Thank you, Bernadette.

Given the news that Banner is basically out of space and delaying elective procedures it feels important to re-establish an indoor mask mandate. We must all take care of each other.

Thank you for your time and your service to our community.

Best,
Zack Jarrett

Vote NO on both of these subjects! We certainly don't need to wear masks anymore and the vaccine passport idea is lunacy and discriminatory!!!

 Pima County BOS - Resolution 2021-87

Dear Board Members, I'm writing to ask that the Pima County Board of Supervisors adopt the county-wide mask mandate for indoor public spaces as outlined in Resolution 2021-87.

It is proven that masking indoors decreases COVID-19 transmission rates [1]. It is, at most, an inconvenience that the community can quickly implement to keep businesses and schools humming along. There is no chance of vaccinating our way out of this variant.

Teachers and parents in Pima County schools with mask-optional policies have experienced unprecedented stress and anxiety. We have spent the past twenty weeks dealing with exposure quarantines and classroom closures. A county-wide mask mandate would provide some bare minimum mitigation in some Pima County schools.

The correlation between school districts with mask-optional policies and school districts with employee and substitute shortages shows a solid cause-and-effect relationship. Superintendents of mask-optional school districts have previously disclosed that they do not want help from the county, and clearly, they need help retaining employees and to keep children safe.

DFC 21 21 21 07 45 P O L K O F R D
AR3

The implication of not following public health policy of multi-layer mitigation strategies has placed the burden on already-taxed parents and teachers stressed to the max. Parents of children with medically fragile children cannot be guaranteed that schools can keep their children safe. Ultimately, parents have no option but to withdraw their children from public school and begin homeschooling.

With the first case of Omicron detected on November 27th in the UK, today, the UK reported 90,000 cases. Pima County is still experiencing high community transmission with Delta, and the Omicron variant was just identified in Pima County this week. The concern is that the transmission rate of Omicron can easily overwhelm the hospital system. With Omicron R naught value estimated to be 3-4 times higher than Delta, we must be proactive in dampening the spread.

Preliminary data shows that twice vaccinated and boosted offers the best protection against Omicron. However, monoclonal antibodies and the Regeneron antibody cocktail are ineffective against the Omicron variant, and the Sotrovimab monoclonal antibody is in short supply.

Pima County Supervisors have the opportunity to be proactive in slowing the spread of Omicron, preventing the healthcare system from being overwhelmed, and keeping our community safe.

Dear Board of Supervisors,

Good morning and thank you for your leadership.

Please vote in favor of a county wide indoor mask mandate. I feel this is a very important public health measure that would help to reduce the strain on local hospitals and healthcare workers, allow for a safer work environment for business owners and their employees, allow for a safer experience for customers and shoppers, allow for a safer learning environment for students, keep everyone safer in houses of worship and demonstrate the importance that all county residents need to work together to protect each other.

Best Regards,
Derek Rowen
Pima County Resident

I'm writing to endorse the reinstatement of the Pima County indoor mask mandate. It's the most effective and proven way to cut down on the transmission of the Covid virus, other than the vaccine's. I've had all 3 of my vaccines but still would not consider going into a public place without a surgical or an N95 mask.

I was at the Tucson Mall last Friday and it was full of holiday shoppers. I was completely shocked and dismayed at the lack of masks.

I would guess that only 1 out of 3 shoppers was wearing a mask. I will not be going back there until the Omicron has come and gone and masks are required.

Please listen to the experts warning the country that a dangerous covid storm is coming and will be impacting our local hospitals. Our Doctors and nurses can't handle much more. I want to have a normal life again in the near future and getting everyone vaccinated and wearing masks is the only way we can get a slow down of this horrible virus.

Vote for a County wide indoor mask mandate.
Thank you,
Anne Moore

Good Evening,

Not that any of the narcissists on this board will read this, but we'll give it the old college try for posterity (assuming future generations will be able to live a normal existence in this once great county).

