Dear Friends and Colleagues,  
I'm forwarding this to you in case you live in Pima County and want to weigh in. Frankly, even if you don't live in Arizona, what every community does to mitigate the spread of COVID matters to every other community... so by all means, feel free to chime in as well! Details below.  
Thank you, and stay safe,  
David

**SENT ON BEHALF OF SUP. MATT HEINZ, DISTRICT 2**

**URGENT: COUNTYWIDE INDOOR MASK MANDATE – ACTION NEEDED**

Dear Fellow Pima County Residents,

This Tuesday, December 21, I'm asking my colleagues on the Pima County Board of Supervisors to issue a county-wide INDOOR mask mandate – to take effect immediately and last through February 28, 2022, pending hospitalization rates and future action of the Board. This is an urgently needed, and commonsense, public health response to the rapidly increasing transmissibility of COVID-19 in our community as Delta continues to surge and the Omicron variant takes hold.

Our hospitals already are at capacity due to the Delta variant. Available ICU beds *countywide* range from a handful to zero on a given day. Emergency Rooms are filling up. Medically necessary procedures for non-COVID patients, such as heart bypass surgeries and others, are being delayed because our hospitals are

DEC 21 10 15 10 AM '21

operating at their limits, placing additional lives at risk for both COVID and non-COVID patients alike. And now Omicron is here.

Additionally, If the County does not adopt this urgently needed measure now, we can assume that local businesses will suffer greatly through the holiday season and into the new year, as people simply choose to stay home rather than take the risk of being around others when not everyone is masked.

It is absolutely time for us to take further action as the Pima County Board of Supervisors – the elected leaders entrusted to ensure the public health and safety of our community.

**If you agree with me, please write my colleagues on the Board of Supervisors and urge them to join me in voting for this countywide indoor mask mandate, by e-mailing COB\_mail@pima.gov today.** Give your own reasons why you support this commonsense and prudent measure. Your comments will be distributed to all members of the Board and will be included in the meeting materials. Please share this email with others who care, as well.

Previous experience has shown that opponents of this simple and effective mitigation measure, while a minority, will be very loud. We need Supervisors to know that the majority of our community takes public health and the threats of this virus seriously, and supports a mask mandate now.

Thank you for your attention and help in getting this passed.

Sincerely,

Matt

**David R. Higuera**

Chief of Staff

Dr. Matt Heinz, Supervisor, District 2

Pima County Board of Supervisors

Pima County supervisors...show us the actual scientific studies( the legitimate ones) that actually show anything you have done, including masking and vaccinations has altered the course of this virus yet.

There are hundreds and hundreds of athletes currently vaccinated that are testing positive. So why the push for vaccinations? We masked for two years, how this this helped? In fact epidemiologists suggested at the start of this pandemic that 800,000 plus people would have complications from covid and that is exactly what has happened regardless of what you have done.

So now you are going back to your playbook from The past and applying it yet again and thinking it will have a different outcome.

It is not up to your board to force people to get a vaccination they may not need. There are some unintended side effects that people may not want to deal with. They don't slow the spread!

You are basing your mask mandates on studies based on rhino/flu virus and not necessarily the corona virus...you know that the corona virus is small enough to evade all masks. But you know that already. This is all about control.

The only benefit from this pandemic is now we are aware of the type of people who are making our policies. We need to pay more attention to people we vote for and their actual qualifications. You dont get to make policy for all of us just to make yourselves feel like you are doing something. We are wise to this after over 2 years. Stop...enough already!! What is the definition of insanity? Doing the Same thing over and over and expecting a different result.

Hmmmm. Very concerned citizen. Wendy smotherman.

I ask that the Pima county board of supervisors vote NO on a mandatory indoor business masking policy. I also ask you to vote NO on a participation pass (vaccination passport).

This goes against our rights and freedoms and we as citizens do not want to be mandated in this way.

Hello,

I can't believe we are still debating this! Please do not institute a mask mandate for public businesses and schools. There are many legitimate reasons why some cannot wear masks. Especially in regards to children! Masks have proven to cause an increase in physical, mental and emotional issues for children. As a parent we should have the right to decide if masks are needed or not. Besides this, Governor Ducey created a law HB 2770 which this would directly break. I do not condone breaking a law if you disagree with it and I'm appalled this is being discussed! You represent your constituents and we vote NO!!

The American Institute of Economic Research:

#### The Dangers of Masks

we ..... refer here to another looming concern and this is the potential danger of the chlorine, polyester, and microplastic components of the face masks (surgical principally but any of the mass-produced masks) that have become part of our daily lives due to the Covid-19 pandemic. We hope those with persuasive power in the government will listen to this plea. We hope that the necessary decisions will be made to reduce the risk to our populations.

Emergent reports, albeit nascent and anecdotal but nevertheless vitally important (and will be clarified and defined in time) regarding the manufacture of masks, where, "many of them (face masks) are made of polyester, so you have a microplastic problem...many of the face masks would contain polyester with chlorine compounds...if I have the mask in front of my face, then of course I inhale the microplastic directly and these substances are much more toxic than if you swallow them, as they get directly into the nervous system."

There are also reports of toxic mould, fungi, and bacteria that can pose a significant threat to the immune system by potentially weakening it. Of particular concern to us is the recent report of breathing in synthetic fibers in the face masks. This is of serious concern. "Loose particulate was seen on each type of mask. Also, tight and loose fibers were seen on each type of mask. If every foreign particle and every fiber in every facemask is always secure and not detachable by airflow, then there should be no risk of inhalation of such particles and fibers. However, if even a small portion of mask fibers is detachable by inspiratory airflow, or if there is debris in mask manufacture or packaging or handling, then there is the possibility of not only entry of foreign material to the airways, but also entry to deep lung tissue, and potential pathological consequences of foreign bodies in the lungs."

Reports are that "Graphene is a strong, very thin material that is used in fabrication, but it can be harmful to lungs when inhaled and can cause long-term health problems." We argue that there is a risk of potential 'future' inflammatory/fibrotic lung diseases because we are inhaling these materials in the masks now for over one year with more duration to come and no end in sight. These substances might also be highly carcinogenic. Not just for us as adults but we must be very concerned about the risks especially to our children since they depend on us as mentors and guides for their decision-making. It is our children that we are very concerned for.

These blue surgical masks pervade our lives. "Health Canada has issued a warning about blue and gray disposable face masks, which contain an asbestos-like substance associated with "early pulmonary toxicity."

The warning is specific to potentially toxic masks distributed within schools and daycares across Quebec. Health Canada (and full praise to them)...“discovered during a preliminary risk assessment that the masks contain microscopic graphene particles that, when inhaled, could cause severe lung damage.”

Reports are that “for a while now, some daycare educators had expressed suspicion about the masks, which were causing children to feel as though they were swallowing cat hair while wearing them. We now know that instead of cat hair, children were inhaling the equivalent of asbestos all day long.” It appears to be a substance known as graphene. What is indeed alarming is that “the SNN200642 masks that were being used all across Canada in school classrooms had never been tested for safety or effectiveness.” This is indeed a catastrophic failure by the regulators as these surgical face masks are linked to early pulmonary toxicity.

What is indeed frightening is that all of these blue and similar surgical face masks cause plastic fiber inhalation and the outcomes could be devastating, especially to our children. These plastics will degrade very slowly over time and as such, in the lungs it may remain and just build up to dangerous levels. We do not even know what is an ‘acceptable’ level, for there should be none, zero! There is debate that the immune system can attack such foreign objects, thus driving prolonged inflammation which may lead to diseases such as cancer. And reused masks which pervade our daily lives, and based on our personal experiences, do produce more loosened fibers. Dr. Richard Urso showed us just how dangerous these are by putting them under a microscope, revealing the melt-blown polypropylene plastic. Some masks even contain fiberglass and this is very dangerous as we know to inhale. We as parents make these decisions, we have to step back and question many of these decisions we are making that seem suboptimal. If it does not seem right, then you have to push back and question and demand the science, demand the data from these seemingly untethered experts.

We caution you on the safety of these face masks especially since the science also has revealed the ineffectiveness of mask mandates and the masks themselves, as currently used. We are parents and citizens alike, and you and we only seek to inform, share, prognosticate. You must be informed fully for informed decision-making. We also cannot discount the possible harms on our immune systems and general health from such constant and prolonged use of masks, given that we have never done this before.

We are in uncharted territory and especially so with the possible implications for our children. Their immune systems are still being developed and we are forcing lockdowns, school closures, and masking on a developing child and we have no prior experience on the subsequent outcomes pertaining to children’s development, health, and well-being. These are matters too important to nonchalantly disregard. The consequences could be catastrophic and lifelong, especially for our children.

