* = Mandatory, information must be provided

or Procurement Director Award: ☐

***Contractor/Vendor Name/Grantor (DBA):**

Arizona Department of Health Services (ADHS)

***Project Title/Description:**

Oral Health Dental Sealant Services

***Purpose:**

The purpose of this grant is to reduce dental decay among children using a school-based strategy. The revenue received depends upon the number of services provided. This Dental Sealant IGA enables PCHD to provide dental sealants and fluoride treatments to children in Pima County schools where 50% or more of the children qualify for the free and reduced school meal program. As part of this initiative, all eligible children (with parental consent) who are in kindergarten, second or sixth grade receive a dental screening, dental sealants, and fluoride treatment as needed. This funding covers both under- and uninsured children enrolled in eligible and participating schools.

Amendment #2 provides a new price sheet for the remainder of the term. The biggest change is the addition of monthly amount for Oral Health Consultation. (Such services were previously funded through a First Things First grant, which ended last fiscal year.)

***Procurement Method:**

This IGA is a non-procurement contract and not subject to procurement rules.

***Program Goals/Predicted Outcomes:**

The objectives of this program include:

- Reduce dental decay in primary and permanent teeth in children;
- Provide dental sealants and fluoride applications to children at moderate to high risk.
- Monitor the oral health status of children;
- Assist families in obtaining dental care for their child(ren);
- Provide educational training for children, teachers, parents, and health professionals; and
- Deliver oral health consultation by a Subject Matter Expert.

***Public Benefit:**

This program addresses oral health disparities in under-served populations. Findings from scientific studies show that dental sealant programs prevent tooth decay and also stop cavities from developing. A Surgeon General's report on oral health indicates that sealants can reduce decay in school children by more than 70 percent. Poor dental health can lead to pain, infection and tooth loss resulting in poor school attendance, low self-esteem, and difficulty with speaking and eating. Services specified by the Dental Sealant IGA are provided in Amphitheater, Flowing Wells, Marana, Tucson and Sunnyside Unified School Districts. Without funding, the Health Department would not have the capacity to provide dental sealant, fluoride, or Silver Diamine Fluoride (SDF) treatments and many more under insured and uninsured children would have limited access to preventive dental health services.

***Metrics Available to Measure Performance:**

- # of dental screenings and sealant placement for children in 2nd or 6th grade
- # of dental screenings and fluoride applications for children in kindergarten
- # of children receiving SDF treatments

***Retroactive:**

No. The IGA says it will be effective upon final signature.