We will not comply with mask or vaccine mandates. These ruses are nothing more than feeble attempts at gaslighting the increasing number of low-information voters that you call your constituency. Your willingness to break down the already frail social house of cards that Americans are attempting to rebuild for no reason other than to cover your own asses is infuriating.

There is no data to justify the measures you are proposing. Just media-driven panic. COVID is very real. Having had it, I can tell you it's terrible. It is also here to stay, just like every other common airborne respiratory virus. It is also transmitted in droplets smaller than what your proposed masks can filter down to (I can't believe I had to write that fact in an email to those that serve in elected office and "represent" me).

As far as your vaccine passports, I only have one request. For those of us that will not comply, please make sure that non-compliance is broadcasted for the masses to see. A little shape on our sleeve? A triangle, or maybe even a star? Yellow in color, perhaps? Just spit-balling here...

We would have immunized out way out of influenza decades ago if we were able to. Stop this charade and get out of our way. We already have enough problems that you have created to fix.

Sincerely,

Brendon McBride (Your Employer)

To whom this concerns,

I am utilizing ARS 1-601 and ARS 15-341, I will not comply with your mask mandates or vaccine card requirements. I retain choice for myself and for my children. If you're concerned with covid, finish building our border wall and utilize our border agents efficiently so that the border of Arizona is no longer open and unmanned. Our state is seeing increases in Covid due to your incomprehensible support of this administration's undoing of border policies. Any covid deaths counted on your AZDHS dash board this year are your own doing.

Sincerely, a tax paying, essential working, mom here to remind you that you are elected officials representing the majority, and the majority opposes tyranny.

Dear Board Members,

As a Pima County resident I write you to once again to express my serious frustration and concern over the Board's consideration of any future mask mandates, or worse, pro-segregation "vaccine passports". These are useless and divisive measures that have done nothing to end Covid, protect health or the economy. These measures should not be considered or voted on. If you must vote, VOTE NO.

I urge you to accept that the pandemic is over and the VAST majority of Covid cases are common colds.

This will fall on deaf ears of those of you who use every opportunity to spread fear and propaganda, but it is my hope the majority of you have common sense and do not allow these tactics to further tear Pima County apart.

Dear Pima Board of Supervisors,

It is my understanding that you are considering voting TODAY to impose a mandatory mask mandate in businesses. I also hear rumors of a 'participation pass' (vaccine passport) for Pima. This is nonsense! Vaccines have been proven to be ineffective. Natural immunity has worked to overcome past pandemics for hundreds of years. This is vote is nothing more than government overreach into our private lives and freedoms. We are capable of making our own decisions on our health and safety. This is a power grab, one that will effectively cost more lives, more jobs, more business closings, and ultimately cost you support at the voting booth.

You must stop this nonsense. Vote NO on mask mandates, NO on vaccine passports!

It has come to my attention that the Pima County Board of Supervisors voted on a mandatory mask mandate for businesses along with the possibility of a vaccine passport.

I am a United States Citizen and a registered Democrat in Pima County. I am appalled at my party for all the restrictions, and business closures that you have imposed on taxpayers of this community. It has been a very difficult time for small business especially. My personal business that I build up in the last 40 years was drastically affected and at this stage of my life, the last two years are lost and can never be replaced physically, emotionally and financially!

A great number of the people that I am in contact with that are double and now triple vaccinated have either come down with or know people that have come down with the virus, whichever variant is in the media at the time. The efficacy of this vaccine has not been tested properly or proven.

The mask mandate? Again? Everyone knows the virus is a nano particle that can easily permeate most masks. To wear a mask for 9 or 10 hours in the day will easily disrupt even the most healthy immune system and have little to NO effect in suppressing the virus that has already mutated more than is imaginable. I wear a mask out of respect for other peoples fears however it does not make me feel "safe"

If these mandates are imposed I will no longer align myself with the Democratic Party. The party is already falling out of favor after this never ending ridiculousness.

