## Pima County Board of Supervisors,

Four question you are *obligated* to consider before mandating a COVID-19 “vaccine”:

1). **“Are the shots necessary?”** CDC rates of death are less than 1% for ages under 50 years old. (This is not opinion or conjecture but governmental statistics)

2) **“Are the shots safe?”** With VAERS and state agencies reporting deaths and injuries in the thousands the answer is “no”. And this is not considering long term physical harm. (This is not opinion or conjecture but government statistics and medical reporting)

3) **“Are the shots effective”.** With the growing number of “break through” cases of COVID-19, and evidence that the vaccine is no longer working, the answer is “no, the shot is not effective”. See the CDC report:

FIGURE 1. SARS-CoV-2 Infections (N = 469) associated with large public gatherings, by date of specimen collection and vaccination status\* — Barnstable County, Massachusetts, July 2021

**4). "Can you legally *force* people to receive *any* drug against their will?"**

The legal ramifications of forced compliance may very well place the county and yourselves in legal jeopardy. You, as public servants, have an obligation to your constituents to allow freedom to work, live, thrive, and choose according to the American Constitution and The Bill of Rights.

## Daily new confirmed COVID-19 cases

Shown is the rolling 7-day average. The number of confirmed cases is lower than the number of actual cases; the main reason for that is limited testing.

**Subject:** Vaccination Mandate for All HealthCare Workers

**CAUTION:** This message and sender come from outside Pima County. If you did not expect this message, proceed with caution. Verify the sender's identity before performing any action, such as clicking on a link or opening an attachment.

Dear Clerk of Board, I am requesting that our email be ready aloud at the board meeting. PLEASE VOTE NO ON VACCINE MANDATE. Please consider personal liberty and do not vote to mandate the vaccine for all health care workers. Besides natural immunity, there are other reasons that individuals choose not to be vaccinated. Particularly when this vaccine has no long term studies on side effects or adverse impacts. Thank you. Sincerely, Brooke Pittner
