Chuck Huckelberry, County Administrator  
Pima County  
130 W. Congress St., 10<sup>th</sup> Floor  
Tucson, AZ 85701

Dear Mr. Mr. Huckelberry,

The Southern Arizona Architects and Engineers Marketing Association (SAAEMA) is a self-governing, non-profit organization for marketing and business development professionals in the architectural, engineering, construction, and design-related industries. As local architects, engineers and contractors of this community, we appreciate all of the hard work and diligence the Pima County Bond Committee has provided in putting together recommendations for investing in Pima County.

The \$653M bond package is a needed investment for the growth of our community and we support approval of the package by the Pima County Board of Supervisors. The projects included in the package represent an investment in our economic future as well as increasing our quality of life. SAAEMA supports this plan because of the positive impact it will have on Pima County and Southern Arizona.

We encourage the Board of Supervisors to approve the 2015 Bond Package and we pledge our support of a bond election in fall 2015. These projects are needed for future economic health and growth throughout our region.

Sincerely,

Southern Arizona Architects and Engineers Marketing Association

---

**Pima** County Supervisors:

I've been following the proposed **Pima** County Bond Election in the newspaper. I know the roads are bad and I'm glad that there is some money in there for roads.

However, my main interest is in environmental issues. I've worked with the Sierra Club, the Coalition for **Sonoran** Desert Protection Plan, and am an active birder. I urge the members of the Board of Supervisors to approve the public vote on the Bond Election as it now stands. I urge you not to further reduce the \$95 million for new open space purchases and to stand up for the Sonoran Desert. Pima County Citizens, and wildlife need the additional planned open space.

Thank you for your consideration.

Peter **Bengtson**