My living wage is dependent on an open thriving economy that we have not had for almost 2 years! Your salaries are dependent on my tax dollars, so in essence you work for the people. It is selfish, unnecessary and politically motivated move on the part of our government.

This is a free country, it is not up to the Pima County board to decide what I want to do with my body and health.

S Fernandez,

Hello - I'm a highly educated 35 year resident of Pima County. I urge all supervisors to promptly and without controversy or extraction of political capital vote to require everyone to wear masks indoors. This should not be a close call. Humans have the ability to learn. We know that masking is an effective way to save the lives and health of health care workers in particular and the citizens of the county in general. This is an opportunity for the county government to not look like uneducated doofuses. We know the problem exists and we need to ALL take precautions now. This is a community matter. It is the proper role of government to protect the community. Any other approach is hubris.

Hello,

Please be advised that as a member of we the people, I strenuously object to this government's intention of masking citizens again.

This is an unconstitutional violation of human rights. The latest virus variant your friends over seas with help of some domestic unscrupulous parties have released don't warrant any such measures. I hope you don't think we see you as benevolent by permitting us to nearly get through Christmas before attempting to clinch down communistic actions upon us immediately after.

Citizens are wide awake and watching you very closely. You answer to us and you will quite possibly answer to officers of criminal courts as well as to God.

It's not too late to turn from your ways but i can imagine window of heaven's mercies for the souls who pledged medical and constitutional oaths before the men and women you're charged to care for is most definitely closing.

This proposal should not move forward.

Sincerely
Laura Schwickrath

CAUTION: This message and sender come from outside Pima County. If you did not expect this message, proceed with caution. Verify the sender's identity before performing any action, such as clicking on a link or opening an attachment.

 Pima County BOS - Resolution 2021-87

Dear Board Members, I'm writing to ask that the Pima County Board of Supervisors adopt the county-wide mask mandate for indoor public spaces as outlined in Resolution 2021-87.

It is proven that masking indoors decreases COVID-19 transmission rates [1]. It is, at most, an inconvenience that the community can quickly implement to keep businesses and schools humming along. There is no chance of vaccinating our way out of this variant.

Teachers and parents in Pima County schools with mask-optional policies have experienced unprecedented stress and anxiety. We have spent the past twenty weeks dealing with exposure quarantines and classroom closures. A county-wide mask mandate would provide some bare minimum mitigation in some Pima County schools.

The correlation between school districts with mask-optional policies and school districts with employee and substitute shortages shows a solid cause-and-effect relationship. Superintendents of mask-optional school districts have previously disclosed that they do not want help from the county, and clearly, they need help retaining employees and to keep children safe.

202112101530001015
AFS

The implication of not following public health policy of multi-layer mitigation strategies has placed the burden on already-taxed parents and teachers stressed to the max. Parents of children with medically fragile children cannot be guaranteed that schools can keep their children safe. Ultimately, parents have no option but to withdraw their children from public school and begin homeschooling.

With the first case of Omicron detected on November 27th in the UK, today, the UK reported 90,000 cases. Pima County is still experiencing high community transmission with Delta, and the Omicron variant was just identified in Pima County this week. The concern is that the transmission rate of Omicron can easily overwhelm the hospital system. With Omicron R naught value estimated to be 3-4 times higher than Delta, we must be proactive in dampening the spread.

Preliminary data shows that twice vaccinated and boosted offers the best protection against Omicron. However, monoclonal antibodies and the Regeneron antibody cocktail are ineffective against the Omicron variant, and the Sotrovimab monoclonal antibody is in short supply.

Pima County Supervisors have the opportunity to be proactive in slowing the spread of Omicron, preventing the healthcare system from being overwhelmed, and keeping our community safe.

Dear Pima County Board of Supervisors,

I urge you to please take action and vote for approving a Pima County-wide indoor mask mandate. I am a resident of Tucson and a teacher at Gridley Middle School in Tucson Unified School District. I truly believe an indoor mask mandate will help reduce the risk of the Omicron variant.