I am against any new mask mandates for Pima County, they have not made that much difference in the past and we are exhausted with these mandates. People are tired of dealing with this back and forth mandating, we have to find ways to live with this virus and stop disrupting our lives every time a politician wants to change things up. This sort of behavior, constantly pushing the fear button is destroying peoples lives, we have had enough.

You will subjecting Pima County Residents to harm by forcing them to wear masks!

**Is a Mask That Covers the Mouth and Nose Free from Undesirable Side Effects in Everyday Use and Free of Potential Hazards?**

**Abstract**

Many countries introduced the requirement to wear masks in public spaces for containing SARS-CoV-2 making it commonplace in 2020. Up until now, there has been no comprehensive investigation as to the adverse health effects masks can cause. The aim was to find, test, evaluate and compile scientifically proven related side effects of wearing masks. For a quantitative evaluation, 44 mostly experimental studies were referenced, and for a substantive evaluation, 65 publications were found. The literature revealed relevant adverse effects of masks in numerous disciplines. **In this paper, we refer to the psychological and physical deterioration as well as multiple symptoms described because of their consistent, recurrent and uniform presentation from different disciplines as a Mask-Induced Exhaustion Syndrome (MIES).** We objectified evaluation evidenced changes in respiratory physiology of mask wearers with significant correlation of O<sub>2</sub> drop and fatigue ( $p < 0.05$ ), a clustered co-occurrence of respiratory impairment and O<sub>2</sub> drop (67%), N95 mask and CO<sub>2</sub> rise (82%), N95 mask and O<sub>2</sub> drop (72%), N95 mask and headache (60%), respiratory impairment and temperature rise (88%), but also temperature rise and moisture (100%) under the masks. Extended mask-wearing by the general population could lead to relevant effects and consequences in many medical fields.

Cloth masks do not work. How can a mask with a 5 - 50% efficiency be effective?

Factors influencing the filtration performance of homemade face masks

The outbreak of the COVID-19 pandemic is causing a shortage of personal protective equipment (PPE) across the world. As a public health response to control the pandemic, wearing homemade face coverings has been proven as a resort to protect both the wearer and others from droplets and aerosols transmission. Although aerosols and droplets can be removed through these non-medical materials with a series of filtration mechanisms, their filtration performances have not been evaluated in detail. Moreover, many factors, such as the fabric properties and the method of usage, also affect filtration performance. In this study, the size-dependent filtration performances of non-medical materials as candidates for face coverings were evaluated comprehensively. The flow resistance across these filter materials, an indicator of breathability, was also examined. The effect of materials properties, washing and drying cycles, and triboelectric effect on particle filtration was also studied. **Results showed that the filtration efficiency varied considerably from 5–50% among fabrics materials due to the material properties, such as density and microscopic structure of the materials.**

Pima County Board of Supervisors,

University of Oxford Professor Jim Naismith recently spoke on the subject of masks and admitted, using data, that masks are pointless.

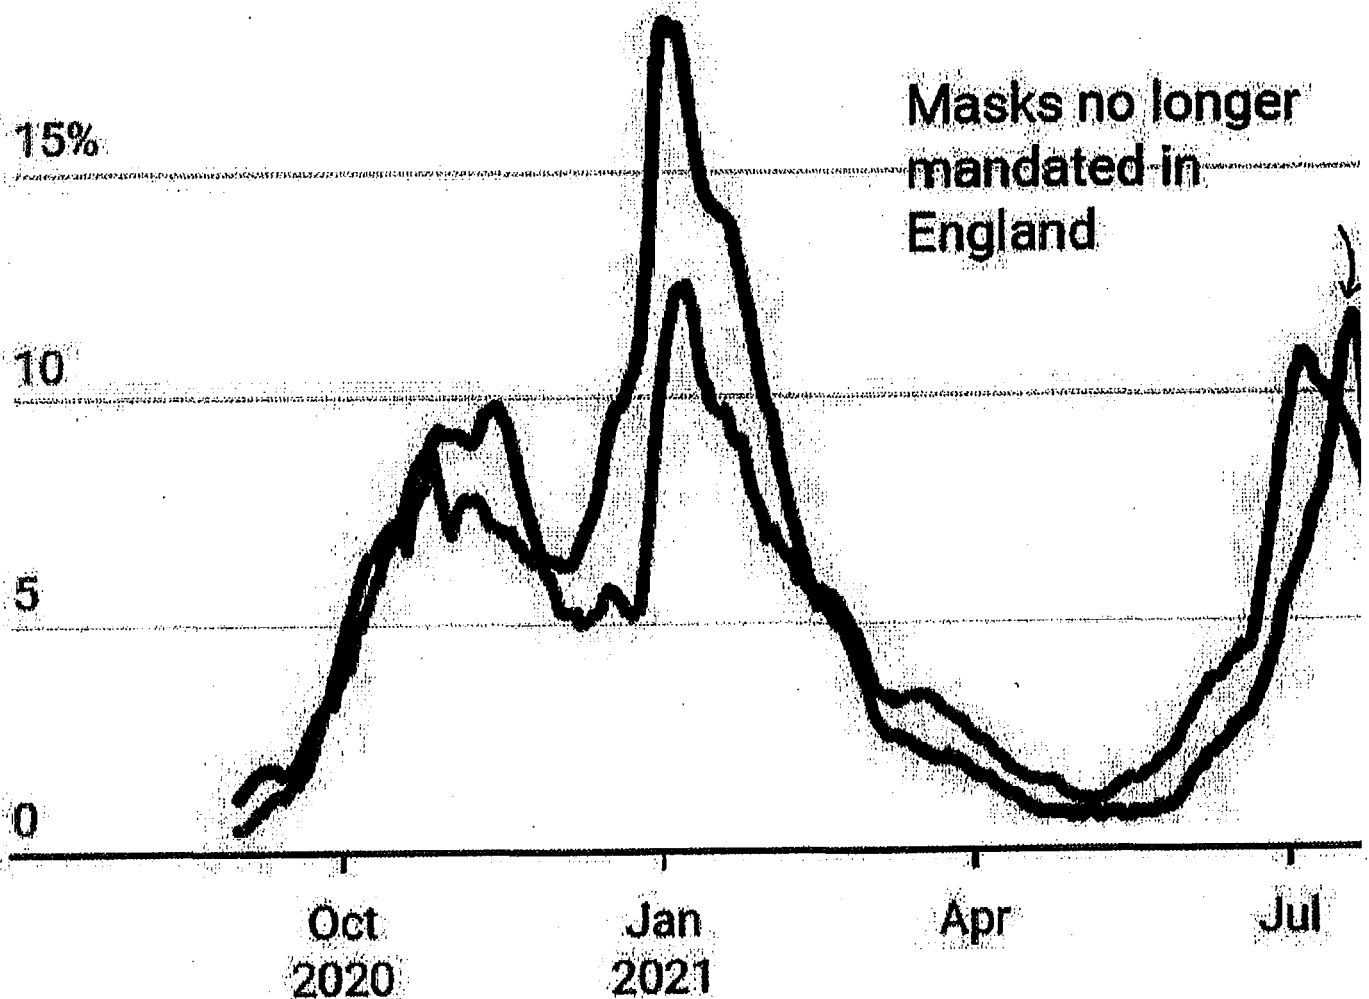

Naismith used the data that was collected from England and Scotland to prove the importance of masks. Back in July, England decided to do away with their mask mandate while Scotland continued to enforce the mandate. But now, after months of research, the data shows that the mask "has made no meaningful difference" when it comes to infection rates.

DEC 20 2021 10:27:00 PM PST

26

## Proportion of people who received a PCR test in the previous 14 days who had at least one positive result

— England — Scotland

*Positive test results are by specimen date*

*Figures to 24 Nov, published 29 Nov. Updated daily, with a five day lag*

Chart: The Spectator (qV28l) • Source: [coronavirus.data.gov.uk](https://coronavirus.data.gov.uk) / Scottish Government  
• Created with Datawrapper

Although Scotland believed it would help stop the spread of COVID-19 to keep the mask mandate, the graph, which is shown above, proves that their infection rates were similar and in some cases higher than England.

Writing about the findings, Naismith, who is also the Director of the Rosalind Franklin Institute, noted, "The ONS survey results on prevalence shows that the Scottish and English approach to masking, although formally different since July, has made no meaningful difference to Delta." The Professor added, "In both countries very high levels of prevalence have continued for months. Thus the new changes announced are unlikely to have much of an impact if Omicron does indeed spread rapidly."

The findings presented by Naismith are also shared with the UK government SAGE adviser Dr. Colin Axon, who classified masks to be nothing more than "comfort blankets".

"The small sizes are not easily understood but an imperfect analogy would be to imagine marbles fired at builders' scaffolding, some might hit a pole and rebound, but obviously most will fly through."

Pima County Board of Supervisors,

Cloth masks are of little use against COVID-19, according to a recently published analysis.

