens, especially the middle class. Yes, it gets hot here, and people need A/C, which is increasingly expensive.

If we really believed in emissions reductions, the data center would be a non-starter, and if we believed in protecting the environment, short-lived, unreliable, toxic-waste producing bird and bat killers (wind turbines) and desert habitat covering solar "farms" would not be permitted.
