

MEMORANDUM

Date: January 23, 2023

To: The Honorable Chair and Members
Pima County Board of Supervisors

From: Jan Leshar *Jan Leshar*
County Administrator

Re: **Additional Information for Board of Supervisors January 10, 2023 Meeting, Agenda Item No. 9 – Related to the Floodprone Land Acquisition Program**

At the January 10, 2023 Board of Supervisors meeting, Supervisor Steve Christy asked questions regarding the contract to acquire the Catalina Foothills Adult Care facility. Supervisor Christy asked whether Floodprone Land Acquisition Program (FLAP) parcels routinely come to the Board of Supervisors, and if it is appropriate for the County to request an appraiser to make certain assumptions about flood damage. Below is information in response to these questions.

1. Is it typical for Floodprone Land Acquisition Program parcels to be approved by the Board?

In accordance with Pima County Procurement rules, the Board of Supervisors, acting as the Flood Control District Board, is required to approve FLAP acquisitions for the following: 1) Acquisitions with a total acquisition value of \$250,000 or more; and 2) Acquisitions where the Regional Flood Control District's (RFCD) proposed offer is greater than 25 percent of the appraised value.

Prior to the acquisition of the Catalina Adult Care facility, Pima County had acquired 83 FLAP properties since January 2018 (Attachment). Of these 83 acquisitions, five have gone to the Board for approval. All five Board approved acquisitions were due to the acquisition value being greater than \$250,000.

Three of the five Board approved acquisitions were vacant parcels. Two of them were large parcels, one being 131 acres along the Agua Verde Creek and the other 136 acres adjacent to Canoa Ranch. The third vacant parcel was nine acres that provided a critical hydrologic and riparian connection between the West Branch of the Santa Cruz and Enchanted Hills Wash.

Two of the five Board approved acquisitions were residential properties with improvements. RFCD has removed, or intends to remove, the structures on these two properties. RFCD also intends to remove the Catalina Foothills Adult Care facility structure to allow the property to remain as open space and to accommodate future flooding.

2. Is it appropriate to request an appraiser to make assumptions about flood damage?

The FLAP is an award-winning program that began in 1983 after the historic 1983 flood. The goal of FLAP is to remove people from flood hazards and reduce the need for emergency

JAN 23 2023 10:46 AM

The Honorable Chair and Members, Pima County Board of Supervisors
Re: **Additional Information for Board of Supervisors January 10, 2023 Meeting, Agenda
Item No. 9 – Related to the Floodprone Land Acquisition Program**

responders to rescue people trapped in their homes by floodwaters. A crucial and primary goal of this program is to acquire lands from people who have been impacted by their homes being flooded. In doing so, RFCD must work to address their primary concern, which is the loss of their home, and assure owners that they will be able to purchase another residence.

Appraising the property using the hypothetical condition as undamaged from flooding and subtracting any insurance claims received, results in an acquisition value that facilitates their move to a less hazardous area and achieves our primary goal of protecting Pima County residents. The use of a hypothetical condition conforms with the guidelines of the Uniform Standards of Professional Appraisal Practice, as long as the hypothetical condition is explicitly clear to the intended users of the appraisal report.

RFCD has used this appraisal practice in response to other large-scale flooding events. After the Aspen Fire in 2003, residents of Catalina who lived along the Cañada del Oro Wash were impacted by recurrent flooding during the 2003 monsoon. Using this hypothetical condition appraisal practice, the RFCD successfully acquired 75 of the 80 properties, significantly reducing the risk to public safety and to the emergency responders. These lands and subsequent acquisitions are now part of the Catalina Regional Park.

RFCD employed this same hypothetical condition appraisal practice to acquire a number of flood-damaged properties along Rincon Creek and in Sabino Canyon in 2006.
