I live on the edge of the city but i'm on the county side which i am happy about because i do not like the mandates that the mayor keeps trying to push.

i am against the mask mandate taking place again. i have had all my shots so that

i can live a normal life. i feel that this is getting way out of hand.

please do not follow the city foot steps.

thank you sharon hansen a happy county resident

I am writing to you to ask that you don't impose mask mandates again in Pima County. We need to move on with our lives and wearing masks AGAIN is not the answer. Numbers never came down nor did they keep people from getting Covid, but they did hurt local businesses. WE CANNOT LIVE THROUGH THIS OVER AND OVER AND OVER...we must move forward.

Please do not vote for a mask mandate for businesses! As a business owner, I know better than the government how best to keep my employees and customers safe in order to stay in business. Customers and staff are welcome to wear a mask in my store or not, it is their choice as it should be. Please do not trample or my rights as a taxpaying citizen and business owner.

Thank you,

Beth Hargrove

Support County Wide Mask Mandate

**CAUTION:** This message and sender come from outside Pima County. If you did not expect this message, proceed with caution. Verify the sender's identity before performing any action, such as clicking on a link or opening an attachment.

I would like to express my support for implementing a county wide mask mandate. I am an educator at Tucson Unified School District. In the aftermath of school closures, we have witnessed the negative impact on our students academically, mentally, and physically. Being back in school has been a literal life saver for all of us. We thankfully wear masks, complete pool testing, social distance, and follow hand hygiene protocol. We have been successful in minimizing wide spread covid spread at Warren Elementary on the Southwest side. If the greater public was mandated to follow (at the least) wearing masks our students would be greater protected. Our teacher would be greater protected. EVERYONE would be greater protected.

A mask mandate is a not only a compassionate measure for greater society, it is a smart one for the economy. We all want to work, go to school, exercise, worship. We can continue to do this if we take care of each other. Thank you Pima County Board of Supervisors for considering this action.

In gratitude, Gina Santos 1471 W. Waterford Drive Tucson, Arizona 85746 District 5 Resident M

CAUTION: This message and sender come from outside Pima County. If you did not expect this message, proceed with caution. Verify the sender's identity before performing any action, such as clicking on a link or opening an attachment.

Dear Members of the Board of Supervisors, Pima County, Arizona

I, Nancy Fahringer, am a long time resident of the City of Tucson and Pima County, and am 85 years old. I believe there are many vulnerable people, like me, who will benefit from an indoor mask mandate. So I ask you, if one is proposed by Matt Heinz, that you vote for it, as a way of protecting the many people of all ages who may otherwise be exposed to Covid germs indoors.

Sincerely, Mrs. Philip Fahringer (Nancy) 8765 E. Bears Path Rd., Tucson 8749-9570

We are seeing a very significant increase in Covid cases throughout the county. This is also affecting children in our public school systems where cases are also increasing. I was shopping in PetsMart yesterday (on broadway) and I was one of a very few who was masked. This is not acceptable. I am "boosted," but I take responsibility for protecting my fellow citizens. I wish those going without masks would take the same reponsibility, but apparently they won't. So, the county leadership must correct this lack of civic responsibility by imposing mask mandates, county-wide, now.

Thank you.

Pima County BOS - Resolution 2021-87

CAUTION: This message and sender come from outside Pima County. If you did not expect this message, proceed with caution. Verify the sender's identity before performing any action, such as clicking on a link or opening an attachment.

# Pima County BOS - Resolution 2021-87

Dear Board Members, I'm writing to ask that the Pima County Board of Supervisors adopt the county-wide mask mandate for indoor public spaces as outlined in Resolution 2021-87.

> It is proven that masking indoors decreases COVID-19 transmission rates [1]. It is, at most, an inconvenience that the community can quickly implement to keep businesses and schools humming along. There is no chance of vaccinating our way out of this variant.

Teachers and parents in Pima County schools with mask-optional policies have experienced unprecedented stress and anxiety. We have spent the past twenty weeks dealing with exposure quarantines and classroom closures. A county-wide mask mandate would provide some bare minimum mitigation in some Pima County schools.