Thank you for your consideration.

 Pima County BOS - Resolution 2021-87

Dear Board Members, I'm writing to ask that the Pima County Board of Supervisors adopt the county-wide mask mandate for indoor public spaces as outlined in Resolution 2021-87.

It is proven that masking indoors decreases COVID-19 transmission rates [1]. It is, at most, an inconvenience that the community can quickly implement to keep businesses and schools humming along. There is no chance of vaccinating our way out of this variant.

Teachers and parents in Pima County schools with mask-optional policies have experienced unprecedented stress and anxiety. We have spent the past twenty weeks dealing with exposure quarantines and classroom closures. A county-wide mask mandate would provide some bare minimum mitigation in some Pima County schools.

The correlation between school districts with mask-optional policies and school districts with employee and substitute shortages shows a solid cause-and-effect relationship. Superintendents of mask-optional school districts have previously disclosed that they do not want help from the county, and clearly, they need help retaining employees and to keep children safe.

REC 21 21 07 56 01 00 00
APB

The implication of not following public health policy of multi-layer mitigation strategies has placed the burden on already-taxed parents and teachers stressed to the max. Parents of children with medically fragile children cannot be guaranteed that schools can keep their children safe. Ultimately, parents have no option but to withdraw their children from public school and begin homeschooling.

With the first case of Omicron detected on November 27th in the UK, today, the UK reported 90,000 cases. Pima County is still experiencing high community transmission with Delta, and the Omicron variant was just identified in Pima County this week. The concern is that the transmission rate of Omicron can easily overwhelm the hospital system. With Omicron R naught value estimated to be 3-4 times higher than Delta, we must be proactive in dampening the spread.

Preliminary data shows that twice vaccinated and boosted offers the best protection against Omicron. However, monoclonal antibodies and the Regeneron antibody cocktail are ineffective against the Omicron variant, and the Sotrovimab monoclonal antibody is in short supply.

Pima County Supervisors have the opportunity to be proactive in slowing the spread of Omicron, preventing the healthcare system from being overwhelmed, and keeping our community safe.

It only makes sense to require masks indoors if we <ever> want to get on top of covid. This virus doesn't care if we are burned out & tired of taking precautions. We can see that the omicron is raging in UK and now spreading rapidly in the northeast in the US, headed to the rest of the country. It's time to require masks indoors as well as proof of vaccination for indoor venues, otherwise we'll end up w business closures like last year. Area hospitals are already overwhelmed as are hospital personnel. Let's do our part as citizens to help mitigate covid and add less burden to our hospitals & medical staff.

No masks no vax mandates. Look on the box of surgical masks.. it says doesn't stop transmission of a virus. A virus is 40 thousand times smaller then a cross section of your hair.

We know that the shot DOES NOT PREVENT TRANSMISSION OR STOP INFECTION OF COVID.

We understand how the body functions. The unvaxxed are not spreading anything. The virus is not being mutated by people that do not have it in their body.

This last variant a is mild. Stop the insanity

Dear Pima County Board of Supervisors,

I support an indoor mask mandate for indoor public places in Pima County.

I am very concerned about the recent rapid spread of the novel coronavirus in Pima County, especially with the particularly transmissible Omicron version being here in addition to the Delta version.

Masks work to reduce the spread of this dangerous virus -- and reducing the spread is what's needed to keep the health care system in Pima County functioning.

Stress on the medical system from COVID-19 has already caused Banner Medical Centers to halt unnecessary surgeries because they do not have the needed staff.

County Supervisor Dr. Matt Heinz knows first-hand how the situation is deteriorating in Pima County.

The responsible entertainment venues in Tucson, including the Fox and Rialto theatres, Broadway in Tucson, the UA Centennial Hall and The Loft Cinema, are already requiring that patrons show proof of vaccination and wear masks.

