| Award Type: | Contract |
| BOSAIR Activity: | Board Meeting Request |
| Requested Board Meeting Date: | 07/14/2026 |
| Supplier / Customer / Grantor / Subrecipient: | TYPSA, Inc. |
| Project Title / Description: | Cultural Resources Services for Pima County Regional Middle Mile Project (PCRMMP) |
| Purpose: | Amendment: Contract No. PO2500002562, Amendment No. 4. This amendment increases the contract amount by \$964,042.91 for a cumulative not-to-exceed amount of \$2,290,124.39, incorporates additional scope of services and cost for the remainder of Phase 2 Archaeological Mitigation & Monitoring, and reallocates funds among major tasks. Administering Department: Project Design and Construction |
| Procurement Method: | Other |
| Insert additional Procurement Method info, if applicable: | <p>Pursuant to Solicitation for Qualifications No. SFQ-PO-2400014, on 05/21/24, the Board of Supervisors awarded a contract for this project in the amount of \$1,326,081.48 for a contract term of 05/21/24 to 12/31/28.</p> <p>Amendment No. 1 was approved by the Procurement Director, on 02/14/25, to change the contract number to PO2500002562 (formerly CT-CPO-24-429), and to add the Heat Injury and Illness Prevention and Safety Plan clause to the contract.</p> <p>Amendment No. 2 was approved by the Procurement Director, on 09/18/25, to remove Casey's Backhoe Service as a subconsultant due to not being available within the necessary timeframe and to add W6 Construction LLC as a subconsultant with no change to the contract value.</p> <p>Amendment No. 3 was approved by the Procurement Director, on 03/06/26, to change the Consultant's name from AZTEC Engineering Group, Inc. to TYPSA, Inc. due to a legal name change.</p> <p>Attachment: Amendment No. 4.</p> |
| Program Goals/Predicted Outcomes: | Pima County received grant funding from the National Telecommunications and Information Administration (NTIA) enabling Middle Mile Broadband Infrastructure to expand and extend Middle Mile Infrastructure to create 134-mile contiguous open access fiber optic network ring around its urban core. |

Public Benefit and Impact: The proposed Middle Mile Infrastructure project will reduce cost for last mile providers to connect unserved and underserved communities by providing a neutral network that last mile providers can access in a nondiscriminatory open access model.

Strategic Plan Pillar • Infrastructure & Growth

Support of Prosperity Initiative: • 9. Expand Broadband Services and Address Barriers to Digital Inclusion

Provide information that explains how this activity supports the selected Prosperity Initiatives This project will provide broadband service to underserved communities.

Metrics Available to Measure Performance: The performance will be measured using the consultant evaluation process as outlined in BOS Policy D29.1 (E).

CONTRACT AMENDMENT

The Parties agree to amend the above-referenced Contract as follows:

1. Background and Purpose.

- 1.1. Background. On May 21, 2024, County and Consultant entered into the above referenced agreement to provide Cultural Resources Services for Pima County Regional Middle Mile Project (PCRMMP).
- 1.2. Purpose. County intends to increase the contract amount by \$964,042.91 for a cumulative not-to-exceed amount of \$2,290,124.39, incorporate additional scope of services and cost for the remainder of Phase 2 Archaeological Mitigation & Monitoring, and reallocate funds among major tasks.

2. Scope of Services Section 3, paragraph 1 is being revised as follows.

“Consultant agrees to provide Cultural Resource Services for the County as described in Exhibit A – Scope of Services (16 pages) and Exhibit A-1 – Additional Scope of Services (5 Pages), an attachment to this contract, and to complete such services within the term and value of this contract as it may be modified in accordance with Section 5. Amendments and changes to the Scope must be approved by the Board of Supervisors or the Procurement Director before the work under the amendment commences.”

3. Compensation and Payment

Section 5.2. Compensation Schedule. Consultant’s total CPFF is incorporated as Exhibit B – Compensation Schedule (34 Pages), Exhibit B-1 – W6 Construction LLC proposal (1 Page), Exhibit B-2 – TYP SA, Inc. Proposal (3 Pages), and Exhibit B-3 – Phase 2 Archaeological Mitigation & Monitoring (10 Pages).

Section 5.4. Maximum Payment Amount. The total of all payments to Consultant for services provided under this Contract will not exceed \$2,290,124.39.