A trio of researchers pored over the studies often cited by the officials and found they were poorly designed and offered scant evidence supporting mask usage.

Many of the studies are observational, opening them up to confounding variables, the researchers said in their analysis, which was published on Nov. 8 by the Cato Institute.

Of 16 randomized controlled trials comparing mask effectiveness to controls with no masks, 14 failed to find a statistically significant benefit, the researchers said. And of 16 quantitative meta-analyses, half showed weak evidence of mask effectiveness while the others were "were equivocal or critical as to whether evidence supports a public recommendation of masks," they added.

"The biggest takeaway is that more than 100 years of attempts to prove that masks are beneficial has produced a large volume of mostly low-quality evidence that has generally failed to demonstrate their value in most settings," Dr. Jonathan Darrow, an assistant professor of medicine at Harvard Medical School, told The Epoch Times in an email.

Due to the COVID-19 pandemic, policymakers cannot wait for higher-quality evidence to support masking, but from an ethical standpoint, they should "refrain from portraying the evidence as stronger than it actually is," the researchers concluded.

**Subject:** No unconstitutional mandates

CAUTION: This message and sender come from outside Pima County. If you did not expect this message, proceed with caution. Verify the sender's identity before performing any action, such as clicking on a link or opening an attachment.

I am a full time resident of Oro Valley and I am NOT in support of any mask mandates or vaccine mandates for Pima county businesses. These mandates are unconstitutional and go against the freedom of choice we have preserved in our state and country.

Dr Heinz should return to medical school as he has forgotten how viruses behave. There is a group of 16,000 physicians and medical experts, even articles in the Lancet, that do not support vaccines or masks. The American Frontline Drs have preventative treatments and treatments like Ivermectin etc that have been used successfully in treating this flu-like virus. Courts have ordered hospitals to administer Ivermectin and patients have recovered. He is spreading fear. He is using a hospital protocol made up by Pharmaceutical companies for their own profits at the expense of people's lives. My parents and I have lived in Tucson for decades and the hospitals are always full this time of year. And that was with a full staff. And how many hospitalized patients have been vaccinated? We never hear that number.

I am tired of the lies and corruption going on about this virus. The annual flu shot is a mixture of 3 variants every year, hoping they pick the correct variants. The annual flu vaccine has an efficacy of 39% and has been that way for many years and we did not have mandates. Viruses weaken when they mutate. Natural immunity is better than a vaccine. One shoe does not fit all. Dr Heinz is not my physician and he is not the physician for every AZ resident. People are being safer than they ever were before, which is good because some people are at a higher risk, but that has always been the case every flu season.

Our Governor is right and its a choice whether people want to be vaccinated or not.

I do NOT support Dr Heinz or any mandates!

Thank you.  
Kathleen Hilgendorf

CAUTION: This message and sender come from outside Pima County. If you did not expect this message, proceed with caution. Verify the sender's identity before performing any action, such as clicking on a link or opening an attachment.

### Pima County BOS - Resolution 2021-87

Dear Board Members, I'm writing to ask that the Pima County Board of Supervisors adopt the county-wide mask mandate for indoor public spaces as outlined in Resolution 2021-87.

It is proven that masking indoors decreases COVID-19 transmission rates [1]. It is, at most, an inconvenience that the community can quickly implement to keep businesses and schools humming along. There is no chance of vaccinating our way out of this variant.

Teachers and parents in Pima County schools with mask-optional policies have experienced unprecedented stress and anxiety. We have spent the past twenty weeks dealing with exposure quarantines and classroom closures. A county-wide mask mandate would provide some bare minimum mitigation in some Pima County schools.

The correlation between school districts with mask-optional policies and school districts with employee and substitute shortages shows a solid cause-and-effect relationship. Superintendents of mask-optional school districts have previously disclosed that they do not want help from the county, and clearly, they need help retaining employees and to keep children safe.

The implication of not following public health policy of multi-layer mitigation strategies has placed the burden on already-taxed parents and teachers stressed to the max. Parents of children with medically fragile children cannot be guaranteed that schools can keep their children safe. Ultimately, parents have no option but to withdraw their children from public school and begin homeschooling.

With the first case of Omicron detected on November 27th in the UK, today, the UK reported 90,000 cases. Pima County is still experiencing high community transmission with Delta, and the Omicron variant was just identified in Pima County this week. The concern is that the transmission rate of Omicron can easily overwhelm the hospital system. With Omicron R naught value estimated to be 3-4 times higher than Delta, we must be proactive in dampening the spread.

Preliminary data shows that twice vaccinated and boosted offers the best protection against

Omicron. However, monoclonal antibodies and the Regeneron antibody cocktail are ineffective against the Omicron variant, and the Sotrovimab monoclonal antibody is in short supply.

Pima County Supervisors have the opportunity to be proactive in slowing the spread of Omicron, preventing the healthcare system from being overwhelmed, and keeping our community safe.

### Pima County BOS - Resolution 2021-87

Dear Board Members, I'm writing to ask that the Pima County Board of Supervisors adopt the county-wide mask mandate for indoor public spaces as outlined in Resolution 2021-87.

It is proven that masking indoors decreases COVID-19 transmission rates [1]. It is, at most, an inconvenience that the community can quickly implement to keep businesses and schools humming along. There is no chance of vaccinating our way out of this variant.

Teachers and parents in Pima County schools with mask-optional policies have experienced unprecedented stress and anxiety. We have spent the past twenty weeks dealing with exposure quarantines and classroom closures. A county-wide mask mandate would provide some bare minimum mitigation in some Pima County schools.

The correlation between school districts with mask-optional policies and school districts with employee and substitute shortages shows a solid cause-and-effect relationship. Superintendents of mask-optional school districts have previously disclosed that they do not want help from the county, and clearly, they need help retaining employees and to keep children safe.

The implication of not following public health policy of multi-layer mitigation strategies has placed the burden on already-taxed parents and teachers stressed to the max. Parents of children with medically fragile children cannot be guaranteed that schools can keep their children safe. Ultimately, parents have no option but to withdraw their children from public school and begin homeschooling.

With the first case of Omicron detected on November 27th in the UK, today, the UK reported 90,000 cases. Pima County is still experiencing high community transmission with Delta, and the Omicron variant was just identified in Pima County this week. The concern is that the transmission rate of Omicron can easily overwhelm the hospital system. With Omicron R naught value estimated to be 3-4 times higher than Delta, we must be proactive in dampening the spread.

Preliminary data shows that twice vaccinated and boosted offers the best protection against

Omicron. However, monoclonal antibodies and the Regeneron antibody cocktail are ineffective against the Omicron variant, and the Sotrovimab monoclonal antibody is in short supply.

Pima County Supervisors have the opportunity to be proactive in slowing the spread of Omicron, preventing the healthcare system from being overwhelmed, and keeping our community safe.

**Additional Comments:** I am a resident of pima County, a mother and I work here. 2 weeks ago, one of my coworkers tested positive the day after I had been in a meeting with him and other folks in a small conference room for 1.5 hours. No one got it. We were all following our work indoor mask policy. This policy is what protected us. The affected co-worker has had covid and was fully vaxxed at the time he got covid a second time. I am at medium risk, but my daughter and her father are at high risk. I can't keep her home as she suffered mental health issues due to isolation during the pandemic. I am highly in favor of this policy and I hope that the board will do the right thing.

**Additional Comments:** I am a teacher in the Marana Unified School District. Masks simply make sense in protecting ourselves and others. I have observed the increased lax use of masks since our schools made masks optional. Not only are students and staff at risk of illness, but we have experienced staff shortages when staff are absent due to illness and/or quarantine. More importantly, students experience a significant loss of education when they are absent due to illness, quarantine, and classroom shutdowns. Most importantly, we need to protect lives. Thank you.

 **Pima County BOS - Resolution 2021-87**

Dear Board Members, I'm writing to ask that the Pima County Board of Supervisors adopt the county-wide mask mandate for indoor public spaces as outlined in Resolution 2021-87.

It is proven that masking indoors decreases COVID-19 transmission rates [1]. It is, at most, an inconvenience that the community can quickly implement to keep businesses and schools humming along. There is no chance of vaccinating our way out of this variant.

Teachers and parents in Pima County schools with mask-optional policies have experienced unprecedented stress and anxiety. We have spent the past twenty weeks dealing with exposure quarantines and classroom closures. A county-wide mask mandate would provide some bare minimum mitigation in some Pima County schools.

The correlation between school districts with mask-optional policies and school districts with employee and substitute shortages shows a solid cause-and-effect relationship. Superintendents of mask-optional school districts have previously disclosed that they do not want help from the county, and clearly, they need help retaining employees and to keep children safe.

The implication of not following public health policy of multi-layer mitigation strategies has placed the burden on already-taxed parents and teachers stressed to the max. Parents of children with medically fragile children cannot be guaranteed that schools can keep their children safe. Ultimately, parents have no option but to withdraw their children from public school and begin homeschooling.

