This e-mail is to inform the Board that as a land owner within the 1000' Notification area, I remain opposed to this rezoning on the basis that it will significantly impact the drainages involved. This may result in up-stream flooding. The area to be rezoned contains several drainages whose preservation has not been properly address in any of the development plans previously submitted.

I believe the only way to adequately insure proper drainage of the areas up stream of these properties is to return them to the SR zoning status they previously held and thereby limiting development of drainage areas.

Thank you
