Subject: Re: memo on unvaccinated employees and in person meetings

Could someone on the board or a medical "expert " please explain the science behind the latest discriminatory memo regarding unvaccinated employees and in person meetings? The CDC itself has admitted the vaccines don't stop people from getting or transmitting the virus. The latest stats show 90% of the county employees cases are vaccinated. So why continue to ostracize unvaccinated employees? It is money? Punishment? I think the people of Pima County deserve to have the board spend it's time and resources more efficiently than coming up with new ways to harass unvaccinated employees . I eagerly await your response.

Dear Pima County Board of Supervisors,

A fundamental quality of Public Health is its preventative nature. Counties are the core providers of health care services and public health programs in local communities. The Pima County Board of Supervisors is responsible for steering public policy and providing direction to the County Manager.

I am asking the Pima County Board of Supervisors to remember their duty to ensure safe communities and protect public health by supporting the County Manager's request to support local school districts who choose to require face coverings.

I implore you to fulfill your duty to protect Public Health!

Together We Can #EndCovid
#WeNotMe

Additional Thoughts

The Pima BOS should be the leader in public health initiatives in the county. Please be the leader that we need to navigate out of this crisis. You have the bully pulpit to make things better so use it please!

David Helgevold

Subject: Vax concerns

Mr. Huckleberry, and board members;

My name is Charles Long, I'm certain you have no idea who I might be, I work for you, at Pima County Waste Water, utility 2, and have recently taken a position, (Feb 2021), with the CCTV Crew, and hope to promote into a lead position in the foreseeable future.
But I 'm one of the unvaccinated "would be criminals"

I feel as if I need to tell a bit of a back story, so as to give you an idea, of who I have worked hard to become

Born Boise Id, in 64' to a US Marine, and his Beauty School drop out wife, they did their level best to raise my brother and I with integrity, Honestly, family values, and a love for the country we live in, therefore as soon as I graduated High school, at age 17, I enlisted in the military, to enhance my higher education (real world) I rose up through the ranks, to Sgt/E-5p inside of my second year, in 1990 and 91 participated in a tour of combat (Desert Shield / Storm) ...I did this because, I believe with out folks that are willing to serve, to protect our country, from not only an enemy abroad, but on the soil of the United States, to protect our ideals laid out in our constitution, also from tyrants and those who would take our freedoms and liberties , this brings me to the reason I'm composing this note.

It is my belief that you people are violating not only my right to choose what's best for me, but my civil rights guaranteed in the constitution of the United States, would you go this far ,if someone decided to ingest the morning after pill on occasion and you were privy to that choice . Would you deny someone the same available insurance if that person had a family history of heart disease... no because that's illegal. You are also stifling any opportunity that may present it self, as to my advancement in my employment , simply for my choice.

The science you stand on is confusing at best, as a mater of fact there is no data or statistics available to the validity of our Immun systems to fight this virus. I have contracted the virus and survived on my own with no doctor visit, and no expense incurred to insurance. So ... I've made a thoughtful investigative choice, not to get an experimental vaccine, and now being punished and chastised for that choice.

I work for compensation \$ from you , not your guidance in life choices, you are meddling in my personal life, I've managed to reach 57 years old without the Pima county board of supervisors help, thanks anyway.

Do you recall someone else in our history that forced their will on certain people, a war was started because of that tyranny... now we can add the Pima county board to the list of entitled and tyrannical people who think their way is best for all, to force their views on the general population. Yes I understand you board members believe you are helping and this is about health and science, "that's what you've been told"; I however disagree, "this ladies and gents is political... please don't think I'm anti vax, Not at all, get vaccinated if you are so inclined, I am however a proponent of responsible

Subject: New online courses

We have been harassed, bullied, segregated, discriminated against, and forced to give up personal medical information and now the county has the gall to "teach" us about ethics and HIPAA rules? Pima County must be trying their hand at comedy.