Attach: Exhibit A-1 – Additional Scope of Services (5 Pages)
Exhibit B-3 – Phase 2 Archaeological Mitigation & Monitoring (10 Pages)

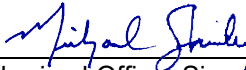

Remainder of Page Intentionally Left Blank

All other provisions of the Contract not specifically changed by this Amendment remain in effect and are binding upon the Parties.

Exhibit A-1 – Additional Scope of Services (5 Pages)**Introduction**

This cover document accompanies the enclosed cost derivation and hours spreadsheets. Tasks described follow those outlined in the project scope of work included with the Solicitation for Qualifications (SFQ) (SFQ-PO-2400011). While that scope of work is not reiterated, the following discussion presents clarifications and justifications for the proposed costs. This cost proposal provides for implementation of the historic properties treatment plan.

Scope of Work and Justification of Cost by Task**1. Phase 2, Documentation and Inventory Tasks****2.2 Permitting**

- 2.2.1 AAA Permits: Obtain Arizona Antiquities Act (AAA) PS permit and repository agreement (RA): Time is included for staff to prepare permit applications and supporting documentation, and to coordinate with ASM staff.
- 2.2.2 Federal Permits: monitoring is expected to be to be conducted on federal lands, requiring TYP SA to obtain permits from National Park Service (NPS) and possibly Bureau of Reclamation (Reclamation) and Bureau of Land Management (BLM). Time is included to apply for and obtain those permits, and complete periodic updates to the respective agencies.
- 2.2.3 Traffic Control Plans and Encroachment Permitting: While monitoring is expected to be conducted under the construction contractors' encroachment permits, in the event data recovery or ancestral remains recovery becomes necessary, TYP SA may need to obtain separate permitting. Time is included for TYP SA engineers to prepare traffic control plans, and for TYP SA permitting staff to obtain encroachment permits.
- 2.2.4 Coordination/Meetings: Hours are included to account for meetings and other coordination with Pima County, land managing agencies, and other permitting authorities. This includes 1 regular monthly progress meeting associated with this task as well as 1 other meeting that may be required. Travel is not anticipated as part of these meetings.
- 2.2.5 Task Management: Hours are included for the project manager to track budget and schedule, prepare progress reports, and to complete invoicing, with assistance and oversight from a contract principal.

2.3 Archaeological/Tribal Monitoring and Unanticipated Discovery Resolution

- 2.3.1 Mobilization: 1.2 hours per monitor per field day are included in this task to complete field preparation tasks such as equipment gathering, travel arrangements, form production, field map preparation, etc. and demobilization tasks including equipment return and maintenance, form scanning and filing, photo processing, etc.
- 2.3.2 Fieldwork: Up to 115 discrete portions of the project may be subject to monitoring. Each location is assumed to require a full day and separate mobilization; monitoring days may be non-consecutive. Hours included for this task are based on 10-hour work days. TYP SA anticipates these

hours may be divided among multiple monitors covering multiple crews working simultaneously. Monitoring areas would also be flagged by TYPESA staff using 4-ft wooden lath and flagging tape prior to construction, and TYPESA staff would remove flagging following construction.

TYPESA anticipates Tohono O’odham Nation will request tribal monitoring participation in construction. Hours are included here for a tribal monitor to be present for all activities subject to archaeological monitoring (i.e., 115 10-hour days).

- 2.3.3 **Discovery Resolution:** Should previously unrecorded cultural resources be found during the project (in the presence of an archaeological monitor or not), qualified TYPESA staff would evaluate those resources and complete any necessary notifications. Hours in this task provide for these evaluations and notifications, subject to the following expectations:
- No more than 20 non-mortuary discoveries are anticipated
 - Ancestral remains may be encountered; TYPESA anticipates two individuals could require removal, escort, housing, and all other aspects of respectful treatment described in the HPTP and the project’s burial and discovery agreement/NAGPRA plan of action
 - These hours do not provide for data recovery. Should limited or intensive data recovery be found necessary, as described by the HPTP, funding for those activities would fall under the data recovery task below.
- 2.3.4 **Artifact Processing:** minimal artifact and sample collection may be completed during monitoring or discovery resolution, outside of the context of limited or intensive data recovery. Hours are included here to wash, catalog, and prepare those collections for analysis and curation. No more than 25 specimens (individual artifacts or bulk collections/samples) are expected to be collected under this task.
- 2.3.5 **Analysis:** Collections from monitoring and discovery would be analyzed as described by the HPTP. Hours included in this task rely on the same anticipated quantities presented in the 2.3.4 artifact processing task.
- 2.3.6 **Report:** Upon completion of fieldwork, all investigation results would be detailed in a report meeting all relevant agency requirements. Hours are included here to complete all reporting tasks related to the monitoring and discovery resolution efforts. Final copies of the mitigation report would be produced by West Press.
- 2.3.7 **Coordination/Meetings:** Hours are included to account for meetings and other coordination with Pima County, vendors, land managing agencies, and other permitting authorities. This includes 4 regular monthly progress meetings associated with this task as well as 1 other meeting that may be required. Travel is not anticipated as part of these meetings.
- 2.3.8 **Task Management:** Hours are included for the project manager to track budget and schedule, prepare progress reports, and to complete invoicing, with assistance and oversight from a contract principal.

