

Dear Supervisor Heinz,

I am writing to express my strong objection to your agenda items relate to mask and experimental shot mandates. Please use the correct terminology because the shots are NOT vaccines.

By imposing these mandates, you are violating the civil rights of all members of this community. What gives you the right to force experimental medicines on anyone? County employees have the right to make their own medical decisions. Any decisions I make regarding medical treatment is between me and my doctor. With all due respect sir, YOU are not my doctor.

Will Pima County be paying medical bills for employees who experience adverse reactions? My health insurance doesn't cover experimental medical/drug treatments. Who will pay these costs in the event a county employee has an adverse reaction?

Terrorizing children by forcing them to wear masks which provide little, if any, protection is inhumane and despicable. Children can't learn when they have headaches from oxygen deprivation! Children can't learn when they are filled with angst and fear.

I await the citation of the scientific data you are using to make these draconian decisions. I have yet to see ANY data that would support these measures. In fact, the data shows just the opposite.

Many people have been harmed by these experimental drugs. Many have died! These experimental drugs are unproven and dangerous as outlined by the waiver that county employees will be coerced into signing prior to receiving the shot.

I recently saw a Pima County advertisement to recruit drivers to transport illegal aliens to various facilities. Your ad noted that this included transporting covid positive individuals. Why aren't you focusing on the millions that are flooding into this country with active covid infections? Why aren't you doing your job and getting to the root cause? The criminal invasion of our country is directly correlated with this most recent spike. It is called the Biden/Democrat party covid variant. The democrat party owns this.

The last time I checked, the United States has a constitution and we still enjoy the freedoms and rights afforded by the constitution! Shame on all of you who vote in favor of further harming our children, your employees, and our community with these mandates.

I will NOT comply!

Most Sincerely,

Ally Miller

Pima County resident

District 1

Taking away choice, and mandating people to get this vaccine is absolutely the worst decision Pima County could make. Especially as we enter the Cold/Flu season, this will ensure staff shortages because nurses, who are already working with reduced staff, will walk or let themselves be fired. This goes against the oath we take as Nurses and Health Care Workers, not to force anyone to take a medication, treatment, examination, or vaccine that they are of sound mind and body to be able to turn down after having informed consent! This will not stand for law enforcement as well, they are already experiencing high shortages in the workforce, as are the Health Care industries, and will also walk out or let themselves be fired. This will be extremely detrimental to our community and I highly encourage that Arizona with all Counties reject the idea to mandate vaccines. This will not in a court of law, and many wrongful termination cases will be flooding our court systems as well! Thank you for your time and consideration in this matter.

Amery Dunaway, RN, BSN.

**Comment**

Vaccines appear to be driving the emergence of variant strains of COVID-19 (SARS-CoV-2). Viruses do not want to kill their human hosts as they need those human cells to continue their existence utilizing the cells machinery to make more viruses. So when viruses mutate, they usually become weaker but more infectious. These vaccines are perpetuating the formation of deviant strains. Why this rush to get everyone vaccinated? The vaccinated individuals are becoming sick and potentially hospitalized (although one does not know if they were hospitalized for other reasons than infection with the delta strain) as well as unvaccinated individuals. Seems to this scientist that the vaccine has not delivered on its promises. So why continue to vaccinate using this unproven EUA injection? This vaccine has many serious health consequences and if it was any other experimental vaccine, it would have been withdrawn long ago. Individuals should have a choice to get the vaccine or get the delta strain (which is now the predominate strain in the U.S.) and be treated with medications such as hydroxychloroquine, azithromycin, zinc, ivermectin, and monoclonal antibodies. Contrary to the mainstream media, these drugs work. Natural immunity from actually recovering from the virus is robust, long lasting, and protective and does not require a booster. Catch the virus, treat with common medications listed above, recovery and have life-long immunity. Seems like a no brainer to me. Have all your loved one been vaccinated with the real injection versus saline? Will you subject them to this unproven (vaccine) injection? Do you want to deal with the serious myocardial, neurological, and other long-term consequences? Remember this is experimental and all of us are the FDAs, CDCs, and pharmaceutical companies laboratory rats. Individuals getting the injections have not been able to give informed consent as they have not been provided with the alternative treatments and the possible consequences. Just recently, the public has been able to learn of the serious side-effects of the injections. Think Nuremberg Trails. Needless to say, I do not support the vaccination of others with this experimental injection. Mary Grace Werner

To whom it may concern:

This letter serves to inform you that you are in direct violation of the Arizona State Constitution, Constitution of the United States, The Bill of Rights, USC code 360-666 and Governor Ducey's order 2021-09.

Taking an unproven, untested vaccination with only an emergency use order by the FDA is not only dangerous to the populace, but unlawful!

