

ADDENDUM MATERIAL

DATE 6/9/20 ITEM NO. ADD 5

MEMORANDUM

Date: June 5, 2020

To: The Honorable Chairman and Members
Pima County Board of Supervisors

From: C.H. Huckelberry *CHH*
County Administrator

Re: Additional Information - Update to the June 9, 2020 Board of Supervisors
Memorandum Regarding COVID-19 Actions

As I indicated in my previous memorandum, I would update the Board with the latest information regarding COVID-19 infections and hospitalizations. This includes updated tables and documents I previously forwarded to you on June 4, 2020. The number of COVID-19 cases would be modified and substantially different from that shown in the previous update. The number of cases per week, particularly in Week 22 has increased from 171 to 456. This increase is largely due to the last few days of case reporting being as follows:

Date	Number of New COVID-19 Cases	Number of Deaths	COVID-19 Testing in Pima County
May 31, 2020	55	0	1,293
June 1, 2020	14	0	437
June 2, 2020	114	6	1,913
June 3, 2020	131	5	1,407
June 4, 2020	42	6	484
June 5, 2020	214	0	2,810
June 6, 2020	*	-	-
June 7, 2020	*	-	-
June 8, 2020	*	-	-

*You will notice I have left blank spaces for June 6 through June 8, this information will be included in an update by noon on Monday for your discussion at the June 9, 2020 Board meeting.

As you can see, the number of cases reported on June 5 is substantially higher than any day since March 9, the beginning of the pandemic in Pima County. The number of new cases reported on June 2, 3 and 4 is also significantly higher than any previous high reporting day (which was May 8 with 67 new COVID-19 cases).

In addition, testing has increased substantially from approximately 1,500 per week to now 7,000 to 8,000 per week.

The Honorable Chairman and Members, Pima County Board of Supervisors
Re: **Additional Information - Update to the June 9, 2020 Board of Supervisors Memorandum Regarding COVID-19 Actions**
June 5, 2020
Page 2

At this time, it is difficult to tell how substantial the increase is and if the increase will be sustained. The next few days should begin to provide a more definable trend. There are a number of factors that can lead to the variance of these cases, including increased testing as part of a statewide testing blitz, overall increase in testing availability, holidays such as Mother's Day and Memorial Day and reopening of public spaces. It is important to remember that because of the time it takes for someone to become ill, seek testing and allow time for the test results, the data we are now seeing happened two or more weeks in the past.

Hospital admissions are also on the rise as indicated in the table below:

Week of	Med Surg Admissions	ICU admissions
5/11	5	7
5/18	21	8
5/25	30	13
