

COVID-19 Outbreak Response –

Updated April 8, 2020

EOC Objectives and Points of Incident Command Emphasis

- Finalize plan for infection of response staff by Wednesday, April 8th
- Develop and implement an ordering, receiving, and distribution plan for all materials and affected entities, including PPE by Friday, April 10th
- Develop and implement staffing resource tool by Friday, April 10th
- Identify a process (recruitment, training, placement) for medical volunteers by Friday, April 10th
- Assess non-emergent transportation capacity by Friday, April 10th
- Maintain support of Pima County testing capability
- Coordinate with health care system leadership for local surge strategy
- Provide for the safety of responders, health care providers, and the community by following established safety protocols, by conducting risk management assessments, and by establishing regular communications with cooperators.
- Provide relevant and/or critical information to cooperators in a timely manner to allow for safe and efficient operations
- Provide information to the public and media as it becomes available throughout the day, including critical notifications as necessary
- Create a recovery process that aligns with the multiple local, state, national disaster declarations

Stakeholder Coordination and Guidance

- The Health Department and other key County departments have been engaged with partners from across Pima County as part of this response:
 - Stakeholder Engagement Meeting
 - State Conference Call
 - State JIC Call
 - AZ DEMA COVID19 Update
 - Pima County Hospital Brief
 - State SNS Call
 - AzCHER-South
- Guidance Documents:
 - Ending isolation guidance (*approved*)
 - Guidance for health care works exposed to COVID-19 (*approved*)
 - Guidance for shelters (*approved*)
 - Health care and first responders post-exposure guidance (*approved*)

Logistics Update

Logistics continues to receive and track requests as they come in. The Warehouse team distributed to 48 agencies today, mainly multiple gallons of hand sanitizer and surgical masks from an order that had been received on 4/7/2020. We will push another round of hand sanitizer distribution on 4/9/2020.

Requests as of 1400 today:

4/8/2020	Agencies Requesting	Number of Items Requested	Delivered this week	Number of Distributed Items	Shortfall

APR 09 2020 08:09 P00 K1F R0

58 offers to donate PPE have been logged to date. 34 donations have been received resulting in:

- 40 isolation gowns
- 110,350 gloves
- 4,470 N95 masks
- 2,750 surgical/face masks
- 2,981 safety glasses/goggles/eye shields
- 164 handmade masks
- two gallons of isopropyl alcohol
- 22 tubs of disinfectant wipes
- 143 completed face shields
- 78 3D printed visors
- 31 straplocks for face shields
- 64 plastic face shields
- 12 paper towel rolls
- 11 disposable shoe covers
- Other miscellaneous medical equipment
 - 3 nasal cannula/O2 tubing
 - 5 nebulizer kits
 - 18 sterile pads
 - 2 BP monitors
 - 1 blood glucose monitor

- 6 CPAP tubing
- 6 airfit p10 pillows
- 1 Phillips water chamber
- 3 packages of gauze
- 13 face/nasal face masks
- 21 electrodes
- 36,000 finger cots

A video conference call was held today (4/8) with 20 community members who have been participating in the DIY face shield process in Pima County. The call allowed the group to share resources for materials, discuss what designs they're using, and have any questions answered. The group will continue to meet and discuss face shields.

Donations have been received at 10 out of 19 fire stations since the sites became live on 4/4/20. Donations will be picked up every Monday and Thursday from all 19 sites unless fire stations report they did not receive any new donations.

Volunteer Services

- ESAR-VHP registrations
 - Pima County: 50 Volunteers accepted, researching 10
 - Pima County Health Department: 103 accepted, 8 rejected, 1 researching

Social Media Monitoring Report

What the public is talking about:

- Overall support for Gov. Ducey's out-of-state restrictions
 - o Some think there needs to be a way to enforce this like no airline flights, border crossing checks, etc.
- City of Tucson form to report people violating Gov. Ducey's executive order is popular
- People are pushing for disclosure of locations of positive cases to help contain the spread
 - o Ironically, these comments have gotten worse since Dr. Bob's video explaining why it's misleading to do this.
- More questions about overall testing. People find it hard to believe there's still a limited supply as compared to other parts of the country/state.
