Item # 3 Mask Mandate K-12

This mandate is going beyond the ridicules. With the scientific breakdown on how ineffective masks are in relation to the overall result from wearing them it seems like a no brainer to eliminate the mandate. If you look at science, the virus is spread by aerosol particles which are small enough to go thru every mask and the info can be verified by the NIH. What's the purpose of this mandate other than to be a power play to control us and make us subservient to these radical whims. Read and research the science behind this instead of interjecting your own bias as to the effectiveness of the masks. Most of the time you can't understand what a person is saying when talking to them with a mask on. The application of these mandates are widely unenforced based on who you are and where you're at so stop trying to dictate how kids etc live. Kids need to feel whole and not be regulated by some ridiculous mandate that is virtually ineffective.

Item # 4 Vaccine Mandate for all Pima County Employees

Again, this area has so many different sides to it regarding the effectiveness of the so called vaccine that you might as well flip a coin to determine which you believe without doing the necessary research. Science again shows that those that have had Covid and recovered from it have a higher degree of antibodies than those that get the shot. Why in the world would you want to vaccinate someone that already has the antibodies to protect them. The CDC, NIH and many state board of health has the science results on vaccines but you don't hear about it because it doesn't fit the agenda of control.

Item # 13 & 14 Partners in Health and Medical Support for those crossing our borders

This again is beyond ridiculous as we can't even take care of our Veterans, Seniors and others with mental challenges and now you want to fund these people coming across our borders with who knows how many and with what diseases. Yes it is tragic that these people have a hard and violent life at times but we can't be the savior of the entire world. If we don't take care of our own that need help we are making the pyramid unsustainable and will suffer tremendously with crime, unemployment, housing etc, etc etc.
