Date: September 7, 2021

Re: Pima County Government Workers Coerced/Forced/Mandated to get Covid-19 vaccine OR GET PENALIZED

NOTICE OF LIABILITY FOR LACK OF INFORMED CONSENT WHEN ADMINISTERING COVID-19 EXPERIMENTAL INVESTIGATIONAL VACCINES-GENE THERAPY

THE TEN POINTS OF THE NUREMBERG PRINCIPLES

1. The VOLUNTARY consent of the human subject is absolutely essential.
- 2.. The experiment should be such as to yield fruitful results for the good of society, unprocurable by other methods or means of study, and not random and unnecessary in nature.
3. The experiment should be so designed and based on the results of animal experimentation and a knowledge of the natural history of the disease or other problem under study that the anticipated results will justify the performance of the experiment.
4. The experiment should be so conducted as to avoid all unnecessary physical and mental suffering and injury.
5. No experiment should be conducted where there is an a priori reason to believe that death or disabling injury will occur; except, perhaps, in those experiments where the experimental physicians also serve as subjects.
6. The degree of risk to be taken should never exceed that determined by the humanitarian importance of the problem to be solved by the experiment.
7. Proper preparations should be made, and adequate facilities provided to protect the experimental subject against even remote possibilities of injury, disability, or death.
8. The experiment should be conducted only by scientifically qualified persons. The highest degree of skill and care should be required through all stages of the experiment of those who conduct or engage in the experiment.

9. During the course of the experiment the human subject should be at liberty to bring the experiment to an end if he has reached the physical or mental state where continuation of the experiment seems to him to be impossible.

10. During the course of the experiment the scientist in charge must be prepared to terminate the experiment at any stage, if he has probable cause to believe, in the exercise of the good faith, superior skill and careful judgment required of him that a continuation of the experiment is likely to result in injury, disability, or death to the experimental subject.

Any compulsory Covid-19 vaccination requirement/mandate is a violation of federal law-the law is clear.

Covid-19 Vaccines are Experimental and Require Informed Consent.

Covid-19 vaccines are not approved by the FDA. The Covid-19 vaccines are only approved under an Emergency Use Authorization, for investigational use only (1). Covid-19 vaccines lack requisite studies and are not approved medical treatment. The FDA's guidance on emergency use authorization of medical products requires the FDA to "ensure that recipients are informed to the extent practicable given the applicable circumstances ... That they have the option to accept or refuse the EUA product ..." (2)

Title 21, Section 360bbb-3 of the Federal Food, Drug, and Cosmetic Act (the "FD&C Act") vests the Secretary of Health and Human Services with the permissive authority to grant Emergency Use Authorizations ("EUAs") providing that appropriate conditions designed to ensure that individuals to whom the product is administered are informed:

1. that the Secretary has authorized the emergency use of the product;
2. of the significant known and potential benefits and risks of such use, and of the extent to which such benefits and risks are unknown; and
3. **of the option to accept or refuse administration of the product**, of the consequences, if any, of refusing administration of the product, and of the alternatives to the product that are available and of their benefits and risks (1).

The right to avoid the imposition of human experimentation is fundamental, rooted in the Nuremberg Code of 1947, has been ratified by the 1964 Declaration of Helsinki, and further codified in the United States Code of Federal Regulations. In addition to the United States regarding itself as bound by these provisions, these principles were adopted by the FDA in its regulations requiring the informed consent of human subjects for medical research. It is unlawful to conduct medical research, even in the case of an emergency, unless steps are taken to secure **INFORMED CONSENT** of all participants (3).

If the Board of Supervisors are choosing to act as Vaccine administrators – You have an obligation to INFORM ALL participants of the adverse events and death which has occurred from these Covid-19 vaccines.