The correlation between school districts with mask-optional policies and school districts with employee and substitute shortages shows a solid cause-and-effect relationship. Superintendents of mask-optional school districts have previously disclosed that they do not want help from the county, and clearly, they need help retaining employees and to keep children safe.

The implication of not following public health policy of multi-layer mitigation strategies has placed the burden on already-taxed parents and teachers stressed to the max. Parents of children with medically fragile children cannot be guaranteed that schools can keep their children safe. Ultimately, parents have no option but to withdraw their children from public school and begin homeschooling.

With the first case of Omicron detected on November 27th in the UK, today, the UK reported 90,000 cases. Pima County is still experiencing high community transmission with Delta, and the Omicron variant was just identified in Pima County this week. The concern is that the transmission rate of Omicron can easily overwhelm the hospital system. With Omicron R naught value estimated to be 3-4 times higher than Delta, we must be proactive in dampening the spread.

Preliminary data shows that twice vaccinated and boosted offers the best protection against Omicron. However, monoclonal antibodies and the Regeneron antibody cocktail are ineffective against the Omicron variant, and the Sotrovimab monoclonal antibody is in short supply.

Pima County Supervisors have the opportunity to be proactive in slowing the spread of Omicron, preventing the healthcare system from being overwhelmed, and keeping our community safe.

hi bernadette,

i was looking thru some of the letters sent in about clear evidence that masks "work" when in fact, there is no real evidence to this.

this is some of the latest from dr peter mccullough, internist, cardiologist, and epidemiologist

# The Latest

# Dr. Peter McCullough: 5 Essential Truths About COVID-19

December 20, 2021 | ALL, Education, Healthcare, Politics

Internist and cardiologist Dr. Peter McCullough gave a crowd at the Reawaken America Tour in Dallas, Texas, five "talking points" to keep in mind when the conversation turns to COVID-19 at any gathering:

#### 1) COVID-19 is ONLY spread when symptoms are present.

"The virus cannot be spread unless someone has symptoms, unless someone's sick," McCullough said in an address on December 12. "They cannot spread COVID-19 They're not contagious. That's been shown now."

He elaborated:

RESURBLE STATES OF THE STATES

It's only symptoms that are related to the spread of illness and there is no asymptomatic spread. So, if there's no asymptomatic spread, as long as nobody in this arena has symptoms, there will not be a single case that comes out of this auditorium. That is an important principle. Now, that means if you're sick, if you're sick, and you're susceptible to COVID-19, please stay home. If your children are sick and they're susceptible to COVID-19, that could be the case, stay home.

# 2) Asymptomatic testing is not FDA cleared or supported by any regulatory bodies.

"Because there's no asymptomatic spread ... we never needed to close down the schools," McCullough continued. "That means we never needed to wear masks, right, because you can't spread it asymptomatically. That means that there should be no asymptomatic testing."

McCullough observed the World Health Organization (WHO) has <u>agreed</u> with this assessment since the end of June.

"Widespread screening of asymptomatic individuals is not a currently recommended strategy due to the significant costs associated with it and the lack of data on its operational effectiveness," WHO stated.

Leading up to his third point, McCullough referred to his recent <u>interview</u> with podcaster Joe Rogan, and the fact that both he and Rogan recovered from COVID-19. Yet, they both took a COVID test prior to the interview:

I said, Joe, why are we doing this test? We've already had COVID. We've already recovered. And his answer is, "Well, we have an insurance policy," and my point is people are doing asymptomatic testing for reasons other than COVID because he knew and I know that we can't get it again.

# 3) Natural immunity is robust, complete, and durable-it's "one and done."

"Once somebody is recovered from COVID-19 It's one and done," McCullough emphasized. "It's one and done. You're done."

Turning to the audience, he asked how many have already had COVID.

"It's over with," he asserted. "The pandemic for you is over with, you can't get it again."

"Now you can get faked out by false positive tests," he cautioned. "But you can't get the illness a second time and we know that now. This is airtight. There's over 130 papers that support this."

McCullough noted the Centers for Disease Control and Prevention (CDC) <u>admitted</u> in November the agency has no record of a case of reinfection.

