To Whom It May Concern,

We were all fine last year working without the vaccines. It should be our choice as healthcare workers as to whether we need to get vaccinated with a vaccine that still is not fully tested. Mandating the vaccine and even masks is not a constitutionally sound decision. Please do not do this. Allow people to make their own decisions especially in light of the "new mu variant" that may be resistant anyways.

Sincerely,  
Melody D

To whom it may concern,

I'm asking you to understand that mandating any vaccine of any free American is absolutely wrong. So many have overcome COVID and have built up immunity. So many health care workers have persevered through this time and should absolutely be able to keep their jobs without the vaccine. We also know that vaccinated people can pass the vaccine to others so this truly is an inappropriate mandate. If our country continues with this type of assault on medical freedom we will continue to lose other freedoms rapidly. There are other ways to heal and to treat this disease. Thank you.
