Please urge Ducey to reexamine what is essential. Churches (were many congregated), spas, nail salons, etc. are NOT essential. We need to all limit contact. It only works if we all do it.

Thanks,
Janel

With the Governor's proclamation of "Stay-At-Home," I read with interest about the reduction in active employees amongst County workers. I assume that this includes the Streets & Road employees also. Well, at least Pima County now has a valid excuse for not fixing and repairing the potholes on Wentworth Road, Colosso Cave Rd, Calle Rinconado, Wetstones Rd. I'm sure there are many others.

Rest easy County Supervisors, the heat is off for a while.

My question is about the golf courses in the county being open. I know it sounds like a good way to do something and social distance. But, nothing is farther from the truth. Golf is a social activity. People are not distancing themselves. (I work at a course) They are riding 2 in a cart. Etc... Plus they all have to go into the pro shop(whether it is 1 or 10)and stand face to face with counter personnel and complete their transaction. While transmitting the virus all the time. Then there is the next guy and so on??

Let's spread the word, not the virus. This has to be all in.

Thank you

We keep hearing about the number of victims but do NOT hear about the number of recoveries. This number needs to be reported as well since it assists in making the correct decisions. This needs to be reported daily with the rest of the numbers being reported to the public so as to alleviate fear in the general population.

Hello Pima County, I will make this short and to the point. The homeless population is out of control and trashing out the bike paths. Please run them off. Then have the unsanitary messes cleaned up.

Looking at some of the hobo villages that they have built along Aviation path between Country Club and Rattlesnake bridge are just disgusting. They are unsanitary and just plain old not fit for human occupancy. They also dominate the Santa Cruz side as well.

We all know what happens next when we let our unsanitary conditions get out of control, just ask China how that's working out. China took the world to it's knees because no body said "Hey lets say we clean up a bit around here".

Also the city park on the corner of Speedway and Stone is over run by homeless, Last week I observed a homeless guy washing his greasy hair in the water fountain. Just who would want to drink out of that fountain next, I certainly don't / would you.

Last weekend when riding the Santa Cruz bike path going under 22 street and a homeless man was sleeping in the travel lane for bikes. I told him that is a bad idea, you will get hit. He proceeded to yell out nasty profanity at me. I just kept on riding for my own safety. So if this guy get hit then just who's fault is it really?

This is a public safety problem , a sanitary problem and just plain old an eye sore for us who ride the Loop daily. Their are no rest rooms near most of these hobo camps so what do you think happens when nature calls, we bot know the answer to that one. They just simply poop in bushes. I seen results laying on the ground you might say.

Homeless along the loop gives Tucson a black eye to our winter visitors along with what ever element of crime they bring. They are the class of people that prop up the economy in winter months, lets give them a reason to come back. I ride the Loop all the time and I did have a few snowbirds make mention about too many homeless trashing out the Loop.

To fix this problem is not real hard, just have a few TPD officers ride the path and give warning to vacate, After all the signs say only day light hours are you to be on the bike path.

APR 02 2020 07:38 PM CCKF:RD

I have lived in Tucson since 1975 and I really do care about this town. Lets say we do a little cleaning up before they call us Wuhan of the west.

I did include a few PICs. I have more PICs but point made.

Thank you for your time & concern

Subject: New Arizona resident - No Healthcare

This message and sender come from outside Pima County. If you did not expect this message, proceed with caution. Verify the sender's identity before performing any action, such as clicking on a link or opening an attachment.

I moved to Arizona at the very end of January. I won't be covered by my new employer's health insurance until May 1st. I am currently furloughed due to virus symptoms.

I tried Marketplace but was denied the Special Enrollment period option. That makes no sense to me, as a new resident of the state, but even less sense during a health crisis like COVID-19.

I submitted an appeal, but even with expedited priority, they estimate at least 30 days to review my appeal.

Other states have lifted restrictions and opened enrollment. What cost effective options does someone like me have? Employed, awaiting start of coverage.

Thank you,
Kate

Why are nail and hair salons considered 'essential'? The hair dressers are not wearing masks! Since when does vanity take precedence over human lives?

The adult parlors and tattoo places are also open. Why?

Thank you

Many many people do not equate 'wash frequently touched objects often' with their cell phones. People are wearing gloves, touching grocery store items, using cell phones and then putting them back in their pocket. So what's the benefit of wearing gloves?

Please include something about cleaning cell phones on public messages.

Thank you

It seems the young and the old are ignoring social distancing. The governor has allowed golf. In Green Valley we see foursomes riding in golf carts together and sitting at McDonald's outside at tables. To be fair to the rest of us who are trying to stop the spread I would like golf courses closed and the police patrolling areas to warn people about being out not following the shelter in place order.

Those of us who live in Pima County have a right to know more about the status of COVID-19 in our county. No one's privacy is violated if you inform the public about where the cases are located. I live in Green Valley and too many people are complacent believing that all the cases are in Tucson. Knowledge calms fears. Please keep the citizens of Pima County in the loop.

Hello, I have people close to me who work in the recreation department and I'm concerned at the need for them to come to work even though they are not considered "essential" employees. They are putting their lives at risk every day by going to work and I feel that this is unnecessary. Can you please look into this issue?

Thank you

Why do I see Construction workers doing roadwork and not social distancing? Why do the Board of Supervisors need "closed door" meetings?

Why issue non essential and essential employees work laptops if you won't allow them to telecommute from at home.

Subject: Trailheads should be closed immediately to stop the spread

This message and sender come from outside Pima County. If you did not expect this message, proceed with caution. Verify the sender's identity before performing any action, such as clicking on a link or opening an attachment.

There are literally hundreds of people interacting with each other at the trailer heads. Pima Canyon trailhead for example is overfull every day. If you assume 2 people per car that is 100 people in a very small area. These people then leave the parking lot possibly infected and then go and spread the infection to others they interact with throughout the day.

The county needs to take additional action and identify areas like these and shut them down. The federal government is calling for no groups of ten or more to congregate. These parking lots have hundreds.