2.4 Data Recovery

Project design minimized the need for data recovery, and the HPTP calls for no pre-construction testing or data recovery. The HPTP instead outlines an approach to complete limited or intensive data recovery if significant findings are encountered during monitoring. For a project of this size, the eventual need for data recovery is a reasonably foreseeable outcome, and costs to address this need are included in this task; however, the data recovery budget would not be used without prior written authorization from Pima County. The following tasks rely on a series of assumptions:

- The number of sites and extent of data recovery cannot be known at this time. TYPESA anticipates no more than two discrete sites will require intensive data recovery, in total requiring no more than six weeks of fieldwork for a crew of five and one backhoe team provided by subcontractor W6 Construction to complete data recovery.
- A treatment plan is under preparation using Phase 1 funds; this task is not included in the Phase 2 cost proposal.
- Ground disturbance, including backdirt stockpiling and access areas, would not exceed one acre per location, and implementing a stormwater pollution prevention plan is not expected to be required.
- Similarly, a Pima County fugitive dust control permit is not anticipated.
- Data recovery would likely require permit updates and may involve ROW encroachment permitting; these costs are captured in the permitting task (2.1) above.

2.4.1 Mobilization: 10 hours per week are included in this task to complete field preparation tasks such as equipment gathering, travel arrangements, form production, field map preparation, etc. and demobilization tasks including equipment return and maintenance, form scanning and filing, photo processing, etc.

2.4.2 Fieldwork: Costs are included to complete data recovery fieldwork subject to the assumptions outlined above.

2.4.3 Artifact Processing: No more than 800 artifacts and 120 soil samples are expected to be collected during data recovery operations. Hours are included here to wash, catalog, and prepare those collections for analysis and curation.

2.4.4 Analysis: Collections from data recovery would be analyzed as described by the HPTP. Hours included in this task rely on the same anticipated quantities presented in the 2.3.4 artifact processing task.

2.4.5 Report: Upon completion of fieldwork, all investigation results would be detailed in a report meeting all relevant agency requirements. Hours are included here to complete all reporting tasks related to data recovery efforts.

2.4.6 Coordination/Meetings: Hours are included to account for meetings and other coordination with Pima County, vendors, land managing agencies, and other permitting authorities. This includes 4 regular monthly progress meetings associated with this task as well as 1 other meeting that may be required. Travel is not anticipated as part of these meetings.

- 2.4.7 Task Management: Hours are included for the project manager to track budget and schedule, prepare progress reports, and to complete invoicing, with assistance and oversight from a contract principal.

2.5 Ethnographic Study – Phase 2

- 2.5.1 Report: Hours are included to complete ethnographic research and reporting begun in Phase 1.
- 2.5.2 Traditional Cultural Place (TCP) Database Development: Hours are included to prepare a geodatabase summarizing information related to possible TCPs identified through identification efforts (ethnography in addition to Class I and Class III inventory).
- 2.5.3 QA/QC: Hours are included for TYP SA’s editorial staff to review all ethnographic products.
- 2.5.4 Coordination/Meetings: Hours are included to account for meetings and other coordination with Pima County, land managing agencies, and other permitting authorities. This includes 2 regular monthly progress meetings associated with this task as well as 1 other meeting that may be required. Travel is not anticipated as part of these meetings.
- 2.5.5 Task Management: Hours are included for the project manager to track budget and schedule, prepare progress reports, and to complete invoicing, with assistance and oversight from a contract principal.