- "potential benefits and risks" of the Covid vaccines, AND
- Of "the extent to which such benefits and risks are unknown;" AND

- “of the option to accept or refuse administration of the product,” AND
- “of the alternatives to the vaccine that are available and of their benefits and risks.” (1)

If the Board of Supervisors are choosing to act as Vaccine administrators – you have a Duty to Inform Recipients of Known and Unknown Risks of the Covid-19 Vaccines:

- Based on VAERS as of June 16, 2021, there have been 5,993 deaths reported(4) and 358,379 adverse events related to the Covid-19 vaccines(5).
- By comparison, from July 1, 1997, until December 31, 2013, VAERS received 666 adult death reports for all vaccines.6
- In 1976, the US government halted the rollout of the experimental swine flu vaccine for 25 deaths after 55 million people were inoculated.
- The FDA and these pharmaceutical companies allow children 12 years and older to receive this vaccine, however children were never studied in this trial. Never before in history have we given medications that were not FDA approved to people who were not initially studied in the trial. There were no trial patients under the age of 18! They’re extrapolating the data from adults down to children and adolescents. This is not acceptable. Children are not little adults. Children have 99.997% survivability from the covid.
- The CDC’s Advisory Committee is meeting in June to address the higher number of observed than expected myocarditis/pericarditis cases in 16–24-year-olds.”(7) This is inflammation of the heart. There is no such thing as a “mild case” of heart inflammation.
- Brain injuries after the COVID-19 vaccines are increasingly being reported. Search the federal government VAERS Database for any diagnostic term such as “dementia” or “Bell’s Palsy” or “brain bleeding,” sadly the numbers are rising daily.(8)
- A study published by the renowned Cleveland Clinic in Ohio indicates that natural immunity acquired through prior infection with COVID-19 is stronger than any benefit conferred by a Vaccine. People that have had Covid in the past and are now recovered, have a much stronger (10-20x) 6 antibody response to the vaccine. The response is much too strong and overwhelms the person's health system. Medical studies show severe side effects post vaccination in those persons with prior infection of Covid, including life- threatening harm to plaintiffs.(9, 10) Health professionals have never blanket administered vaccines without checking for titers first (Hep B, MMR, Varicella, etc.). You must exclude vaccinating persons who already had the infection for which the inoculation is being considered.(11)
- Pregnant persons were not studied in the initial Covid-19 vaccine trials. As such, the risks/benefits are unknown. The mere fact that there are unknown risks needs to be communicated to each vaccine recipient.

Clearly, any attempt to force anyone to take a COVID-19 experimental investigational vaccine is a violation of federal law and the conditions under which the COVID-19 has been authorized for use. The law is clear, investigational experimental medical treatment cannot be mandated.

Board of Supervisors are NOT SHIELDED FROM PERSONAL LIABILITY with mandating experimental agents.

Under the 2005 PREP act enacted by Congress, pharmaceutical companies that manufacture EUA vaccines are shielded from liability related injuries and damages caused by their experimental agents.

However, any employer, board of supervisors, or any entity or person who mandates experimental vaccines on any human being is NOT protected from personal liability for any resulting harm.

You are hereby on notice if you illegally and/or irresponsibly mandate EUA medical therapies on any government worker, such as the COVID-19 vaccine, we the people have no choice but to take legal action and you all may be PERSONALLY LIABLE for resulting harm.

We urge the Board of Supervisors to comply with the FD&C Act and the terms of the EUA and its accompanying Fact Sheet, and to advise all Tucson Government Workers of their RIGHT TO ACCEPT OR REFUSE ANY COVID-19 Investigational experimental gene therapy vaccine. Any other course of action is contrary to FEDERAL LAW.

Also The Board of Supervisors took an oath to uphold the Constitution of the United States and the 14th Amendment is clearly being attacked and breached of our rights as human beings. Look at Roe v Wade (reproductive rights) and Reed v Reed (gender discrimination). My Body; My Choice; My Right. The Supreme Court will uphold our civil right to choose to vaccinate or not. Pima County Government workers are under attack with their right to choose what is appropriate for their bodies.

YOU HAVE THE POWER TO UPHOLD FEDERAL LAW AND THE CONSTITUTION OF THE UNITED STATES.