Your violations of the above codes, orders and Bill of Rights, as well as violation of medical rights, is unacceptable and against the law!

No one should ever have to be subjected to forced vaccination against something that "Dr." Heinz claims is deadly, when there are ZERO DEATHS and is more than 99% survivable and treatable with proper medical treatment, including Hydroxychloroquine, Ivermectin, Zpac, Zinc, Vitamins D and C, and Budesonide, given in the right dosages and combinations.

These will lift the virus from an individual! Your lies to the public are heinous! "Dr." Heinz, in our opinion, should have his license removed for not affording the proper treatment recommendations to those who fall ill. Doctors here who have successfully treated patients who got ill were cured within 2 days and were able to go back to work. This is gross malpractice and "Dr." Heinz should be sanctioned and/or have his license removed!

"Dr." Heinz should be ashamed of himself with what was written as his reasons for wanting such a dreadful mandate passed. It sounded like sour grapes and a 2 year old having the worst kind of temper tantrum! One's whining, sniveling and complaining should be no excuse for a mandate such as this! Further, this minor illness is no reason to claim it as an "outbreak" when clearly, it is not!

Those who are in hospital at this time are 80-90% FULLY VACCINATED! And the hospitals are NOT full as claimed in false media reports and those willing to lie for a government facility to unnecessarily lie to a public who doesn't want anything to do with this claimed virus issue any longer.

Furthermore, everyone knows now that the PCR tests used since the start of the claimed "pandemic" have now had their emergency use orders removed from the FDA for showing too many false positives and can no longer be trusted! In addition, it has been proven that there are NO TESTS that can show, or claim to show, any variants! You cannot show proof of any claim made in your request for the forced vaccination of anyone!

In addition, to threaten someone's lives and livelihood all over your illegal demands and unfounded accusations and claims of any "variants" of coronavirus warrants investigation into several violations of the Civil Rights laws, blatant discrimination based on someone's medical status, and forced coercion to get something that should be a CHOICE!!

Your usurpation of all rights of those in the county is tantamount to tyranny in the worst form and, again, illegal!

You are hereby on notice that you are now in direct violation of the above laws and codes! If any board member signs off on this ILLEGAL ACTION, you will be subject, but not limited to, arrest and punishment for your illegal actions!

CEASE AND DESIST IMMEDIATELY!

**Subject:** URGENT: Stop EUA Vaccine Mandates

**Importance:** High

CAUTION: This message and sender come from outside Pima County. If you did not expect this message, proceed with caution. Verify the sender's identity before performing any action, such as clicking on a link or opening an attachment.

Dear Pima County Supervisors,

I ask you to seriously consider the magnitude of tomorrow's decision to mandate any Covid 19 injections. Banner hospitals have struggled to even break 50% vaccination rates among employees. They offered money incentives that did not move the needle (pun intended).

But just let that sink in... This is a massive number of medical professionals at just one major medical organization here in Pima County. They've been at the front lines of this pandemic and they are still choosing to not get this particular vaccination in astounding numbers.

Banner has decreed it a fireable offense, other organizations are following suit. The odds that this creates major staff shortages and other patient harming effects in Pima County are terrifying.

The treatments and medications individuals choose to take, regardless of extenuating circumstances, are completely up to the individuals themselves. It's utterly astounding that en masse major businesses and government organizations are pushing forward on this.

As representatives of this county, please consider the implications. Consider the hard working Nurses, Techs, Practitioners, Cafeteria workers, IT folks, etc. Many of the same people who may have even taken care of you. All these hard working people will now either be coerced or fired.

Please have some compassion and consideration tomorrow for folks who want to be healthy, are dedicated to taking care of others, and are merely asking to preserve the right to choose their medical treatments.

Regardless of your position on the vaccine, I have a simple question. Is there a better approach, and will this create more harm than good? I personally believe mandates are polarizing and an overstep, and that there is way more pushback than you are expecting.

Please open up your hearts and minds. Be proud when you look back and remember you made the right decision to not only preserve the freedom of choice, but also to minimize the undue suffering of some of the most heroic residents in Pima County.

Respectfully,  
Greg DeMeritt Jr

**Subject:** Vaccine Mandates for Healthcare Workers

**CAUTION:** This message and sender come from outside Pima County. If you did not expect this message, proceed with caution. Verify the sender's identity before performing any action, such as clicking on a link or opening an attachment.

Pima County Board of Supervisors,

As you consider your vote to require all Pima County healthcare workers to receive the Covid vaccine please consider the impact of your decision.

Vaccines usually go through years of research and testing, and must stand up to strict safety standards. The COVID vaccines have not had these lengthy studies and have been considered only for emergency use. As healthcare professionals and free citizens, we must be allowed the freedom to choose the risks we take in regards to these vaccines and contracting the virus itself. The information available to us is constantly changing, with officials changing their positions about the efficacy of the vaccine, whether it actually affects transmission, and what the side effects are from the vaccines themselves.

