Agenda Item #9: Pima County Climate Action Update.

Greetings,

The climate has been changing for millions of years. Sometimes there's an ice age and at other times the world is entering a warming period. Sadly, you are ignorant and not educated in the most basic scientific basics. A changing climate does not make it an emergency.

Why is the Pima County Climate Action plan constantly being updated? Is the County planning to implement United Nation's developmental goals to the detriment of the USA? The climate narrative is NOT about "saving the environment!" It's simply away to propagandize people into accepting increasing control and oversight of the United Nations, like your fear-mongering and unscientific promotion of the clot shots. In 1991, the UN published The First Global Revolution. A COMMUNIST plan to take over the World. It was the precursor for their UNSCIENTIFIC Agenda 2030 Sustainable Development Goals.

More than 1,900 scientists and researchers have declared that THERE IS NO CLIMATE EMERGENCY! World Climate Declaration There is no climate emergency Among the scientists and researchers that signed the World Climate Declaration are two Nobel laureates, Professor John F. Clausner (USA) and Professor Ivar Giaever (Norway/USA) who said the World should focus more on science and less on political science! <https://clintel.org/world-climate-declaration/>

People should not have to suffer from your apparent indoctrination by the United Nation tyrants that have heavily invested in the so-called Green New Deal. Your bizarre allegiance to foreign nations and your obvious hate towards the USA has been noted. Reminder, you all have sworn an oath of office to support the Constitution of the United States and the Constitution and laws of the state of Arizona and defend the U.S. and Arizona against all enemies, foreign and domestic, and that you will faithfully and impartially discharge the duties of your office.

DEC 16 2024 08:53 PM
RM

Why then are you rejecting your duty to faithfully adhere to US laws and to protect US rights and sovereignty? Reminder, per USC article 4 section 4 it is TREASON to aid and abet a foreign nation in the overthrow of the USA, whether it be by unscientific climate action, or by sponsoring the invasion of foreigners into our country. You are hereby put on notice.

I do not consent, and I reject a manufactured climate plot!
We are to own nothing, but we are supposed to be happy about that.
NO, I do not consent to this scam.

Gisela Aaron

Pima County resident

These are the facts stated by the 1,961 scientist and researchers:

Scientists should openly address uncertainties and exaggerations in their predictions of global warming, while politicians should dispassionately count the real costs as well as the imagined benefits of their policy measures.

Natural as well as anthropogenic factors cause warming

The geological archive reveals that Earth's climate has varied as long as the planet has existed, with natural cold and warm phases. The Little Ice Age ended as recently as 1850. Therefore, it is no surprise that we now are experiencing a period of warming.

Warming is far slower than predicted

The world has warmed significantly less than predicted by IPCC on the basis of modeled anthropogenic forcing. The gap between the real world and the modeled world tells us that we are far from understanding climate change.

Climate policy relies on inadequate models

*Climate models have many shortcomings and are not remotely plausible as global policy tools. They blow up the effect of greenhouse gases such as CO₂. In addition, they ignore the fact that **enriching the atmosphere with CO₂ is beneficial**. [evidenced in green houses]*

CO₂ is plant food, the basis of all life on Earth

*CO₂ is not a pollutant. It is essential to all life on Earth. Photosynthesis is a blessing. More CO₂ is beneficial for nature, greening the Earth: additional CO₂ in the air has promoted growth in global plant biomass. It is also **good for agriculture, increasing the yields of crops worldwide**.*

Global warming has not increased natural disasters

There is no statistical evidence that global warming is intensifying hurricanes, floods, droughts and such like natural disasters, or making them more frequent. However,

there is ample evidence that CO₂-mitigation measures are as damaging as they are costly.

Climate policy must respect scientific and economic realities

*There is no climate emergency. Therefore, there is no cause for panic and alarm. **We strongly oppose the harmful and unrealistic net-zero CO₂ policy proposed for 2050.** If better approaches emerge, and they certainly will, we have ample time to reflect and re-adapt. The aim of global policy should be 'prosperity for all' by providing reliable and affordable energy at all times.*
