Good afternoon Chuck,

I am sending this from my personal email which I have had to utilize due to the VPN file randomly disappearing from my county computer every few weeks. This has been a problem for years and have brought my computer in for "repair" which IT staff has fixed only to have the vpn file disappear in 1 to 2 weeks each time they fix it. They also have to take my pc out of my office to repair each time which is a tremendous amount of effort.. Given just 2 months left, I am not sure whether you want IT staff to spend additional hours attempting to fix the problem. They have tried to no avail many times in the past. The "fix" only lasts a week or two.

## Meeting notice Potential problem:

The issue I am concerned about is due to the issue I have had with my county computer, I have always had to access the agenda and addendum from the internet vs the intranet.

I have recently had to request my staff email it to me since it is no longer available on the Board meeting tab.

I have attached the screen prints I just did from the internet. As you can see, the addendum is not posted where it should be available under board of supervisors meeting tab.

I am concerned that we have not properly noticed this meeting and request the clerk office fix this issue.

I request that you have this email distributed to all board members by the clerk of the board and entered into the official record.

I have copied my staff to ensure this email is public record.

Please advise regarding whether this addendum can be heard at the October 20, 2020 BOS meeting.