Many members of our community are already doing their bit by wearing masks while in stores and other public places.

REC-21-20-00788 PCK/DFR
AEB

I urge the Pima County Board of Supervisors to vote YES on the resolution to require people wear masks in public places in Pima County -- which includes stores.

Pima County residents and the economy of Pima County needs for you to act swiftly to reduce the spread of coronavirus by requiring that everyone Mask Up in public places.

Sincerely yours,

Mari Jensen

Pima County resident

Please mandate masks. We have got to keep the hospitals open for the folks that need it and NOT overwhelm them because of bad governance.

Masking has been proven effective and is absolutely necessary to get us thru this winter and to a better economy.

Dear Pima County Board of Supervisors,

I am a resident in Supervisor Christy's district. I am writing to let you know that my family and I are in full support of an indoor mask mandate. We have all known for a very long time that universal masking is a great mitigation tool in this pandemic. This is a measure that I wish was already in place in our community.

Without a mask mandate, and since Pima County has been experiencing high community transmission for a while now, my family was already avoiding indoor businesses unless absolutely necessary. We were so relieved when vaccines became available to children aged 5+. Now that our family is fully vaccinated, we were looking forward to frequenting more venues. But, with an even more transmissible variant among us, we hesitate to do so now when so many in our community go unmasked.

My children also attend schools in a mask optional district, where one of our elementary schools had to shut down due to in school spread and outbreaks. I can't even describe to you the stress that my elementary child feels every school day, because of the lack of masking around them.

We also need to keep in mind families with very young children who are not eligible to be vaccinated yet. And let's not forget our hospitals that are overwhelmed. For all of these reasons, a temporary indoor mask mandate is of utmost importance. We cannot afford to allow more community spread.

Thank you for your time.

Sincerely,
Roula Khawam

We have spent the past twenty weeks dealing with exposure quarantines and classroom closures. A county-wide mask mandate would provide some bare minimum mitigation in some Pima County schools.

The correlation between school districts with mask-optional policies and school districts with employee and substitute shortages shows a solid cause-and-effect relationship. Superintendents of mask-optional school districts have previously disclosed that they do not want help from the county, and clearly, they need help retaining employees and to keep children safe.

The implication of not following public health policy of multi-layer mitigation strategies has placed the burden on already-taxed parents and teachers stressed to the max. Parents of children with medically fragile children cannot

DEC 21 21:03:09 PCKT/FB

AFB

be guaranteed that schools can keep their children safe. Ultimately, parents have no option but to withdraw their children from public school and begin homeschooling.

With the first case of Omicron detected on November 27th in the UK, today, the UK reported 90,000 cases. Pima County is still experiencing high community transmission with Delta, and the Omicron variant was just identified in Pima County this week. The concern is that the transmission rate of Omicron can easily overwhelm the hospital system. With Omicron R naught value estimated to be 3-4 times higher than Delta, we must be proactive in dampening the spread.

Preliminary data shows that twice vaccinated and boosted offers the best protection against Omicron. However, monoclonal antibodies and the Regeneron antibody cocktail are ineffective against the Omicron variant, and the Sotrovimab monoclonal antibody is in short supply.

Pima County Supervisors have the opportunity to be proactive in slowing the spread of Omicron, preventing the healthcare system from being overwhelmed, and keeping our community safe.

Additional
Comments...

Enough is enough with mandating masks and vaccines! We are nearly 2 years into this pandemic and if those worked, they would have worked by now. It's time to get back to normal and learn to live with the risk of an endemic virus that no public health policy has been able to control to this day. Lockdowns turned out to be more harmful (see rise in suicides, depression, divorce, and drug overdoses) nation wide. Mandating behavior in school or in Pima county businesses should not be the job of the board of supervisors, especially if it violates Arizona state law. Most businesses are doing the best they can to survive, they don't need an overbearing government agency telling them what to do at this stage of the game. The references provided do not prove masks are effective; in fact the recent CDC "study" of Arizona schools in Pima and Maricopa counties

has already been debunked. See here:
<https://www.theatlantic.com/science/archive/2021/12/mask-guidelines-cdc-walensky/621035/>