With the first case of Omicron detected on November 27th in the UK, today, the UK reported 90,000 cases. Pima County is still experiencing high community transmission with Delta, and the Omicron variant was just identified in Pima County this week. The concern is that the transmission rate of Omicron can easily overwhelm the hospital system. With Omicron R naught value estimated to be 3-4 times higher than Delta, we must be proactive in dampening the spread.

Preliminary data shows that twice vaccinated and boosted offers the best protection against

Omicron. However, monoclonal antibodies and the Regeneron antibody cocktail are ineffective against the Omicron variant, and the Sotrovimab monoclonal antibody is in short supply.

Pima County Supervisors have the opportunity to be proactive in slowing the spread of Omicron, preventing the healthcare system from being overwhelmed, and keeping our community safe.

**Additional Comments:** As a 4th grade teacher at a public charter school, I have seen the devastating consequences of not having a mask mandate. Though masks are encouraged, many staff and students don't wear them, including unvaccinated staff members. Since Thanksgiving, covid has been sweeping through our student body. In the last three weeks, a third of one of my classes has tested positive with covid. Due to repeated exposure, I have several students who have missed over a month of learning. With the dismantling of practical online learning options, these students have relied on packets sent home and have had no access to live lessons. It is not just the health and wellbeing of students/teachers we are risking, but the quality of their education. We frequently have more new covid cases in a single day than we did over the course of an entire year when mitigation policies such as mask mandates were in place. I implore you to make changes necessary to protect Pima County families and to keep our children healthy and in school.

Dear Pima County Supervisors,

I am asking that you vote to impose an immediate indoor mask mandate so as to:

- (1) reduce the rate of transmission of the Delta and Omicron variants. Masks, both surgical and N95, have been shown to be effective in reducing transmission rates (see: <https://www.ncbi.nlm.nih.gov/pmc/articles/PMC7883189/>);
- (2) provide legal cover for businesses and consumers who would wish to do so voluntarily but are concerned about meeting opposition;
- (3) reduce the burden of care being shouldered by our medical workers;
- (4) send a message to those very same workers that the county as a whole is willing to share a measure of the burden;

A mask mandate is a community's common sense response to the COVID health crises. I urge you to put the health interests of Pima County first and take this simple step.

Thank you for your service to the people of Pima County.

Respectfully,

Steve Reitz

Dear Board,

I strongly reject any mask mandate or vaccine "passport" in Pima county for any of our places of business. Please do not impose these mandates for our community. If people do not feel safe, they can make the choice to stay home. But imposing proof of vaccine to enter a place of business is unAmerican and unacceptable!!

Dear government tyrants.... I am a free born American and you have no legal right to mandate wearing a stupid mask that doesn't even keep viruses from passing through it, (do your research) nor can you force me to take the death jab (do your research) or have a stupid passport... we all know it's just about your communist control...game is up and I now know that Pima county board of supervisors have sold out our country to George Soros and the communist agenda....the constitution protects me from your tyranny. What you are attempting to do in the name of health safety is nothing more than trying to take more control ... I urge you to stop and not vote in your tyrannical agenda...

Oh and your cheating in the election will be revealed..

Signed by a free and proud American.

Board,

I'm today's vote I urge you to vote AGAINST mask mandates and vaccine mandates.

People have a free choice to wear their mask to protect themselves or vaccinate to protect themselves.

Mask and vaccine mandates are illogical and ineffective for many reasons.

The only logical mandate that would actually stop the spread is a testing mandate, which I still oppose as mandates embody exactly what this country and state stand against. Private businesses have the right to mandate or not mandate to their own accord.

Thank you

I have been working with the public throughout the entirety of the pandemic and this is the first time I am afraid to work with the public. I have no choice but to work directly with the public, I cannot stay home and isolate because I have to take care of myself and my child. Thank goodness she is finally able to receive her vaccine. I have done my diligence during these two years, getting fully vaccinated and boosted, wearing masks constantly, social distancing and avoiding crowds, unable to visit vulnerable family members, keeping my child in virtual classes. We are TIRED of pulling the weight in this. I want to see my grandmother, I want my child to feel safe in school, I want others to protect me, as I have been protecting them.

Mask mandates work! Please consider putting one in place again.

Thank you

Hello. I am a staff member at a Pima County school. The results of not putting in place a mask mandate has been clear here. There have been so many covid cases among both children and teachers that I have lost track of the numbers. Even still, no mask rules or policies have been put in place here and there has not been an increase in mask use without a mandate for them.

Even still, my employer has urged me to resist mask mandates. Being someone who is asthmatic and has at-risk friends and family, seeing never-ending rise in COVID-19 cases has been alarming to me, especially when I cannot feel safe even at work.

I support the passing of a mask mandate for Pima County.

Dear Pima County Board of Supervisors,

I am writing to ask you to vote no on the mask initiative. Government mandates and overreach needs to stop. Our citizens should decide for themselves how to keep themselves healthy.

It is also not in the heat interest of business owners to have to be a policing authority of government policies.

For the benefit of all Pima County, I strongly urge you to Vote NO on the mask mandate.

Sincerely,

Dr Alexa Benzell

The tyranny of mask mandates is OVER. The real emergency here is the ongoing damage that has been done to small business.

Do NOT imposes mandates. NY and CA governors have already stated there will be no enforcement their own bans.

Then you have Maxine Waters caught not wearing a mask on a plane.

Enough said?

I'm writing to ask that the Pima County Board of Supervisors adopt the county-wide mask mandate for indoor public spaces as outlined in Resolution 2021-87.

Data proves that masks reduce the transmission of Covid. Data also proves that when left up to personal choice, there are not enough people that are vaccinated and wearing masks in public to help us reduce the transmission of Covid. Initial research shows that Omicron is even more transmissible than previous strains. Just like in other decisions regarding public safety and public health, our community needs the elected leadership to lead and govern by passing this mandate for all of us.

My children attend school in a district where the school year began with no mask mandate. Despite repeated requests by parents, the school board refused to adopt a mask mandate. In October, a large outbreak occurred at one of our schools and Pima County Health Dept closed one school for 2 weeks. Despite this and the continued requests from parents, our school board continued to refuse to adopt a mask mandate. After our case numbers grew even more, they finally approved (by only 1 vote) a mandate for only elementary schools. That mandate ended Dec 17. There was never a mandate for 7th – 12th, which means that even teachers, staff, and school nurses were at school and not wearing masks. Those schools continued to be impacted by numerous positive cases each day. I do not trust our school board to pass another mask mandate, even if community transmission spikes due to Omicron. I strongly believe that our entire community will be safest with a county-wide mask mandate, including schools. We need the Board of Supervisors to make this happen for all of us.

We do not let individuals decide whether they are too incapacitated to drive after drinking. We do not let individuals decide whether their restaurant kitchen policies are "clean enough". And so on. Elected government leaders are supposed to take it upon themselves to pass decisions for the protection of our community as a whole, even if they are unpopular decisions. That is the key characteristic of a democracy. Please pass this mandate for everyone living in Pima County. Please help us be an example to other cities around the US of how to come together for the good and protection of everyone. Letting individuals decide for themselves and make decisions that have proven to risk the lives of their neighbors is continuing to divide us. It's time for Tucson and Pima County to come together.

Sincerely,  
Meredith Joubert  
Mom of 4 children in Pima County, District 4

Dear Pima County Board of Supervisors,

No mask mandate or ANY mandates. The upcoming vote is nothing more than government overreach into our private lives and freedoms. I tell you what, if the idea is that mask mandates will help businesses you are WRONG. The opposite effect will happen, I along with many others will NOT FREQUENT BUSINESSES that require masks.

Furthermore, NATURAL IMMUNITY is better protection and does not pass on virus. The CDC has no incidences of recovered COVID people passing on the virus while there are thousands of cases where vaccinated pass on virus. This is TRUE SCIENCE.

Vote NO on mask mandates, NO on vaccine passports!

Dear Pima County Supervisors,

I am so relieved to see a county-wide indoor mask mandate back on the agenda for your upcoming meeting, and I urge you all to vote "yes" on the measure. For those of you who voted no on measures like this in the past, please understand that the situation with SARS-CoV-2, its variants, the vaccine's effectiveness, and the evidence we have supporting masks has evolved since then. There have been at least 18 new well-designed studies in the last year that prove wearing a mask indoors significantly decreases the transmission of SARS-CoV-2 with almost no ill effects to the wearer. One study just published on December 7<sup>th</sup> showed that "face masks significantly reduced the risk of SARS-CoV-2 infection compared to social distancing. We found a very low risk of infection when everyone wears a face mask, even if it doesn't fit perfectly on the face". The key here is that a vast majority need to be wearing a mask. The only way to accomplish that is with a mask mandate.