We are people who have dedicated our lives to the care of others and do not make these decisions lightly. We have seen the impact of COVID in our community, as well as the politicalization of the virus as it continues to impact our rights and liberties.

Many healthcare workers will be forced to decide between their own health care choices and their jobs, and I am afraid that many will forfeit their jobs. There is already a staffing crisis and this will only make the problem much worse. The community will have to look to you for answers when they are unable to get the care they need.

We ask that you reject vaccine mandates for healthcare workers, and all others as well.

--

Amber Elmer

To whom it may concern:

I am a Registered Nurse here in Tucson Arizona, and I am writing as a request to please NOT mandate vaccinations for healthcare workers.

Although I am currently fully vaccinated, I do NOT AGREE to additional "booster" vaccinations. On a moral ground, I do not believe anyone should be mandated to be vaccinated to continue employment; However, I do agree with mask requirements in lieu of. Please please please do not force healthcare workers to chose.

Greetings,

Please vote to NOT mandate the covid injections for anyone.  
These shots are leading to death, health complications, miscarried babies, and long term health issues.  
Just get out and talk to people who have received them, to know and understand.

If you mandate these injections, more people will die unnecessarily.  
If you mandate for healthcare workers, people will not get healthcare because employees will lose their jobs & there will be a shortage of staff to care for the sick.

Put your money and time and resources into treating Covid + people.  
Stop the politics.  
Let people have FREEDOM to choose to get the vaccines or not.

Thank you,  
Concerned healthcare, Frontline worker,  
Emily

**CAUTION:** This message and sender come from outside Pima County. If you did not expect this message, proceed with caution. Verify the sender's identity before performing any action, such as clicking on a link or opening an attachment.

Dear Sir or Ma'am, I was just recently able to see my oncologist in Pima County. It had been years. I can't imagine what a hardship it has been for those whose cancers were actively ravaging their bodies. My daughter died 03/18/2020 from Metastatic breast cancer. We were able to get her ashes before the shutdown. What a great fortune that was! If you decide to mandate the shot to all healthcare workers in the near future and threaten their loss of jobs in Pima County it will stranglehold the care for all of the residents of Pima County. I am so concerned about the move toward the loss of our constitutional rights to freedom of religion, speech, and liberties. The loss of civil liberties in this across the board approach to stopping the virus is beyond absurd it reeks of a new type of class warfare. I love that people who have taken the shot are also screaming for the freedom to CHOOSE to take the shot or not.

There are other ways to slow the virus. How about an Ellis Island approach to the thousands of people from other countries? People with health issues were put in quarantine, hospitalized until they were well. You know these people have been spread throughout the United States with active Covid. (Thus the national spread.)

In June I ordered furniture that I normally could pick up at the time of purchase but because of Covid I won't be able to pick it up until mid November. That is just crazy. Imagine every job and the economy brought to a standstill because people will choose their right to say no over your maligned virtue signaling choice to force people to do your will. You will destroy our county and our people if you make that choice. We the people just don't matter to you the politicians at all. Debbie DeMeritt

**Sent:** Monday, August 9, 2021 2:45 PM  
**To:** COB\_mail  
**Subject:** Vaccine Policy

**CAUTION:** This message and sender come from outside Pima County. If you did not expect this message, proceed with caution. Verify the sender's identity before performing any action, such as clicking on a link or opening an attachment.

Dear Board of Supervisors,

My name is Frank Baden and I am a loyal, yet concerned, employee of the city of Tucson, having worked as a civilian member of TPD for the past twelve years. I am also writing as a resident of Pima County, on behalf of my family, to urge the board to oppose any policy that would mandate Covid-19 vaccinations for Pima County employees. Such a mandate would be counterproductive to the county's efforts to prevent a loss of jobs and services, and would be an unnecessary punitive step in combatting the much less severe delta variant responsible for few hospitalizations and deaths, to date. Those wishing to avoid the vaccine may have good personal reasons for doing so, but it must remain their choice, as it is in other medical circumstances. Denying and/or leveraging medical choice is a slippery slope toward tyranny, and politicians should not be mandating medical choices, especially when the science is rapidly changing, and new information is constantly emerging regarding the efficacy and longevity of the vaccine and its role in causing the emergence of new viral iterations.

