**Hello!**

Please do not rehire Dr. Theresa Cullen to be the director of the Pima County Health Department. She failed the residents of Pima County by shutting down businesses, churches, schools, and it was very difficult to get medication to fight the Covid-19 Virus. When she finally opened the Pima County economy; some of the businesses did not come back. The mask and vaccine mandates were not effective because many of us got Covid anyway. Most of all, our young Grandchildren were a year behind in their studies when in-person school finally opened up, and they were forced to wear masks even though they already had Covid. Hospitals were a mess; they refused to give the proper medication to Covid patients, and many died, further, some died of something else but were listed from Covid. When my husband and I got the Covid Virus last year and yes, even after taking the Vaccines, we were not able to get Ivermectin through our doctor and pharmacy but were able to by-pass Dr. Cullen's mandate and get it anyway. I am 70 years old with chronic lung disease, and I miraculously survived. We figured if Ivermectin is good for our horses, then it is good for humans, too. Ivermectin literally has no side effects, and we both recovered within 5 days.

**Thank you,  
Filis Cardieri**