The Delta variant is still highly active, and now the Omicron variant is rapidly on the rise. My husband is a hospitalist in Tucson and can attest to the trend of increasing numbers of hospitalized patients with COVID-19, increasing numbers of ICU patients with COVID-19, and the decreasing availability of ventilators, ECMO machines, and services for non-COVID patients. This new surge is already severe and exhausting, and as we head into the holiday season full of gatherings and shopping in public and travel, we will surely see another huge spike in this pandemic. We have an opportunity to improve our county's mitigation efforts now, and lessen the severity of what is to come.

Thankfully, universal masking is a simple, effective, safe, inexpensive, and widely accepted mitigation method. An indoor mask mandate is a commonsense strategy that hundreds of cities and states are already doing, and the people originally opposed when a mandate goes into effect seem to easily adapt. Please don't allow a small minority of misled citizens who are opposed to a simple mask stop you from doing what will undoubtedly save lives. Thank you so much for your vote of "YES" on this measure. Please see links and graphs below for more information.

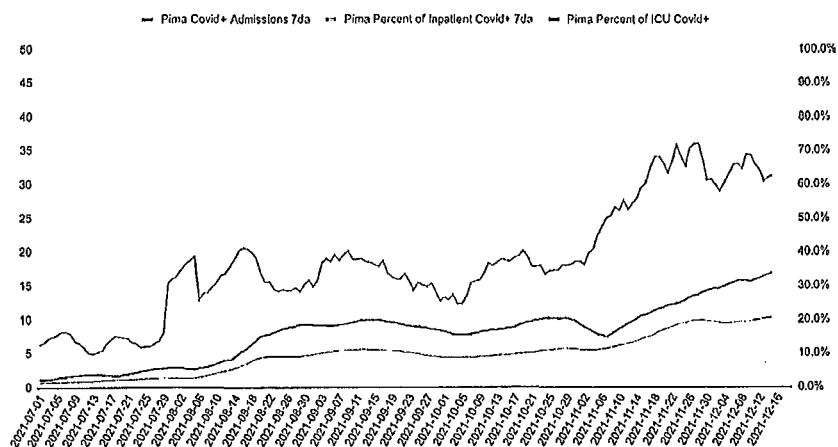

Sincerely,

Jane Lykins MD

As a concerned citizen, I ask that you DO NOT impose a mandatory mask mandate in businesses. Masks are not effective and can create more health problems. I am sure that many of you have seen the risks, but hopefully choose NOT to ignore. Just one aspect of that is the risk from hypoxia, which cancer cells grow best in low oxygen and can cause systemic inflammation in our bodies! You give people false hope that the mask will cure all. There are many good things in place that can help prevent disease, like good nutrition, good sleep, Vit C, Zinc, D3 BUT not a mask.

Hello,

I am writing in support of having an indoor mask mandate. The study of the USS Roosevelt which is a military ship proved that masking reduces the spread of covid. I am surprised that masking is still not required indoors. If a CDC study of a US military ship showing that masks prevents the spread of covid can be dismissed by the public who is stating that masks provide no benefit then this just shows they do not truly care about science or safety and just want to do what they want to do because they want to do it. Excessive studies regarding masks have proven that they work and if there's not going to be any social distancing and there's not going to be proof of vaccination required to attend local indoor spaces then the least that can be done is mask requirements to keep the general public safe from covid.

Sincerely,

Melissa Starr

You all need to stop this nonsense. We the people are awake and we are mad as hell. The masks don't work and vaccine passports are nonsense. You are killing our economy with your nonsensical nonsense. I don't know if you are looking at what is happening all over the world or if you just don't care. The vaccines are failing on a huge scale globally and there are zero studies to show masks work. This is about control and we are all SICK and TIRED of it. STOP!!!!

Check out what is happening in Ontario, Canada. This shows the stunning data about vaccine failure. Take a good look at the green line. These are infections among the vaccinated. Assuming these are Omnicron cases, there are only two possibilities:

The vaccines have now failed completely.

Omicron preferentially infects vaccinated people.

Heck maybe it is both!

Dear Board of Supervisors,

I am writing to you and asking that you vote NO on any mask mandates and proof of vaccines. Please allow businesses to decide what is best for them. Please take into account those people who for health reasons cannot take the vaccine. It could be more detrimental to them then getting the virus. What kind of community have we become when we are forcing people, against their will, to get a shot that is still unproven? The experts have even said it won't "prevent" people from getting Covid. In fact, it seems the people who are getting break through infections are those who have gotten the shot, not those who have recovered from Covid and have natural immunity. If this is truly about the science and peoples well being why are we discounting or not allowing for natural immunity?

I IMPLY you, on behalf of all people but especially those who would be harmed by getting the vaccine, to vote NO on having to prove vax status.

Also, the data, if you really want to search for the truth, shows that masks aren't affective against the virus as the droplets are smaller than what masks will block getting out or in. The masks that are the most protective are the N95 and let's be honest, how many people are wearing them?

Please allow the people to make their own decisions about their health and well being. Mandates like this aren't good for anyone. Please do the right thing by voting NO!!! Voting yes is nothing less than tyranny!!!!

With respect,

MR

Good morning,

I am writing to you today in regards to the vote on mask mandates and a participation pass for Pima county.

We, as a people, are responsible for our health and safety. Those who feel safer wearing a mask should be free to do so, as well as those who do not wish to wear one should be free to choose for themselves.

By adopting these mandates and passes, you are removing peoples' free will. Our rights are given by God and cannot be taken away by those who choose to institute unnecessary rules.

Regards,  
Marissa Romeo

I respectfully ask you do not move forward with this mandate. The panic caused by your actions in the beginning has scared my family and clients who need to seek medical services and purchase items needed for their lives. Asking for masks to be mandated is unfair to small businesses. Government money no longer exists to help small business. You should not be imposing anything that further limits access to goods and services already in short supply. You should not be imposing anything that hurts businesses with no plan on how to help us rebound from it.

People who are high risk should ask businesses to make accommodations if needed. My clients have and we have honored their requests!

To whom it may concern,

Mask mandates are unnecessary!

As American citizens, with rights and freedoms, my medical history is no ones business. I will not show proof or discuss my history with anyone but my physician.

Masks which are a piece of cloth in most cases, will not stop, prevent or help with the sickness. If one is not feeling well they must stay home. It's common sense.

I urge you to not pass the mask mandates in businesses.

Thank you!

Dear Pima Board of Supervisors,

I was notified that you are voting today to impose a mandatory mask mandate in businesses. I have also heard of a possible 'participation pass' (vaccine passport) for Pima County. This makes no sense! Vaccines have been proven to be ineffective. This vote is nothing more than government overreach into our private lives and freedoms! We are capable of making our own decisions on our health and safety.

PLEASE VOTE NO ON MASK MANDATES AND VACCINE PASSPORTS!!

Lori Herath

We're done. Let people determine their own level of risk tolerance. Per the AZDHS website, 1.7% of cases have ended in death. In Pima county 5% of cases require hospitalization. 69.4% of Pima county is vaccinated, of which I am one. There will always be new variants, just like the annual flu. It's time to move on. I don't envy your jobs, I believe you go about it with good intentions, however, I also believe that as a society, we have to let people determine what is best for them as individuals. Please be reasonable.

Merry Christmas to you all.

Very Respectfully  
Jason Cann  
Pima County Resident

Dear Pima county officials,

Enough is enough! As citizens of Pima County we will no longer tolerate your overreach in our county. You have no authority for this mandate and yet we still ask you to stop frustrating your citizens by pretending you have authority you do not have. Even the TPD and Pima County Sheriffs have said they will not enforce it because it is unconstitutional, so stop the ugly divide and stop the insanity. Vote no on this and vote no on any further discussions of vaccine passports and other violations of our medical and general freedoms.

**We are your long-standing, extremely high tax paying, law-abiding citizens and we ask you to stop this overreach at once! Enough is enough!!!**

Dear member,

I am currently in Los Angeles on business. Everyone and every business in Los Angeles County follows the inside masking requirement. Most of them are simply wear the mask outside as well as inside as a matter of convenience rather than take it on and off. It's not really a big deal, and Pima County people would quickly adapt. Follow the science!

It has been brought to my attention that Pima county is voting on a mandatory mask mandate and vaccine passport. As a small business owner in Pima County I urge you to vote NO on both. Our business has been in a steady decline in profitability and business since Covid, by passing the mask mandate and requiring vaccine passports it will destroy what little business we have left. I beg you to vote no, if you value small businesses at all please allow individual business owners to decide what mitigation for Covid works best to benefit customers as well as the business.

