Chief Information,

Re:

February 17, 2015, Board Meeting; Consent Calendar Item #6, Network Equipment and Services; District 1

Supervisor's Clarification Items.

The master agreement(s) being recommended for award for Network Equipment and Services provide a mechanism for optimizing competitive pricing for equipment and services. The solicitation was just a proxy to get the most fiscally responsible vendors in place. In other words, the solicitation provided for a determination of the most competitive bids which were based upon categories of equipment likely to be purchased, but were not for specifically identified equipment / services. The solicitation was based upon a discount from list price. Therefore, there is no specific connection between the bid amount and the recommended award amount (estimated annual spend).

When actual purchases are required, the two successful awardees will compete again (against each other) for the specific equipment / services.

At the February 17, 2015 Board of Supervisors meeting staff was directed to respond to the following questions.

#### Question 1:

Why are we paying more than the bid amounts; \$3,001,090 versus \$1,972,299?

#### Answer 1:

The Bid Amounts for Insight Public Sector, Inc.(Insight) and World Wide Technologies, Inc.(WWT) were derived through the bid process where respondents were asked to provide discounts on the estimated spend on four different product categories. These spend estimates were for bid purposes only and were not accurately indicative of the estimated annual spend for Network Equipment and Services.

Post bid, ITD requested award amounts of \$1,500,545.00 for each recommended vendor, totaling \$3,001,090.00. That request was communicated by ITD via a signed recommendation for award form.

Historically, the bid process has provided competition for Pima County's networking equipment periodically on a five year procurement cycle. In order to optimize competition throughout the life of the contract (Master Agreement) a strategy was developed in November, 2014 on a new bid to allow for up to three vendors to be awarded the full amount of their contract that Pima County estimates may be needed in any given fiscal year.

This led to a bid process in which we identified our estimated annual spend of \$1.5 Million, and asked each vendor to bid the greatest discount from list price for all catalog items. Insight and WWT were the lowest bids. As our estimated annual expenditure is \$1.5M, our goal is to provide a continuous competitive bidding process between the successful respondents. To accomplish this, we believed we needed an equal award of \$1,500.545.00 to both Insight and WWT, which for award purposes totals \$3,001,090.00.

However, the intended competition and Master Agreement utilization can also be accomplished by awarding each of the two respondents with ½ of the total estimated annual spend and providing the authority for the Procurement Director to reallocate funds between the two vendors should one vendor be more competitive and obtain the greatest share of business. The Board agenda item summary has been revised accordingly.

### Question 2:

Funding source shows that only \$2 million are available, why are we spending \$3 million?

#### Answer 2:

The award should only be for the estimated annual spend of \$1,500,545.00. Any required increase in excess of this amount must be approved by the Board.

### Question 3:

WWT issued several comments and requests for modifications to the Offer Agreement, have those modifications been addressed?

#### Answer 3:

The exceptions WWT submitted with their bid (see below) were negotiated between WWT and County Attorney, Procurement and Information Technology. The final language was agreed upon by all parties on February 13, 2015 (see below).

It is important to note that exceptions to Pima County's terms and conditions routinely occur, however those exceptions can usually be negotiated and agreed to by the parties. Any changes to our standard terms and conditions are ALWAYS approved by County Attorney.

### 4. PRODUCT OR SERVICE SPECIFICATIONS & SCOPE:

Pima Count Information Technology Department ("PCITD") is seeking to purchase networking infrastructure equipment. Networking expectations have increased over recent history with the County adopting Voice over IP (VoIP), converting our access layer switching equipment to Power over Ethernet (PoE), the increased demand for wireless connectivity, and the need for greater levels of bandwidth within and between our data centers and larger facilities. Additionally, fiber channel networking technology is now required within and between PCITD"s data centers which includes WAN/MAN connectivity to support our SAN environment. Currently our network storage demands are growing at the rate of one terabyte per month which further strains SAN and networking resources. With the critical new initiatives PCITD is implementing, a resultant effect in the data center is the need for more effective and efficient load balancing of systems and networking solutions that fully support that need which will require additional specialized networking equipment.

Given that nearly 100% of the networking equipment installed in Pima County governments network infrastructure is Cisco, and given the interconnectivity difficulties that would exist with mixing vendors" equipment and protocols in a complex enterprise network environment, it is the expressed intention of PCITD to seek purchasing of Cisco and F5 networking equipment for specific data center, LAN, WAN and MAN needs.