If you read the Bangladesh study that is also cited by the CDC, the cloth masks are shown to not have any significant efficacy in mitigating an airborne virus, just as the CDC studies prior to Covid-19 demonstrated for various flu strains. It's time to allow grown adults to make their own decisions about their health risk and quit projecting their fears onto children, who are not severely affected by Covid 19 or any of its variants. Vaccines have been effective in mitigating serious health risks and deaths but not the actual spread of the virus. It's not the school's or business' or government's job to force people to get a vaccine at this point. It's time to move on from Covid and get back to normal life. Perhaps those that are still scared and want to mandate should be the one's staying home and live in fear on their own.

 Pima County BOS - Resolution 2021-87

Dear Board Members, I'm writing to ask that the Pima County Board of Supervisors adopt the county-wide mask mandate for indoor public spaces as outlined in Resolution 2021-87.

It is proven that masking indoors decreases COVID-19 transmission rates [1]. It is, at most, an inconvenience that the community can quickly implement to keep businesses and schools humming along. There is no chance of vaccinating our way out of this variant.

Teachers and parents in Pima County schools with mask-optional policies have experienced unprecedented stress and anxiety. We have spent the past twenty weeks dealing with exposure quarantines and classroom closures. A county-wide mask mandate would provide some bare minimum mitigation in some Pima County schools.

The correlation between school districts with mask-optional policies and school districts with employee and substitute shortages shows a solid cause-and-effect relationship. Superintendents of mask-optional school districts have previously disclosed that they do not want help from the county, and clearly, they need help retaining employees and to keep children safe.

The implication of not following public health policy of multi-layer mitigation strategies has placed the burden on already-taxed parents and teachers stressed to the max. Parents of children with medically fragile children cannot be guaranteed that schools can keep their children safe. Ultimately, parents have no option but to withdraw their children from public school and begin homeschooling.

With the first case of Omicron detected on November 27th in the UK, today, the UK reported 90,000 cases. Pima County is still experiencing high community transmission with Delta, and the Omicron variant was just identified in Pima County this week. The concern is that the transmission rate of Omicron can easily overwhelm the hospital system. With Omicron R naught value estimated to be 3-4 times higher than Delta, we must be proactive in dampening the spread.

Preliminary data shows that twice vaccinated and boosted offers the best protection against Omicron. However, monoclonal antibodies and the Regeneron antibody cocktail are ineffective against the Omicron variant, and the Sotrovimab monoclonal antibody is in short supply.

Additional Comments... Unfortunately, I think the time is now to implement another mandate. I say unfortunately, because this is obviously not the direction we want to go in, but it is the right one. Preliminary data from the UK and South Africa is concerning, especially with treatments being less effective and with waning immunity.

I think it is wise to observe the data and get ahead of this problem. While I have definitely seen an uptick in voluntary mask wearing in public in the past few weeks, the public has certainly let down their guard.

Thank you!

As a concerned citizen of Southwest Tucson, I do not support vaccine passports nor mask mandates.

For those who wish to continue wearing masks by their discretion should do so. Please refrain from passing any mandate measure especially "participation" passes.

Mid terms are not too far!

Thanks,

Fernando

Dear Pima County Supervisors,

I am writing this email to strongly encourage you not to mandate a mask requirement and a vaccine passport. It is absolutely the wrong thing to do. It is stated right on the box: these mask don't prevent viruses. Vaccinated people are getting Covid left and right! I implore you to do the right thing, and not mandate a mask requirement.

Sincerely,

Steve Gabany
Pima County Resident

I am opposed to another mask mandate. MASK have Not removed this illness simply because we can't get ride of illness. Arizona has a no mask mandate and this includes Tucson and Pima County.
Thank you