Thank you,  
JR

Dear Pima County BOS, mask mandates and mandatory vaccines are unconstitutional. We will not comply. The US Constitution guarantees our right to life, liberty and the pursuit of happiness. The science does not match the world wide lockdown and mandate measures being pushed on it's citizens. We the people of Pima County do not give our consent for you, our elected officials and our public servants to mandate masks or vaccines in the public realm. We the people of Pima county insist you cease and desist with this maladministration of forcing the American people in a free Republic to bow to your tyrannical controlling measures over our freedoms. We give you our consent to vote NO to mask mandates and vaccine mandates. We are also giving our consent for Pima County to use it's time wisely and block illegal immigrants from flooding our communities unlawfully by funding the boarder patrol to stop people from crossing the boarder against the US and Az state constitution.

Thank you for honoring our desires to improve Pima County,  
I want this read into the public record of the minutes for Pima County Board of Supervisors meeting on Tuesday Dec. 20, 2021

To whom it may concern,

It has come to my attention that the county plans to vote on vaccine passports, and mask mandates. This is an undue burden on our county, businesses and individuals. We live in a free country where individuals have the right to choose. Mandating masks and experimental vaccines is not only unconstitutional it is ridiculous and an enormous overreach of government. Please vote no on this.

Regards,

Johnny Faber

**Message Subject** Item #4 Addendum - Countywide Mask Mandate - Indoor Public Places

To Clerk of the Board (for Inclusion in The December 21 Meeting Minutes) Although I thought the issue of mandatory masking had been settled, apparently that is not the case. Therefore I am writing again to let you know that I do not support such a mandate. Are there any scientific reasons to mask? No. Random clinical trials have concluded there is no scientific evidence supporting facemasks' efficacy. They do not prevent people from exposure and infection with this or any virus. All masking seems to be good at doing is helping people feel like they have some control over this supposed pandemic and COVID-19. It has become a security blanket and/or pacifier for those who are so frightened about a virus that is less deadly than the flu for which no masking is required except during the 1918-1919 influenza pandemic and they did not work then either. Masks have been shown through overwhelming clinical evidence to have no effect against transmission of viral pathogens. Remember the SARS-CoV.2 virus is smaller than the pores in the masks so masks cannot filter out the virus whether you are coughing out viral particles or someone else is. The virus is everywhere now, so it is no surprise that the outside of the masks can become colonized with the virus from the environment and as a masked individual breathes drawing in air while talking or simply breathing, they are pulling in portions of the mask colonized with the virus. The bacteria (normal oral flora) found in the upper respiratory tract of humans increases in number when wearing a mask. The inner side of the mask becomes colonized with the bacteria which are breathed back into the individual. These bacteria as they concentrate can move from the upper respiratory tract down into the lower respiratory tract, the lungs, and cause secondary infections. This increase in bacteria can also cause more dental caries, gum disease, and abscess over time. How many people change their masks or clean them regularly? How many people adjust the mask, touching the outside of it or pulling it up and down, taking it off and putting it back on? They are handling the mask with contaminated fingers gloved or otherwise, contaminating the mask that is supposed to protect them. The best way to cut down on viral transmission is to practice good hygiene. Wash your hands

DEC 20 2021 15:09:07 PM

before touching your face. Wash your hands when you come back from shopping at a store. Stay home if you do not feel well. Get fresh air (no mask worn) and here in Arizona, open up some doors and windows and let fresh air in. Masking does not cut down on transmission of the virus but it certainly causes other less than positive consequences. Allow each individual to choose whether they want to use a mask or not. Let this mask mandate die once and for all. Respectfully, Mary Grace Werner, Clinical Laboratory Scientist (ASCP), ASCLS) with Specialties in Medical Microbiology and Immunology

I am a resident of District 1 and I am opposed to an indoor mask mandate. Per the data on Pima County website, the cases continue to decrease since a peak on November 17th. There is no reason for a mask mandate at this time. In Arizona in 2021, we have lost 4 times the amount of people from cancer than we have from COVID in 2020 and 2021 combined. Why don't we refocus all this effort of eliminating the cancer causing chemicals and processed foods than this virus that has over a 99% recovery rate. This makes no sense! Putting a mask on your face does not magically make you healthy, let's focus on getting Pima County Healthy so that we can fight off whatever comes our way, cancer, heart disease, COVID, the next virus. Let's mandate vegetables and fruit. Let's ban the chemical companies spraying our food with poison. Let's ban the personal care products that are filled with chemicals. Let's ban all the processed foods companies and that keeping us fat and sick. A mask does nothing! The only defense against this virus or any other sickness is a strong fully functioning immune system.

There is a research article in NIH website that 9 out of 10 deaths from COVID could have been prevented if the person had optimal Vitamin D levels. Let's mandate Vitamin D testing and use all the money spend on propaganda of masks and vaccines and spend that on vitamin D supplements for anyone that is suboptimal.

Please vote no to an indoor mask mandate. Please let this continue to be a personal choice, if someone feels they need to wear a mask...great! But don't mandate it!

Hello,

I am writing to you today as a concerned citizen of Pima County.

I urge you to please look at the science and acknowledge that masks do little if anything to stop the spread of disease. And can cause harm, particularly to children.

I also doubly urge you not to institute and kind of participation passes, vaccine passports, or any other "show me your papers" measures. People's health choices are protected private information. And the vaccines will not stop the spread of this virus any more than the masks will.

Please do not go any further in deepening this country into unnecessary authoritarian measures. Measures that will have zero effect on the spread of this virus.

Dear Pima Board of Supervisors,

It is my understanding that you are considering voting TODAY to impose a mandatory mask mandate in businesses. I also hear rumors of a 'participation pass' (vaccine passport) for Pima. This is nonsense! Vaccines have been proven to be ineffective. Natural immunity has worked to overcome past pandemics for hundreds of years. This is vote is nothing more than government overreach into our private lives and freedoms. We are capable of making our own decisions on our health and safety. This is a power grab, one that will effectively cost more lives, more jobs, more business closings, and ultimately cost you support at the voting booth.

You must stop this nonsense. Vote NO on mask mandates, NO on vaccine passports - it's actually UNLAWFUL

Dear Pima Board of Supervisors:

**Please vote no on mask mandates and vaccine passports in Pima County.**

Allow individuals to make their own choices for themselves and their children without being alienated or discriminated against.

Trust individuals to use common sense:

- Stay home when they are sick or not feeling well
- Wash hands regularly
- Eat well, exercise regularly, and get plenty of sleep

Thank you for voting to support freedom of choice.

Sincerely,

Sharon Freeman

Pima County Board of Supervisors  
(i.e. Rex Scott, Matt Heinz, Sharon Bronson, Steve Christy and Adelita Grijalva):

I'm going to make this easy on you- I'm not going to give you stats or actual data since that would be a waste of time. All of you, save Steve Christy, don't listen to common sense- just your own ideas. Here is what needs to happen:

I am writing to you today DEMANDING you take action on the following items in the following manner at your meeting.

- 1) Your "Sustainability Agenda" - We the people, vote NO to this and you must understand that voting for this will irreversibly harm Pima County. You, as a board, also are demanded to vote NO!
- 2) Removing money from the road repair budget to use it on your "public health and safety" agenda - We the people, vote NO to this and you must understand that voting for this will harm Pima County, her citizens, her economy and our future funding. You as a board are demanded to vote NO!
- 3) Concerning the \$3 million shortfall issue for testing and continued mitigation for Pima County: as the funds are depleted December 2021, word has it you may try to get this money from the roads fund as well. To this, we the people, vote NO and you must understand that this is unacceptable practice and should NEVER be considered. This virus has cost everyone in Pima County their jobs, lives, education, livelihoods, and the most severe small business closures in, likely, the history of this county!
- 4) WE THE PEOPLE DEMAND IN PERSON MEETINGS WITH THE PIMA BOS EFFECTIVE IMMEDIATELY!

Regards,  
Melissa Conroy, Pima County Resident

**Subject:** Please vote No on mask mandates to private business.

CAUTION: This message and sender come from outside Pima County. If you did not expect this message, proceed with caution. Verify the sender's identity before performing any action, such as clicking on a link or opening an attachment.

As a Pima County resident and taxpayer I urge Pima County Board of Supervisors to reject and vote NO on any mandate, requirement or any other "rule" for privately owned businesses to mandate masks or show proof of vaccination.

It is absolutely abhorrent overreach into private lives of Pima county residents and business owners.

Enough is enough, I don't wear life jacket, because someone cannot swim around me. If people want to wear masks or show their proof of vaccinations to complete strangers, it is fine with me, but it should never be mandated from any government if Pima County or the United States.

When I vote in Pima county I do not vote for a babysitter or a nanny, I vote for an official who would do the job I as a taxpayer send him to do. You work for us the taxpayers.

As a free American adult I have been capably navigating my life without government help so far. I would surely be voting against anyone who would attempt to change that.

Let personal freedom and choice of each individual for themselves, be your guiding principle.

Sincerely,

Yuliya Cerros .

