To Whom it May Concern

I do wish that I could attend this hearing to voice my opinion about this, I see no reason on why they can't put another house on their property and I truly feel that what ever needs to be done for those who want to put another home on their property should be done, I do know how they feel I bought my home out there for the purpose of putting my other 4 Bed 2 Bath home on the property and was told by the previous owner that it was zoned for 2 homes and then when I was getting ready to move my other home out there was told I couldn't unless it was for someone I was taking care of and being a foster, adoptive parent the plan was for the other home and my adult children to be close by in case something happened, now we just regret buying the property because we feel we were lied to.

So yes I feel that it is their land and if they want to put another home on it they should be able to and everyone who wants to put another home on their property and they have an acre or more should be allowed with no issues

Sincerely
Barbara Martin
