Good evening Supervisors,

Storing data in the "cloud" may be a great convenience but at what cost?

You plan to spend up to 7 million dollars for a third-party company to house data. Information stored in the "cloud" is vulnerable. There are so many stories out there of data breaches and hacks with information stored in the "cloud". Even Tucson Unified School District's information was hacked.

My question to you is this: Why would you spend up to 7 million dollars of our taxpayer money to do something that the county can do themselves for WAY less and with much more security???

I urge each one of you to vote NO on agenda item #26: Master Agreement No. MA-PO-23-209, Microsoft Corporation (Headquarters: Redmond, WA), to provide for a Microsoft master services agreement.

Thank you for your time and consideration, Terra Radliff