Dear Pima County Board of Supervisors,

As a nurse and soon to be small business owner in Pima County I absolutely decry a mask mandate and possible vaccination status pass. Tucson was just recovering from years of economic stress when Covid hit, we will be set back to those years Every session. The people don't want it, let everyone decide for themselves, do not Allow Tucson and Pima County to be Discriminatory against citizens- that is not who we are. Let's thrive, let's do the right thing By everybody not just a few. That's a reap A successful harvest here In our beautiful city & draw good and successful people to Tucson, not Running from it.

Most sincerely, a new resident, business owner & mother.

To Whom It May Concern:

Please do not vote in favor of this mandate. I ask you to look and consider the success the state of Florida has had in this Covid fight versus states that are heavily enforcing them. NYC is in terrible shape and heavily enforce while Florida has the lowest Covid rates currently with none of the mandates.

There is statistical numbers that proves this.

Thank you.

I am extremely opposed to mandatory indoor mask wearing. this should be left to individuals to decide what they want. I personally see it as an unhealthy practice. fresh air is a powerful way of staying well. A mask suffocates me. We are a free country and each person should choose what is best for them. If a man can wake up one morning and say he is a woman or vice versa why should someone else decide how I should keep myself safe.

I absolutely am against any passport to prove vaccination . Everyone so far that has been vaccinated has come down with one of the variants.

It's about time we are allowed to make our own decisions regarding our right as American citizens to decide for our self what we want to put in our bodies. You, and the city of Tucson should do what you were put into office to do.....funding for education, building and maintaining our roads bringing good paying jobs to our town. Shortly, Pfizer and Merck will be putting out an actual pill for treatment of covid that is 89% effective. So stop with this over the top governing and do what we put you into office for. I'm a registered democrat and if this goes through I will registered as a republican. And anyone naive enough to think the masks that can be purchased at stores are effective at preventing a nano particle of a virus really needs to read and educate theirselves more. I don't recall all the masks that China's citizens wear helped them from escaping covid. Enough is enough do what you are in office to do and let each individual chose what is best for them. And keep in mind, all this nonsense is not good for the democrats in the upcoming primaries. Last I heard, we are not under dictatorship.

I am Sharon Fickes legal resident of Pima County contact [REDACTED]  
Following is my comment regarding Item #4 Addendum Resolution 2021-87 Mask Mandate

Another Countywide Mask Mandate promoted by Matt Heinz, Board of Supervisor District 2. What again? It would be best if the Board of Supervisors could follow the science. Review documentation that is not provided by M. Heinz. Masks don't work. You can make the personal choice for yourself. Go ahead and slap a piece of fabric across your face. If that gives you comfort then do it. If you are sick then stay home. Do not let the political goals of the Board of Supervisors control Pima County and pretend to be promoting good health. It is apparent that M. Heinz would prefer Pima County and the world would follow his political advice and forget that individuals have been down this road with Heinz for almost 2 full years. Remember....Let's just lower the curve? Not enough let's close down our community and continue to ruin our local Businesses and the economy. Still not enough control for M. Heinz then let's mandate vaccines and fire anybody who chooses to make their own personal medical choices and not let the elected officials make their medical choices. Enough of your nonsense. **NO to mask mandates.**

I'm writing to express my concern over mask mandates being voted on today. There is NO evidence that mask mandates have reduced transmission rates in cities. Vaccine passports also make no sense and deny true scientific data that shows natural immunity to be just as effective or more at preventing disease or serious illness. Please use common sense and stop trying to control the citizens of Pima county to advance your own personal agendas and/or for the purposes of political gain and showboating! Individuals and businesses should have the freedom to choose how to protect themselves.

Thank you,

Vote NO on mask mandates and vaccine passports/participation passes for the residents of Pima County! This is not constitutional and is a massive overreach of our local government over the citizens who reside here! This is awful, unnecessary and there is NO scientific evidence that masks do anything to slow or stop the spread of any virus! Mask mandates are only about controlling the people. These mandates are not lawful. The further implementation of mask mandates or a vaccine passport needs to be voted down! These mandates do not reflect the will of the people whom you serve!

Hello,

As a resident of Pima County, I strongly urge you to vote "NO" on implementing mask mandates or any other mandates for the businesses and residents of Pima County. Governmental mandates are highly unconstitutional. The time is now for all government to cease overstepping their bounds through senseless and unscientific impositions on their constituents. Citizens are growing restless and have reached a tipping point. These mandates are no longer about keeping we the people safe from a virus. In fact, the mild symptoms from the latest "variant" will prove to be highly beneficial in the eradication of the disease, especially since it is a scientific fact that natural immunity is FAR superior to any of the "vaccine" immunities that the government has been pushing on citizens. For these reasons, notwithstanding, I implore you to vote "NO" on any measure to mandate, coerce, or incentivize residents of Pima County to play your games any longer.

Do the right thing,  
Paul Robins

**Subject:** Mask mandate and vaccine passports

CAUTION: This message and sender come from outside Pima County. If you did not expect this message, proceed with caution. Verify the sender's identity before performing any action, such as clicking on a link or opening an attachment.

Good morning,

I have been told that Pima County will be meeting this afternoon to vote on a mask mandate and a "Participation pass" which is just a different name for a vaccine passport.

I want to express my opposition to either of these proposals.

A mask mandate is wrong for the following reasons.

1. In studies, asymptomatic spread of the covid virus has been found to NOT EXIST! If the people of Pima county want to wear masks they should be able to do so. However they should not be FORCED by their government to do so. America was founded on freedom and the forced muzzling of Americans will not be favored in history.

2. I believe citizens of Pima County have had enough and most will not comply with such a outrageous mandate. How will Pima County enforce such a mandate? Dispatch deputies who do not wear masks to come tell the citizens to put masks on? Pima County can't afford to use our deputies in such a waste of time when they should be on the streets pursuing and stopping real crime. The fact is it is unenforceable and the citizenry will laugh in the face of such a unlawful mandate.

A vaccine passport is even more outrageous then a mask mandate. The segregation of people based on their personal medical choices, is at its core, evil. To expand further the covid vaccine has been proven to NOT be effective. A passport to show vaccination that doesn't work, for a disease that has a survival rate of 99.8%, is insane.

History is looking at you, the board of supervisors for Pima County and will remember your actions. I hope and pray that Pima County will be remembered for doing the right thing and voting NO on these ridiculous propositions. If these proposals pass you will be remembered as tyrants and enemies of the people.

- Bryan S.

Good afternoon,

Please accept this email as a voiced concern in your upcoming vote. Please vote NO on mask mandates and vaccine passports/participation passes for the residents of Pima County.

This is not constitutional and is a massive overreach of our local government over the citizens who reside here. This is unnecessary and there is NO scientific evidence that masks do anything to slow or stop the spread of any virus. These mandates are are not lawful. The further implementation of mask mandates or a vaccine passport needs to be voted down.

Thank you,

Casey Van Bogaert

Stop trying to take away our constitutional rights.  
You have no legal right to impose any mandates on us as Americans.  
You are also violating Governor Ducey's executive order.  
Mask do not work and vaccine passports violate privacy.  
What I do is between my doctor and I. It is no business of yours or anyone else's.  
You will be sued and voted out if you do not knock this off.  
Stop being tyrants. We will not stand for this. America is a free country.  
I know my rights and I will press charges if you pass this.

Hello

I'm writing you to encourage you NOT to place a mask mandate on Pima county or Tucson. The omicron variant has so far been very mild and not killing people. Vaccines may help some from not getting the virus as bad however it does not stop the spread of the virus. Therefore those who wish to be vaccinated please do. Those who wish not to be vaccinated should not be forced. Masks are not used properly and spread the virus faster because of it.

No to mask mandates  
No to vaccine passports

The Pima County Board of Supervisors is voting today on measures to impose a mandatory mask mandate and a "participation pass" for Pima County.

As a resident of Pima County since 1996, my family and I strongly vote NO on these measures. It is tyranny at its worst. If Pima County businesses impose mask mandates or proof of vaccination status of any kind, it is bad for businesses big and small and is directly in violation not only of HIPAA but of the Nuremberg Code of 1947, which has no sunset.

**Subject:** Pima County Mask Requirement

CAUTION: This message and sender come from outside Pima County. If you did not expect this message, proceed with caution. Verify the sender's identity before performing any action, such as clicking on a link or opening an attachment.

Dear Supervisors:

I write in SUPPORT of the resolution regarding mask requirements that is to be voted upon at your December 21, 2021, meeting.

I am 81 years old and my wife is 79. We both have preexisting conditions. Though we're fully vaccinated, we remain in danger of breakthrough infections, particularly from new variants such as the Omicron. We're also concerned about our son, who is vulnerable due to a medical condition, and about our ten-year-old grandson, who can't get a booster shot because of his age.