From a legal standpoint, Article 4.2, Section 36-681 of SB1824, which was recently incorporated into the passed and signed budget by Governor Ducey on 6/30/21, deals with Covid-19 passports/prohibitions. It reads:

NOTWITHSTANDING ANY OTHER LAW, THIS STATE AND ANY CITY, TOWN OR COUNTY OF THIS STATE ARE PROHIBITED FROM ESTABLISHING A COVID-19 VACCINE PASSPORT OR REQUIRING EITHER OF THE FOLLOWING: 1. ANY PERSON TO BE VACCINATED FOR COVID-19. 2. A BUSINESS TO OBTAIN PROOF OF THE COVID-19 VACCINATION STATUS OF 2 ANY PATRON ENTERING THE BUSINESS ESTABLISHMENT. 3 B. ANY LAW OR ORDINANCE ESTABLISHING A COVID-19 VACCINE PASSPORT IS VOID AND IS NOT ENFORCEABLE AGAINST ANY PERSON OR BUSINESS LOCATED IN THIS STATE.

A vaccine passport is when proof of vaccine is required in exchange for something else, like a job. No political subdivision within the state may impose a vaccine passport and doing so will likely expose the county to untold justified lawsuits when affected individuals are tied to that subdivision directly through employment or contract. Protections sealed under Executive Order 2021-09 are set to expire on September 29, 2021 when the aforementioned permanent legislation takes effect.

On 7/30/21, The CDC published on its website a study concluding that during the month of July 2021 in Barnstable County, MA, 74% of the 469 identified new cases of Covid-19 occurred in fully vaccinated people  
[https://www.cdc.gov/mmwr/volumes/70/wr/mm7031e2.htm?s\\_cid=mm7031e2\\_w](https://www.cdc.gov/mmwr/volumes/70/wr/mm7031e2.htm?s_cid=mm7031e2_w)

These results are contrary to the established narrative that we're facing a "pandemic of the unvaccinated," and further indicate, along with 518,769 reports of vaccine injury and 11,490 vaccine related deaths on the VAERS website (as reported by the Liberty Counsel, as of July 23), that these emergency authorized drugs must not be mandated, even after eventual approval by FDA. It cannot be acceptable that the populace is being used as

collateral damage to facilitate any agenda, be it in the name of "health" or otherwise. It is one thing to be a casualty of one's own decisions, but quite another to be a casualty of a government claiming to protect you from "it." We must assume the risk, not government. This is exactly why the Nuremberg Code was established after World War 2. Historically, every vaccine program has been shut down when it approached only a fraction of these reported casualties. Furthermore, these drugs do not even work like traditional vaccines, and can be more accurately described as experimental gene therapy in their mechanisms of action. Because of the unpredictable nature of the spike protein and how they've manifested, it is unwise and unhelpful to make generalized claims about long term health repercussions at this early stage.

I enjoy my career with the City of Tucson and love the productive feeling I get from serving the public daily. I could never have imagined that govt overreach in response to a virus that was created with our own taxdollars in a foreign lab would ever have threatened to cut short so many of our careers. My family, comprised of highly educated doctors and public servants, has spent many months researching a multitude of aspects regarding Covid-19 vaccines, and have concluded that based on these and additional factors, they should not be justified from a legal standpoint, or as a moral imperative. Please consider my thoughts as you take this aspect of our lives and livelihoods into your hands. Whatever Pima County does on this front is surely to impact any future decisions of the likeminded City Council of Tucson. It should be sufficient, especially in America, to provide options to citizens and encourage them to make informed choices, but unfortunately, this is not what we're seeing, largely, in the midst of this unprecedented event.

Thank you for your service,

Frank Baden

**Subject:** Comments to the Board of Supervisors

**CAUTION:** This message and sender come from outside Pima County. If you did not expect this message, proceed with caution. Verify the sender's identity before performing any action, such as clicking on a link or opening an attachment.

Hello, I understand the government wants to do everything possible to solve the COVID pandemic but mandating vaccinations for all licensed health care providers and their offices is wrong on so many levels. This is a violation of many civil liberties that we enjoy in America. Each person should be allowed to evaluate available information and do a risk/benefit analysis to make the best decision for themselves, their family and society at large. Unfortunately, the adverse effects of the COVID vaccinations have been suppressed and the best source, the VAERS self reporting system, is viewed by many to under report adverse effects by 5 times or more. People who have had the virus and have natural immunity, which is much better than the artificially induced ones, do not need the vaccine. Pregnant women have an inherent risk for an adverse reaction. I personally am opposed to using any vaccine that was developed using aborted fetal tissue. These are but a few objections that make mandatory vaccination wrong.

Additionally, it is unlikely that you have the authority either by the state or federal constitutions to apply a blanket mandate on a specific group of people. I predict that if this is approved, there will be a revolt from many generally quiet constituents like myself, the likes of which has rarely, if ever, been seen in Pima County. Please resist the desire to attempt a governmental "solution" for a problem which will only cause more harm than good.

Sincerely,

Jim Westerman DC