Any pressure, coercion, forcing the government employee to pay more for health insurance or threat of reprisal constitutes reckless endangerment and has a reasonable expectation of causing personal injury resulting in damages. Throughout world history, "I just did my job" has never been a defense to forced medical experimentation (or medicine intentionally lacking informed consent).

All government workers have the right TO ACCEPT OR TO REFUSE the COVID-19 experimental investigational vaccine.

Subject: No mandatory injections

CAUTION: This message and sender come from outside Plima County. If you did not expect this message, proceed with caution. Verify the sender's identity before performing any action, such as clicking on a link or opening an attachment.

Supervisor Heinz,

Supervisor Grijalva,

Supervisor Bronson,

Supervisor Scott,

Supervisor Christy,

The five of you are proposing to inject people against their will with Genetic technology that's never been tried before in human beings.

You are trying to coerce and manipulate people into participating in an ongoing genetic experiment.

You cannot try to coerce people UNLESS you were absolutely "100%" certain of three things:

Are these vaccines totally Necessary? Are they totally Effective? And are they totally Safe?

What does the Science say?

For long term safety, we know Nothing. Literally. The mRNA technology is Nothing like Any other vaccine Ever before.

For short term safety, you can look to the Centers for Disease Control; in just 8 months, they've had reports of more than 12,000 Deaths after vaccination. <https://www.openvaers.com/covid-data/covid-full-data>

But, what if it were only one death? Or is 25 not too many? A thousand deaths? Ten thousand? How many deaths is "too many"?

These vaccines are NOT 100 percent Safe. You CanNOT in good conscience force people to be vaccinated with something that WE KNOW is going to harm some percentage of us.

But, if you are thinking that it's a small price to pay to ensure the safety of the majority, I ask you to consider who the minority is. What if "the minority" were your child? Would that still be just a small price to pay for the safety of "most people"? Can "we" sacrifice your daughter to death so that "a majority of others" can take profits from the common good? Not My daughter.

Number 2: How effective are these injections at reducing transmission of the virus. (That's the issue here, transmitting deadly disease.) The CDC, W.H.O., Pfizer, Moderna, J and J — they ALL say that these injections do Not stop Transmission. Furthermore, the viral load of the infected vaccinated is the same as among the unvaccinated. (*CDC document found "vaccinated individuals infected with delta may be able to transmit the virus as easily as those who are unvaccinated," and that, "Vaccinated people infected with delta have measurable viral loads similar to those who are unvaccinated and infected with the variant."*)

<https://www.reuters.com/article/factcheck-cdc-vaccines-idUSL1N2PB2WH>. CDC Director: "Today, some of those data were published in CDC's Morbidity and Mortality Weekly Report (MMWR), demonstrating that **Delta infection resulted in similarly high SARS-CoV-2 viral loads in vaccinated and unvaccinated people.** High viral loads suggest an increased risk of transmission and raised concern that, unlike with other variants, **vaccinated people infected with Delta can transmit the virus.**" -CDC Director Rochelle P. Walensky, MD, MPH on MMWR, Media Statement, For Immediate Release: Friday, July 30, 2021.)

These vaccines are not even necessary. These vaccines provide "Absolute risk reduction" of literally almost nothing. (*"The Absolute Risk Reduction (ARR) is the arithmetic difference between event rates (the percentage of people who, for example, got infected) within the two groups."* <https://www.reuters.com/article/factcheck-thelancet-riskreduction-idUSL2N2NK1XA>)

"A-symptomatic" people are Not spreading virus. (*"There were no positive tests amongst 1,174 close contacts of asymptomatic cases."* <https://principia-scientific.com/study-of-ten-million-finds-no-evidence-of-asymptomatic-covid-spread> "Asymptomatic individuals were 42% less likely to transmit the virus than symptomatic people." <https://www.nature.com/articles/d41586-020-03141-3>)

These injections are Unnecessary for the Healthy, they do Not eliminate transmission of virus, and they are Literally Killing innocent people.

Shame on Anyone for injecting Anything into other people's bodies without Authentic, Informed consent.

Shame on whomever for even trying.