New York Attorney Elizabeth Brehm asked the CDC for "documents reflecting any documented case of an individual who: (1) never received a COVID-19 vaccine; (2) was infected with COVID-19 once, recovered, and then later became infected again; and (3) transmitted SARS-CoV-2 to another person when reinfected."

The response from Roger Andoh at CDC was:

A search of our records failed to reveal any documents pertaining to your request. The CDC Emergency Operations Center (EOC) conveyed that this information is not collected.

"Now the CDC has got 41,000 cases, sadly, of full-blown vaccine failures that resulted in hospitalization and death," McCullough went on, adding, "41,000 vaccine failures, they don't have a single failure of natural immunity."

"Natural immunity is our way out of the pandemic," he stated. "This is very, very important":

Think about this: if we don't recognize natural immunity what happens? Oh, you get COVID-19. Or, you could get it again. Take a vaccine. Oh, you got COVID again; take another vaccine. It just keeps going and going. Wear masks, go into lockdown, or you can get it again. Let's lock down our seniors in a nursing home for the 24th month of the rest of their lives because of this false narrative that you can get COVID-19 a second time or a third time.

### 4) COVID-19 is a treatable illness in high-risk patients with early sequenced multidrug therapy.

"The illness is imminently treatable ... we can treat COVID-19, and we can actually markedly influence the natural history of the disease by intercepting it early, and those innovations were discovered early in 2020," McCullough noted.

In the video, McCullough provides actual examples of early at-home treatments available for COVID-19.

"Everybody should have a COVID-19 survival kit at home," he stressed. "We should really take charge of this. This viral pandemic is a war. It's a war and it's up to us to step up and start to fight this thing."

5) The genetic COVID-19 vaccines are not sufficiently safe or effective for the public. Vaccine mandates should be dropped, and the vaccine program should be paused for safety review.

McCullough delivered his final point:

I don't think anybody had a problem with vaccines a year ago. But we now know as they're broadly used in the general population, like many new products, it has not worked out and we have seen unacceptably high rates of death that occurs after vaccination. About 50% of the deaths that are recorded happen within 48 hours, 80% within a week.

"In the U.S. CDC VAERS [Vaccine Adverse Event Reporting System] we have 19,000 deaths, about half of those are domestic," he observed, adding:

We have 31,000 now that are permanently disabled. That is unacceptable for a medicinal product in the United States. And it's unacceptable for our agencies not to review safety for us. And it's unacceptable for our FDA or CDC or NIH and our White House Task Force. It's unacceptable for them not to provide a safeguard for our citizens.

McCullough ended with a look to the immediate future:

Moving forward, the vaccines are not enough to bring us out of the pandemic. I am going to close by calling for, at this point in time, a complete and total ban on any vaccine mandates.

I'm calling for an immediate pause, a pause in the public program on Pfizer, Moderna, and Johnson and Johnson, until we can do a deep dive on the safety review.

"Younger people, like everyone in this room, I think is in great shape to work together on developing herd immunity, and closing out the pandemic," he concluded.

https://lumen-news.com/2021/12/20/dr-peter-mccullough-5-essential-truths-about-covid-19/

thanks very much for your time, moriah

# ATTN: Pima County Clerk of the Board's Office

We live in the United States of America, the land of the free. It is unconstitutional to make people wear masks and to require a Covid passport or vaccine. I do NOT support this. I do not support the wearing of masks, as it is just a mechanism to destry / harm the immune system. This has been known since the 1918 flu, which was the very 1<sup>st</sup> weaponised test by the Rothchild's. I do not support the vaccine, which has over 25 mechanisms to kill the human host, and convert humans to transhumanism. These mandates are illegal, Satanic, and go against God. Please do the right thing, and stop taking our rights away from us, you do not have the authority. If you proceed, you will get yours!

Sincerely, Jon Guthrie

I am against this proposal of mandatory masks in businesses. The virus can still get thru the masks which are truthfully useless.

Look at all the other places that imposed a mandate ... their case numbers went thru the roof anyway. So someone wears a mask then takes it off with their hands and then touches their face... They just infected them self. Think about it. It's really not an effective way to address this issue.

I and hundreds of people will refuse this mandate if imposed. We'll take our business elsewhere and Pima County will feel the end result economically.
