**CAUTION:** This message and sender come from outside Pima County. If you did not expect this message, proceed with caution. Verify the sender's identity before performing any action, such as clicking on a link or opening an attachment.

Once again it looks like the PCBOS has refused to look at all of the evidence as to why people are refusing to take this experimental device injection. Your actions are crossing over into criminal action and will be noted and forwarded. In regards to your agenda items for Oct 5, 2021 meeting:

1) Have you evaluated the impact New Arrestees who have tested positive are having on the PCADC Facility? Have you evaluated their potential to spread this so-called "virus?" Judging by the wording on the agenda I have to take the answer to be no and that you are assessing full blame on those employees who are willfully exercising their FREEDOMS to not take an experimental injection. As noted below, in a previous email, your actions violate the Nuremberg Code in your attempts to coerce under duress, force, and deceit to take this injection.

2) PCBOS is in clear violation of EEOC Guidelines and its actions have been forwarded to State Representatives and Legislatures for investigation. In addition, any approval of said actions listed on the agenda regarding outright discrimination against those who in their own right to refuse a COVID injection will be filed with the EEOC and potential class action lawsuit.

It is clear the PCBOS has been negligent in doing full research on the Adverse Effects this vaccine is causing to millions of people world wide, which includes death. The FDA has even listed "death" as a side effect of this vaccine. The willful neglect of the PCBOS to give proper Informed Consent will subject them to criminal charges as well as charges for Crimes Against Humanity. There are organizations forming globally to begin investigations regarding those entities and persons who are complicit in forcing a medical device onto people where the death rate has far exceeded an acceptable limit for approval.

I strongly suggest you watch the video in the link provided. Your arrogance will be your downfall as you represent the people and citizens of this county, not your own agendas.

**Subject:** Fwd: Forced Mandatory Experimental Vaccination is ILLEGAL!!!

Once again, it is mind boggling how a few individuals believe they are exempt from the law. As per the meeting on Tuesday, August 10, 2021, it was understood the PCBOS will be discussing whether or not to make weekly testing mandatory and assess a monthly \$50 insurance surcharge for individuals who have not received the vaccination. I have received word that the Board intends to discuss whether or not vaccines and masks should be mandatory again for Pima County employees, etc. Again, the former and latter considerations are ILLEGAL!!!!

Standard 1 of the Nuremberg Code reads as follows:

1. The voluntary consent of the human subject is absolutely essential. This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision. This latter element requires that before the acceptance of an affirmative decision by the experimental subject there should be made known to him the nature, duration, and purpose of the experiment; the method and means by which it is to be conducted; all inconveniences and hazards reasonably to be expected; and the effects upon his health or person which may possibly come from his participation in the experiment.

Please know that during the Nuremberg Trials after WWII, people of the media and doctors, along with the Nazis, were prosecuted for lying to the public for crimes against humanity. In addition, these actions are in violation of other international charters such as the Geneva Convention and the UN Charter just to name a few. Your intentions and actions will be forwarded to the proper entities so immediate Criminal Action can be taken against you if these measures are approved.

I would like to express my appreciation for Supervisor Christy for taking a STAUNCH stance against this ILLEGAL conduct.

Subject: Forced Mandatory Experimental Vaccination is ILLEGAL!!!

I just got word that the PCBOS is planning to vote on Mandatory Vaccinations for Pima County Employees this coming Tuesday. First, I want to say this is HIGHLY ILLEGAL which can and will lead to legal action against those who put this in place. In addition, the CDC has come out indicating the supposed rise in new cases is from those individuals who are already vaccinated as well as being vaccinated is no longer effective in deterring it's transmission. The World Health Organization has even stated they are calling for a stop to continued booster vaccinations. This vaccination has not been approved by the FDA. It's experimental use must follow specific guidelines which many organizations are ignoring and putting the health and livelihood of many individuals in jeopardy. Of great concern with this vaccination is the proprietary ingredient which is a poison, graphene oxide and the spiked proteins which compromises the immune system.

Lastly, forced and mandatory vaccination of an experimental drug or device that has harmed and killed many people is a clear violation of the Nuremberg Code of 1947 which is included below.

## The Nuremberg Code (1947)

### Permissible Medical Experiments

The great weight of the evidence before us to effect that certain types of medical experiments on human beings, when kept within reasonably well-defined bounds, conform to the ethics of the medical profession generally. The protagonists of the practice of human experimentation justify their views on the basis that such experiments yield results for the good

of society that are unprocurable by other methods or means of study. All agree, however, that certain basic principles must be observed in order to satisfy moral, ethical and legal concepts:

1. The voluntary consent of the human subject is absolutely essential. This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision. This latter element requires that before the acceptance of an affirmative decision by the experimental subject there should be made known to him the nature, duration, and purpose of the experiment; the method and means by which it is to be conducted; all inconveniences and hazards reasonably to be expected; and the effects upon his health or person which may possibly come from his participation in the experiment.

The duty and responsibility for ascertaining the quality of the consent rests upon each individual who initiates, directs, or engages in the experiment. It is a personal duty and responsibility which may not be delegated to another with impunity.

2. The experiment should be such as to yield fruitful results for the good of society, unprocurable by other methods or means of study, and not random and unnecessary in nature.
3. The experiment should be so designed and based on the results of animal experimentation and a knowledge of the natural history of the disease or other problem under study that the anticipated results justify the performance of the experiment.
4. The experiment should be so conducted as to avoid all unnecessary physical and mental suffering and injury.
5. No experiment should be conducted where there is an a priori reason to believe that death or disabling injury will occur; except, perhaps, in those experiments where the experimental physicians also serve as subjects.
6. The degree of risk to be taken should never exceed that determined by the humanitarian importance of the problem to be solved by the experiment.
7. Proper preparations should be made and adequate facilities provided to protect the experimental subject against even remote possibilities of injury, disability or death.
8. The experiment should be conducted only by scientifically qualified persons. The highest degree of skill and care should be required through all stages of the experiment of those who conduct or engage in the experiment.
9. During the course of the experiment the human subject should be at liberty to bring the experiment to an end if he has reached the physical or mental state where continuation of the experiment seems to him to be impossible.
10. During the course of the experiment the scientist in charge must be prepared to terminate the experiment at any stage, if he has probable cause to believe, in the exercise of the good faith, superior skill and careful judgment required of him, that a continuation of the experiment is likely to result in injury, disability, or death to the experimental subject.

For more information see Nuremberg Doctor's Trial, *BMJ* 1996;313(7070):1445-75.

Please be advised, any action that violates these standards will be forwarded to appropriate legal organizations to pursue litigation and lawsuits. Also of note, is that every individual who participates in forcing experimental drugs or devices on individuals can and will be held personally liable for their actions. It is a shame that elected officials feel the want to enact policies without fully doing the research, in particular when there is ample evidence that this vaccination has caused serious harm, even death, to individuals. It is my hope the PCBOS looks more seriously into this. Thank you for your time.