A temporary county-wide mask requirement will help safeguard our family's health. In addition, it will encourage us to go out to dinner and attend public events, thereby making our small contribution to economic stability.

Having read the resolution, I note that it permits EXEMPTIONS for a variety of reasons, and that the person claiming to be exempt does not need to document that claim. Furthermore, I note that NO ENFORCEMENT ACTION may be taken without your express approval.

The resolution thus seems well designed to secure the greatest possible benefit with the least possible coercion. For the sake of our family and the whole community, please vote to approve this urgently needed public health measure.

Many thanks,

Jonathan Penner

Hello, I'm writing you all today in support of Supervisor Dr. Matt Heinz's resolution to impose a Countywide indoor mask mandate. It is so important to quash this pandemic as soon as possible. Not just for the health and safety of Pima County residents but for businesses as well. While the virus rages fewer people can or feel comfortable going out and spending money or working even! This will also help businesses keep their customers and employees safe while not having to be the lone sore thumb to impose them just for their business and end up fighting and dealing with people who don't want to comply. But doing it Countywide it takes that burden off of them. Please vote yes for this resolution!

Pima County Government.

I am very much against your current plan of implementing a mask mandate for all business and a participation pass (aka vaccine passport) for Pima County.

Masks don't work. Why would someone think having someone wear a mask - that accumulates everything they walk through and keeps it right next to the nose and mouth so they can breathe it in and become infected at a much higher rate - would decrease the spread of COVID? Research shows the exact opposite and causes even more health issues. Have you done ANY research on this?

A person's health issues are between them and their doctors. Not anyone else. The vaccines are not safe for some people. Restricting these people further is inhumane.

These vaccines are experimental and forcing someone to get one is against the Nuremberg Code. The principles state "The voluntary consent of the human subject is absolutely essential", (there are treatments for COVID so not essential), "conducted as to avoid all unnecessary physical and mental suffering" - (not if mandated), "performed only by scientifically qualified persons" (given at places like Sam's Club), and "yield fruitful results for the good of society" (not for the people harmed or killed by the vaccines). Breaking the Code is a punishable offense!

According to the CDC, we now have more deaths from the vaccines than we did from COVID in 2020. Once again, have you done ANY research on this?

Elizabeth Grady

Dear Pima Board of Supervisors,

It is my understanding that you are considering voting TODAY to impose a mandatory mask mandate in businesses. I also hear rumors of a 'participation pass' (vaccine passport) for Pima. This is nonsense! Vaccines have been proven to be ineffective. Natural immunity has worked to overcome past pandemics for hundreds of years. This is vote is nothing more than government overreach into our private lives and freedoms. We are capable of making our own decisions on our health and safety. This is a power grab, one that will effectively cost more lives, more jobs, more business closings, and ultimately cost you support at the voting booth.

You must stop this nonsense. Vote NO on mask mandates, NO on vaccine passports!

CAUTION: This message and sender come from outside Pima County. If you did not expect this message, proceed with caution. Verify the sender's identity before performing any action, such as clicking on a link or opening an attachment.

To the Board of Supervisors:

I ask that you all vote no against implementing another mask mandate as well as shut down any idea for a vaccine passport.

The left says to follow the science while ignoring any experts who do not agree with the science on the left. Science is not really science if all sides are not allowed to be heard and debated. There are multiple expert reports that masks do not work against the virus or any variants. The virus molecules are too small for a mask to prevent the spread. It's like trying to keep a mosquito out of your backyard with a chain link fence. Not only do masks not work, you all know that mandates are not laws, and go against the laws that protect our constitutional rights. This is total government overreach and violates the oath to follow and protect the constitution.

The evidence shows and even the federal government, the CDC, the NIH and Dr. Fauci have admitted that the so called vaccine and the boosters do NOT prevent the vaccinated from getting the virus, spreading it, from being hospitalized or dying from it. So, the idea of a vaccine passport is absolutely ludicrous.

Requiring private businesses to mandate masks again, is also unconstitutional. These are privately owned businesses. It is their choice whether or not to ask people to wear them. You do not have the right to bully them with threats of fines or losing licenses.

I want to remind you all that you are employees of the citizens of Pima County. You work for us. Our tax dollars pay your salaries. This is America and you do not have the right to mandate anything. You do NOT have the consent of the majority of the people. I also want to remind you that you do NOT have the power to create law. Mandates are NOT laws and do NOT have to be obeyed.

I ask that you stop this government overreach, stop perpetuating the fear propaganda of the left over a plain and simple flu virus with a 99.9% recovery rate and I ask that you shut down any push for a mask mandate or a vaccine passport. If I remember right Governor Ducey banned cities and counties from implementing them anyway.

Thank you,  
A concerned Pima County citizen

To all concerned that read this,

It has come to my attention that there is a meeting and a vote on vaccine passports today. This is against the bill of rights and not publicly broadcasted or voted on by the public. This is becoming a suppression of human rights and looking like a WWII repeat of concentration camps. How is this legal and how as government officials sworn to protect the Bill of Rights and constitution can this be allowed?

To Puma County Board of Supervisors,

Mask mandates have been never been proven effective. Where is the science that we are supposed to be following? What we do know is that depression and mental health has skyrocket during this time. Mandates and passports are not going to help!

There are thousands of Pima County's residents who have had covid and recovered just fine and have no need for passports. Vaccines protect the one who receives it. No body else. That is science!! I haven't even mentioned the negative financial burden that it would undoubtedly have on businesses.

We need to stop the panic and use the science with good common sense. People need to be responsible for their own actions and decisions. STOP THE POLITICAL BS!!! You work for us!!

Please consider our rights!

Thank you,  
Angela Reid

Pima County Board,

Thank you for your hard work during these trying times! As an educator- one that taught in person all school year last year and this year- I know it's not easy making decisions that have a great impact on our community. It's impossible to please everyone. However, I want to urge you to continue to let people decide what is best for them and their families. Please make a choice that is constitutional and consider the wishes of the majority of the constituents in the entire county.

Not to mention, many people with certain health issues are being advised by their doctor to NOT get the vaccine at this time. Where does that leave them and their health and freedoms if we have a "participation pass?"

Sincerely,

Brianne Wolfe

CAUTION: This message and sender come from outside Pima County. If you did not expect this message, proceed with caution. Verify the sender's identity before performing any action, such as clicking on a link or opening an attachment.

Pima Gov't,

Please do not pass this bill! What is even the benefit at this late in the game in the world of COVID? As I'm emailing this I'm working in a medical office which has since remained open and operational through the pandemic. What we would like is research actually showing how making masks mandatory helps businesses function. Businesses help pay the taxes for the people and government body and this will cripple the little faith they already have in you. And on top of that you're going to pass an official passport for a temporary virus?? This a major HIPPA violation which can cause lawsuits all over the city. This "passport" contains sensitive information about a citizen's personal health which can be stolen very easily and will be in the hands of an ineffective government who gets data breaches constantly.

In short voting no on this mandate and no on the 'participation pass' will in the long term help push Arizona past the pandemic and hopefully keep Arizonans from voting everyone out of the current Pima government.

If you do have any questions do let me know.

Thank you,

Iain M.

I am against mandatory mask or vaccine mandate for Tucson businesses. That choice should be left up to the private businesses. I believe people should be responsible for making their own choices on whether or not to patronize a business.

Also, I have a [REDACTED] daughter who cannot wear a mask and even though she has an exemption, she is still not allowed in certain businesses and venues. She has been discriminated against multiple times. I fear that this mask mandate would only further the discrimination she has already received. I have other child with [REDACTED] who cannot get the vaccine. The CDC stated that people with [REDACTED] should not receive the COVID-19 vaccine. Please vote against any mandatory mask and vaccine mandate.

Thank you!

Good Afternoon,

I am emailing you to tell you to vote no on a mask mandate and or vaccine passport. As Americans we have a choice and we should not be forced to wear a mask or receive a vaccine against our will. As well as be told that we cannot participate in something without proof of vaccines. Doing this is equivalent to the segregation that the African Americans faced in the south after the civil war and up until the 60s. You would be enforcing basically Jim Crow laws all over again. Americans have the right to choose and this right should not be taken away. Veterans like myself did not fight to keep our freedoms only to have them taken away. This includes a vaccine passport mandate and a mask mandate. Let us choose and not force it.

To whom it may concern,

As a citizen of Pima County, business owner and parent, I am emailing to express my strong feelings that there SHOULD NOT be a mask mandate or a vaccine requirement in Pima County. It is medically proven that masks do not prevent the spread of COVID and there is no medical proof that they do prevent the spread of COVID. Likewise, a vaccine does not prevent any individuals from getting or spreading COVID. These mandates and the continued focus on them at the County level is unproductive and a huge overreach by the government. I strongly request and encourage that there is a NO VOTE on these mask and vaccine measures.

Sincerely,

A concerned citizen