2.6 Public Outreach

- 2.6.1 Public Products and Site Visits: This task encompasses the preparation of public products that will offer interpretation and public engagement with the results of research conducted for this project. Minimally, this is expected to include a story map that can be linked or hosted on Pima County’s website, as well as a pamphlet or monograph. Additionally, TYP SA would offer opportunities to Section 106 consulting parties and potentially other members of the public to visit sites during data recovery efforts, if such investigations are necessary.
- 2.6.2 Coordination/Meetings: Time is included to account for meetings and other coordination with Pima County, vendors, and land-managing or other permitting authorities. This includes up to 1 regular monthly progress meeting associated with this task as well as 1 other meeting that may be required.
- 2.6.3 Task Management: Time is also included to track budget and schedule, and to complete invoicing.

2.7 Curation and Close-out

- 2.7.1 ASM Curation: This task entails preparing an ASM curation package to satisfy AAA permitting requirements, including hardcopy reports, GIS files, digital photographs, artifact collections, logs, and field records.

- 2.7.2 Federal Curation: This task entails preparing records for federal agencies' files, including hardcopy reports, GIS files, digital photographs, and field records.

- 2.7.3 Coordination/Meetings: Time is included to account for meetings and other coordination with Pima County, vendors, and land-managing or other permitting authorities. This includes up to 1 regular monthly progress meeting associated with this task as well as 1 other meeting that may be required.

- 2.7.4 Task Management: Time is included to track budget and schedule, and to complete invoicing.

**RE: Scope/Cost Estimate for the Pima County Regional Middle Mile Broadband Infrastructure Project
Phase 2, Revised**

Ms. Dargan:

Per your October 1, 2025 request and our subsequent communication, TYP SA is pleased to submit this revised cost proposal to execute the historic properties treatment plan for the above referenced project.

TYP SA requests approval of **\$964,042.91** in new funds to complete Phase 2, in accordance with the budget outlined herein. In total, completion of Phase 2 is anticipated to require \$1,110,719.94; however, Phase 1 is expected to be completed with funds remaining from the originally allocated budget. In consideration of these remaining funds, TYP SA requests the projected remaining Phase 1 budget of \$146,677.03 be re-aligned to Phase 2, as outlined in the attached tables.

We appreciate the opportunity to continue working with Pima County on this project. Should you have any questions, please contact me at 520.343.1133 or jlangan@typsa.us.

Sincerely,

A handwritten signature in black ink, appearing to read 'John Langan'.

Quote

Quote No. 13236-Q1
Date: February 16, 2026
Valid to: April 17, 2026

Request No. 13236

Company Name: Aztec Engineering, TYPASA Group

Request Name: Pima County Middle Mile Broadband Infrastructure Project Phase 2

Company Project No. AZENS2400

Request Contact

Contact Name: John Langan (jlangan@aztec.us)

Contact Name: Kristina Davison (kdavison@aztec.us)

Services Requested

Service: Burial Discovery Agreement

Burial Agreement Landownership: Both State and Private Land

Burial Agreement Type: Standard

Expedite a General Burial Discovery Agreement: NOT SELECTED

No. of Estimated BDA Linear Inches: 1

Service: Project Registration

Project Type: Site Monitoring, Testing, and Data Recovery

Landownership: Federal, Private, State County or Municipal

Site Number(s):

No. of Person Field Days: 120

Arizona Antiquities Act Permit

Site Monitoring, Testing and Data Recovery takes place within the boundary of an ASM Site on State Land: Yes

AAA Project-Specific Permit: SELECTED

Treatment Plan Type: Project-Specific

ASM Repository Agreement

Request a Repository Agreement with ASM: SELECTED

Expedited ASM Repository Agreement: NOT REQUESTED

Estimated quantities of materials to be curated at ASM

No. of Linear Inches of documents to be curated at ASM: 5

No. of New ASM Site Cards to be submitted: 0

No. of ASM Site Card Updates to be submitted: 22

No. of Digital Images to be submitted: 100

No. of Half Boxes to be submitted: 8

No. of Catalog Objects to be submitted: 20

Request note:

Please Note: Tasks and Costs below where the Curation column is listed as "YES" will appear on Invoice 2 and the quantities listed on this quote are subject to change.

Rate Based Fees
